Forward-Looking Statements

This quarterly report may contain forward looking statements that are within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements include, but are not limited to, discussions related to Apollo's expectations regarding the performance of its business, its liquidity and capital resources and the other non-historical statements in the discussion and analysis. These forward-looking statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. When used in this quarterly report, the words believe, anticipate, estimate, expect, intend and similar expressions are intended to identify forward-looking statements. Although management believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. These statements are subject to certain risks, uncertainties and assumptions, including risks relating to our dependence on certain key personnel, our ability to raise new private equity, capital markets or real estate funds, market conditions, generally; our ability to manage our growth, fund performance, changes in our regulatory environment and tax status, the variability of our revenues, net income and cash flow, our use of leverage to finance our businesses and investments by our funds and litigation risks, among others. We believe these factors include but are not limited to those described under the section entitled Risk Factors in the Company's Form 10-K filed with the United States Securities and Exchange Commission (SEC) pursuant to Rule 424(b) of the Securities Act of 1933 on March 9, 2012, as such factors may be updated from time to time in our periodic filings with the SEC, which are accessible on the SEC's website at www.sec.gov. These factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included in this release and in other filings. We undertake no obligation to publicly update or review any forward-looking statements, whether as a result of new information, future developments or otherwise, except as required by applicable law.

Terms Used in This Report

In this quarterly report, references to Apollo, we, us, our and the Company refer collectively to Apollo Global Management, LLC and its subsidiaries, including the Apollo Operating Group and all of its subsidiaries.

Apollo funds and our funds refer to the funds, alternative asset companies and other entities that are managed by the Apollo Operating Group. Apollo Operating Group refers to:

- (i) the limited partnerships through which our Managing Partners currently operate our businesses; and
- (ii) one or more limited partnerships formed for the purpose of, among other activities, holding certain of our gains or losses on our principal investments in the funds, which we refer to as our principal investments.

Assets Under Management, or AUM, refers to the investments we manage or with respect to which we have control, including capital we have the right to call from our investors pursuant to their capital commitments to various funds. Our AUM equals the sum of:

- (i) the fair value of our private equity investments plus the capital that we are entitled to call from our investors pursuant to the terms of their capital commitments plus non-recallable capital to the extent a fund is within the commitment period in which management fees are calculated based on total commitments to the fund;
- (ii) the net asset value, or NAV, of our capital markets funds, other than certain senior credit funds, which are structured as collateralized loan obligations (such as Artus, which we measure by using the mark-to-market value of the aggregate principal amount of the underlying collateralized loan obligations) or certain collateralized loan obligation and collateralized debt obligation credit funds that have a fee generating basis other than mark-to-market asset values, plus used or available leverage and/or capital commitments;
- (iii) the gross asset values or net asset values of our real estate entities and the structured portfolio vehicle investments included within the funds we manage, which includes the leverage used by such structured portfolio vehicles;

- (iv) the incremental value associated with the reinsurance investments of the portfolio company assets that we manage; and
- (v) the fair value of any other investments that we manage plus unused credit facilities, including capital commitments for investments that may require pre-qualification before investment plus any other capital commitments available for investment that are not otherwise included in the clauses above.

Our AUM measure includes Assets Under Management for which we charge either no or nominal fees. Our definition of AUM is not based on any definition of Assets Under Management contained in our operating agreement or in any of our Apollo fund management agreements. We consider multiple factors for determining what should be included in our definition of AUM. Such factors include but are not limited to (1) our ability to influence the investment decisions for existing and available assets; (2) our ability to generate income from the underlying assets in our funds; and (3) the AUM measures that we use internally or believe are used by other investment managers. Given the differences in the investment strategies and structures among other alternative investment managers, our calculation of AUM may differ from the calculations employed by other investment managers and, as a result, this measure may not be directly comparable to similar measures presented by other investment managers.

Fee-generating AUM consists of assets that we manage and on which we earn management fees or monitoring fees pursuant to management agreements on a basis that varies among the Apollo funds. Management fees are normally based on net asset value, gross assets, adjusted par asset value, adjusted cost of all unrealized portfolio investments, capital commitments, adjusted assets, stockholders equity, invested capital, capital contributions, each as defined in the applicable management agreement. Monitoring fees for AUM purposes are based on the total value of certain structured portfolio vehicle investments, which normally include leverage, less any portion of such total value that is already considered in fee-generating AUM.

Non-fee generating AUM consists of assets that do not produce management fees or monitoring fees. These assets generally consist of the following: (a) fair value above invested capital for those funds that earn management fees based on invested capital, (b) net asset values related to general partner and co-investment ownership, (c) unused credit facilities, (d) available commitments on those funds that generate management fees on invested capital, (e) structured portfolio vehicle investments that do not generate monitoring fees and (f) the difference between gross assets and net asset value for those funds that earn management fees based on net asset value. We use non-fee generating AUM combined with fee-generating AUM as a performance measurement of our investment activities, as well as to monitor fund size in relation to professional resource and infrastructure needs. Non-fee generating AUM includes assets on which we could earn carried interest income.

Gross IRR of a fund represents the cumulative investment-related cash flows for all of the investors in the fund on the basis of the actual timing of investment inflows and outflows (for unrealized investments assuming disposition on March 31, 2012 or other date specified) aggregated on a gross basis quarterly, and the return is annualized and compounded before management fees, carried interest and certain other fund expenses (including interest incurred by the fund itself) and measures the returns on the fund's investments as a whole without regard to whether all of the returns would, if distributed, be payable to the fund's investors;

Net IRR of a fund means the gross IRR applicable to all investors, including related parties which may not pay fees, net of management fees, organizational expenses, transaction costs, and certain other fund expenses (including interest incurred by the fund itself) and realized carried interest all offset to the extent of interest income, and measures returns based on amounts that, if distributed, would be paid to investors of the fund; to the extent that an Apollo private equity fund exceeds all requirements detailed within the applicable fund agreement, the estimated unrealized value is adjusted such that a percentage of up to 20.0% of the unrealized gain is allocated to the general partner, thereby reducing the balance attributable to fund investors;

Net return for Value Funds, SOMA and AAOF represents the calculated return that is based on month-to-month changes in net assets and is calculated using the returns that have been geometrically linked based on capital contributions, distributions and dividend reinvestments, as applicable.

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

1. ORGANIZATION AND BASIS OF PRESENTATION

Apollo Global Management, LLC and its consolidated subsidiaries (the Company or Apollo), is a global alternative investment manager whose predecessor was founded in 1990. Its primary business is to raise and invest private equity, capital markets and real estate funds as well as managed accounts, on behalf of pension and endowment funds, as well as other institutional and high net worth individual investors. For these investment management services, Apollo receives management fees generally related to the amount of assets managed, transaction and advisory fees for the investments made and carried interest income related to the performance of the respective funds that it manages. Apollo has three primary business segments:

Private equity primarily invests in control equity and related debt instruments, convertible securities and distressed debt investments;

Capital markets primarily invests in non-control debt and non-control equity investments, including distressed debt securities and non-performing loans; and

Real estate invests in legacy commercial mortgage-backed securities, commercial first mortgage loans, mezzanine investments and other commercial real estate-related debt investments. Additionally, the Company sponsors real estate funds that focus on opportunistic investments in distressed debt and equity recapitalization transactions.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information and instructions to Form 10-Q. The condensed consolidated financial statements and these notes are unaudited and exclude some of the disclosures required in annual financial statements. Management believes it has made all necessary adjustments (consisting of only normal recurring items) so that the condensed consolidated financial statements are presented fairly and that estimates made in preparing its condensed consolidated financial statements are reasonable and prudent. The operating results presented for interim periods are not necessarily indicative of the results that may be expected for any other interim period or for the entire year. The condensed consolidated financial statements include the accounts of the Company, its wholly-owned or majority-owned subsidiaries, the consolidated entities which are considered to be variable interest entities and for which the Company is considered the primary beneficiary, and certain entities which are not considered variable interest entities but in which the Company has a controlling financial interest. Intercompany accounts and transactions have been eliminated upon consolidation. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements of the Company for the year ended December 31, 2011 included in the Company's Annual Report on Form 10-K filed with the SEC.

Reorganization of the Company

The Company was formed as a Delaware limited liability company on July 3, 2007 and completed a reorganization of its predecessor businesses on July 13, 2007 (the 2007 Reorganization). The Company is managed and operated by its manager, AGM Management, LLC, which in turn is wholly-owned and controlled by Leon Black, Joshua Harris and Marc Rowan (the Managing Partners).

As of March 31, 2012, the Company owned, through three intermediate holding companies that include APO Corp., a Delaware corporation that is a domestic corporation for U.S. Federal income tax purposes, APO Asset Co., LLC (APO Asset), a Delaware limited liability company that is a disregarded entity for U.S. Federal income tax purposes, and APO (FC), LLC (APO (FC)), an Anguilla limited liability company that is treated as a corporation for U.S. Federal income tax purposes (collectively, the Intermediate Holding Companies), 34.5% of the economic interests of, and operated and controlled all of the businesses and affairs of, the Apollo Operating Group through its wholly-owned general partners.

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

AP Professional Holdings, L.P., a Cayman Islands exempted limited partnership (*Holdings*), is the entity through which the Managing Partners and the Company's other partners (the *Contributing Partners*) indirectly own (through *Holdings*) Apollo Operating Group units (*AOG Units*) that represent 65.5% of the economic interests in the Apollo Operating Group as of March 31, 2012. The Company consolidates the financial results of the Apollo Operating Group and its consolidated subsidiaries. *Holdings'* ownership interest in the Apollo Operating Group is reflected as a Non-Controlling Interest in the accompanying condensed consolidated financial statements.

Apollo also entered into an exchange agreement with *Holdings* that allows the partners in *Holdings*, subject to the vesting and minimum retained ownership requirements and transfer restrictions set forth in the partnership agreements of the Apollo Operating Group, to exchange their AOG Units for the Company's Class A shares on a one-for-one basis up to four times each year, subject to customary conversion rate adjustments for splits, unit distributions and reclassifications. A limited partner must exchange one partnership unit in each of the ten Apollo Operating Group partnerships to effect an exchange for one Class A share.

Initial Public Offering On April 4, 2011, the Company completed the initial public offering (*IPO*) of its Class A shares, representing limited liability company interests of the Company. AGM received net proceeds from the initial public offering of approximately \$382.5 million, which was used to acquire additional AOG Units. As a result, *Holdings'* ownership interest in the Apollo Operating Group decreased from 70.7% to 66.5% and the Company's ownership interest increased from 29.3% to 33.5%. As such, the difference between the fair value of the consideration paid for the Apollo Operating Group level ownership interest and the book value on the date of the IPO is reflected in additional paid in capital.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation Apollo consolidates those entities it controls through a majority voting interest or through other means, including those funds in which the general partner is presumed to have control (e.g., AP Alternative Assets, L.P., a Guernsey limited partnership that, through AAA Investments L.P., its investment partnership, generally invests alongside certain of the Company's private equity funds and directly in certain of its capital markets funds and in other transactions that the Company sponsors and manages (*AAA*) and Apollo Credit Senior Loan Fund, L.P. (*Apollo Senior Loan Fund*). Apollo also consolidates entities that are VIEs for which Apollo is the primary beneficiary. Under the amended consolidation rules, an enterprise is determined to be the primary beneficiary if it holds a controlling financial interest. A controlling financial interest is defined as (a) the power to direct the activities of a VIE that most significantly impact the entity's business and (b) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE.

Certain of the Company's subsidiaries hold equity interests in and/or receive fees qualifying as variable interests from the funds that the Company manages. The amended consolidation rules require an analysis to determine whether (a) an entity in which Apollo holds a variable interest is a VIE and (b) Apollo's involvement, through holding interests directly or indirectly in the entity or contractually through other variable interests (e.g., carried interest and management fees), would give it a controlling financial interest. When the VIE has qualified for the deferral of the amended consolidation rules in accordance with U.S. GAAP, the analysis is based on previous consolidation rules, which require an analysis to determine whether (a) an entity in which Apollo holds a variable interest is a VIE and (b) Apollo's involvement, through holding interests directly or indirectly in the entity or contractually through other variable interests (e.g., carried interest and management fees), would be expected to absorb a majority of the variability of the entity.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Under both the previous and amended consolidation rules, the determination of whether an entity in which Apollo holds a variable interest is a VIE requires judgments which include determining whether the equity investment at risk is sufficient to permit the entity to finance its activities without additional subordinated financial support, evaluating whether the equity holders, as a group, can make decisions that have a significant effect on the success of the entity, determining whether two or more parties' equity interests should be aggregated, and determining whether the equity investors have proportionate voting rights to their obligations to absorb losses or rights to receive returns from an entity. Under both the previous and amended consolidation rules, Apollo determines whether it is the primary beneficiary of a VIE at the time it becomes involved with a VIE and reconsiders that conclusion continuously. The consolidation analysis can generally be performed qualitatively. However, if it is not readily apparent whether Apollo is the primary beneficiary, a quantitative expected losses and expected residual returns calculation will be performed. Investments and redemptions (either by Apollo, affiliates of Apollo or third parties) or amendments to the governing documents of the respective Apollo fund may affect an entity's status as a VIE or the determination of the primary beneficiary.

Apollo assesses whether it is the primary beneficiary and will consolidate or deconsolidate the entity accordingly. Performance of that assessment requires the exercise of judgment. Where the variable interests have qualified for the deferral, judgments are made in estimating cash flows in evaluating which member within the equity group absorbs a majority of the expected profits or losses of the VIE. Where the variable interests have not qualified for the deferral, judgments are made in determining whether a member in the equity group has a controlling financial interest including power to direct activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that are potentially significant to the VIE. Under both guidelines, judgment is made in evaluating the nature of the relationships and activities of the parties involved in determining which party within a related-party group is most closely associated with a VIE. The use of these judgments has a material impact to certain components of Apollo's condensed consolidated financial statements.

Assets and liability amounts of the consolidated VIEs are shown in separate sections within the condensed consolidated statements of financial condition as of March 31, 2012 and December 31, 2011.

Refer to additional disclosures regarding VIEs in note 4. Intercompany transactions and balances, if any, have been eliminated in the consolidation.

Equity Method Investments For investments in entities over which the Company exercises significant influence but which do not meet the requirements for consolidation, the Company uses the equity method of accounting, whereby the Company records its share of the underlying income or loss of such entities. Income (loss) from equity method investments is recognized as part of other income (loss) in the condensed consolidated statements of operations. The carrying amounts of equity method investments are reflected in investments in the condensed consolidated statements of financial condition. As the underlying entities that the Company manages and invests in are, for U.S. GAAP purposes, primarily investment companies which reflect their investments at estimated fair value, the carrying value of the Company's equity method investments in such entities are at fair value.

Non-Controlling Interest For entities that are consolidated, but not 100% owned, a portion of the income or loss and corresponding equity is allocated to owners other than Apollo. The aggregate of the income or loss and corresponding equity that is not owned by the Company is included in Non-Controlling Interest in the condensed consolidated financial statements. The Non-Controlling Interests relating to Apollo primarily includes the 65.5% ownership interest in the Apollo Operating Group held by the Managing Partners and Contributing Partners through their limited partner interests in Holdings and other ownership interests in consolidated entities, which primarily consist of the approximate 98% ownership interest held by limited partners in AAA as of March 31, 2012. Non-Controlling Interests also include limited partner interests of Apollo managed funds in certain consolidated VIEs.

Non-Controlling Interests are presented as a separate component of shareholders' equity on the Company's condensed consolidated statements of financial condition; net income (loss) includes the net

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

income (loss) attributed to the Non-Controlling Interest holders on the Company's condensed consolidated statements of operations; the primary components of Non-Controlling Interest are separately presented in the Company's condensed consolidated statements of changes in shareholders equity to clearly distinguish the interests in the Apollo Operating Group and other ownership interests in the consolidated entities; and profits and losses are allocated to Non-Controlling Interests in proportion to their ownership interests regardless of their basis.

Revenues Revenues are reported in three separate categories that include (i) advisory and transaction fees from affiliates, which relate to the investments of the funds and may include individual monitoring agreements with the portfolio companies and debt investment vehicles of the private equity funds and capital markets funds; (ii) management fees from affiliates, which are based on committed capital, invested capital, net asset value, gross assets or as otherwise defined in the respective agreements; and (iii) carried interest income (loss) from affiliates, which is normally based on the performance of the funds subject to preferred return.

Advisory and Transaction Fees from Affiliates Advisory and transaction fees, including directors' fees are recognized when the underlying services rendered are substantially completed in accordance with the terms of their transaction and advisory agreements. Additionally, during the normal course of business, the Company incurs certain costs related to private equity fund transactions that are not consummated (Broken Deal Costs). These costs (e.g. research costs, due diligence costs, professional fees, legal fees and other related items) are determined to be broken upon management's decision to no longer pursue the transaction. In accordance with the related fund agreement, in the event the deal is broken, all of the costs are reimbursed by the funds and then included in the calculation of the Management Fee Offset described below. If a deal is successfully completed, Apollo is reimbursed by the fund or fund's portfolio company of all costs incurred.

As a result of providing advisory services to certain private equity and capital markets portfolio companies, Apollo is generally entitled to receive fees for transactions related to the acquisition and disposition of portfolio companies as well as ongoing monitoring of portfolio company operations. The amounts due from portfolio companies are included in Due from Affiliates, which is discussed further in note 11. Under the terms of the limited partnership agreements for certain funds, the management fee payable by the funds may be subject to a reduction based on a certain percentage of such advisory and transaction fees, net of applicable broken deal costs (Management Fee Offset). Such amounts are presented as a reduction to Advisory and Transaction Fees from Affiliates in the condensed consolidated statements of operations.

Management Fees from Affiliates Management fees for private equity funds, real estate funds and certain capital markets funds are recognized in the period during which the related services are performed in accordance with the contractual terms of the related agreement, and are based upon (1) a percentage of the capital committed during the commitment period, and thereafter based on the remaining invested capital of unrealized investments, or (2) net asset value, gross assets or as otherwise defined in the respective agreements.

Carried Interest Income from Affiliates Apollo is entitled to an incentive return that can normally amount to as much as 20% of the total returns on funds' capital, depending upon performance. Performance-based fees are assessed as a percentage of the investment performance of the funds. The carried interest income from affiliates for any period is based upon an assumed liquidation of the fund's net assets on the reporting date, and distribution of the net proceeds in accordance with the fund's income allocation provisions. Carried interest receivable is presented separately in the condensed consolidated statements of financial condition. The carried interest income from affiliates may be subject to reversal to the extent that the carried interest income recorded exceeds the amount due to the general partner based on a fund's cumulative investment returns. When applicable, the accrual for potential repayment of previously received carried interest income, which is a component of due to affiliates, represents all amounts previously distributed to the general partner that would need to be repaid to the Apollo funds if these funds were to be liquidated based on the current fair value of the underlying funds' investments as of the reporting date. The actual general partner obligation, however, would not become payable or realized until the end of a fund's life.

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Investments, at Fair Value The Company follows U.S. GAAP attributable to fair value measurements, which among other things, requires enhanced disclosures about investments that are measured and reported at fair value. Investments, at fair value, represent investments of the consolidated funds, investments of the consolidated VIEs and certain financial instruments for which the fair value option was elected. The unrealized gains and losses resulting from changes in the fair value are reflected as net gains (losses) from investment activities and net gains (losses) from investment activities of the consolidated variable interest entities, respectively, in the condensed consolidated statements of operations. In accordance with U.S. GAAP, investments measured and reported at fair value are classified and disclosed in one of the following categories:

Level I Quoted prices are available in active markets for identical investments as of the reporting date. The type of investments included in Level I include listed equities and listed derivatives. As required by U.S. GAAP, the Company does not adjust the quoted price for these investments, even in situations where the Company holds a large position and the sale of such position would likely deviate from the quoted price.

Level II Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Investments that are generally included in this category include corporate bonds and loans, less liquid and restricted equity securities and certain over-the-counter derivatives where the fair value is based on observable inputs. These investments exhibit higher levels of liquid market observability as compared to Level III investments. The Company subjects broker quotes to various criteria in making the determination as to whether a particular investment would qualify for treatment as a Level II investment. These criteria include, but are not limited to, the number and quality of broker quotes, the standard deviation of obtained broker quotes, and the percentage deviation from independent pricing services.

Level III Pricing inputs are unobservable for the investment and includes situations where there is little observable market activity for the investment. The inputs into the determination of fair value may require significant management judgment or estimation. Investments that are included in this category generally include general and limited partnership interests in corporate private equity and real estate funds, mezzanine funds, funds of hedge funds, distressed debt and non-investment grade residual interests in securitizations and collateralized debt obligations where the fair value is based on observable inputs as well as unobservable inputs. When a security is valued based on broker quotes, the Company subjects those quotes to various criteria in making the determination as to whether a particular investment would qualify for treatment as a Level II or Level III investment. Some of the factors we consider include the number of broker quotes we obtain, the quality of the broker quotes, the standard deviations of the observed broker quotes and the corroboration of the broker quotes to independent pricing services.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment when the fair value is based on unobservable inputs.

In cases where an investment or financial instrument that is measured and reported at fair value is transferred into or out of Level III of the fair value hierarchy, the Company accounts for the transfer as of the end of the reporting period.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Private Equity Investments

The value of liquid investments, where the primary market is an exchange (whether foreign or domestic) is determined using period end market prices. Such prices are generally based on the last sales price on the date of determination.

Valuation approaches used to estimate the fair value of investments that are less liquid include the income approach and the market approach. The income approach provides an indication of fair value based on the present value of cash flows that a business or security is expected to generate in the future. The most widely used methodology used in the income approach is a discounted cash flow method. Inherent in the discounted cash flow method are assumptions of expected results and a calculated discount rate. The market approach provides an indication of fair value based on a comparison of the subject company to comparable publicly traded companies and transactions in the industry. The market approach is driven more by current market conditions, actual trading levels of similar companies and actual transaction data of similar companies. Consideration may also be given to such factors as the Company's historical and projected financial data, valuations given to comparable companies, the size and scope of the Company's operations, the Company's strengths, weaknesses, expectations relating to the market's receptivity to an offering of the Company's securities, applicable restrictions on transfer, industry information and assumptions, general economic and market conditions and other factors deemed relevant. As part of management's process, the Company utilizes a valuation committee to review and approve the valuations. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

On a quarterly basis, Apollo utilizes a valuation committee consisting of members from senior management to review and approve the valuation results related to our private equity investments. Management also retains independent valuation firms to provide third-party valuation consulting services to Apollo, which consist of certain limited procedures that management identifies and requests them to perform. The limited procedures provided by the independent valuation firms assist management with validating their valuation results or determining fair value. Management performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analysis.

Capital Markets Investments

The majority of the investments in Apollo's capital markets funds are valued using quoted market prices. Debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value utilizing recognized pricing services, market participants or other sources. The capital markets funds also enter into foreign currency exchange contracts, credit default swap contracts, and other derivative contracts, which may include options, caps, collars and floors. Foreign currency exchange contracts are marked-to-market by recognizing the difference between the contract exchange rate and the current market rate as unrealized appreciation or depreciation. If securities are held at the end of this period, the changes in value are recorded in income as unrealized. Realized gains or losses are recognized when contracts are settled. Credit default swap contracts are recorded at fair value as an asset or liability with changes in fair value recorded as unrealized appreciation or depreciation. Realized gains or losses are recognized at the termination of the contract based on the difference between the close-out price of the credit default contract and the original contract price.

Forward contracts are valued based on market rates obtained from counterparties or prices obtained from recognized financial data service providers. When determining fair value pricing when no market value exists, the value attributed to an investment is based on the enterprise value at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Valuation approaches used to estimate the fair value of illiquid investments included in Apollo's capital markets funds also may use the income approach or market approach. The valuation approaches used consider, as applicable, market risks, credit risks, counterparty risks and foreign currency risks.

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

On a quarterly basis, Apollo utilizes a sub-valuation committee consisting of members from senior management to review and approve the valuation results related to our capital markets investments. Management performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analysis.

Real Estate Investments For the CMBS portfolio of Apollo's funds, the estimated fair value is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the funds would receive in an actual trade for the applicable instrument. Loans that the funds plan to sell or liquidate in the near term will be treated as loans held-for-sale and will be held at the lower of cost or fair value. For the illiquid investments, valuations of non-marketable underlying investments are determined using methods that include, but are not limited to (i) discounted cash flow estimates or comparable analysis prepared internally, (ii) third party appraisals or valuations by qualified real estate appraisers, and (iii) contractual sales value of investments/properties subject to bona fide purchase contracts. Methods (i) and (ii) also incorporate consideration of the use of the income, cost, or sales comparison approaches of estimating property values.

On a quarterly basis, Apollo utilizes a sub-valuation committee consisting of members from senior management to review and approve the valuation results related to our real estate investments. Management performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analysis.

Fair Value of Financial Instruments

The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Except for the Company's debt obligation related to the AMH Credit Agreement (as defined in note 8), Apollo's financial instruments are recorded at fair value or at amounts whose carrying value approximates fair value. See Investments, at Fair Value above. While Apollo's valuations of portfolio investments are based on assumptions that Apollo believes are reasonable under the circumstances, the actual realized gains or losses will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may ultimately differ significantly from the assumptions on which the valuations were based. Other financial instruments carrying values generally approximate fair value because of the short-term nature of those instruments or variable interest rates related to the borrowings. As disclosed in note 8, the Company's long term debt obligation related to the AMH Credit Agreement is believed to have an estimated fair value of approximately \$784.6 million based on a yield analysis using available market data of comparable securities with similar terms and remaining maturities. However, the carrying value that is recorded on the condensed consolidated statements of financial condition is the amount for which we expect to settle the long term debt obligation. The Company has determined that the long term debt obligation related to the AMH Credit Agreement would be categorized as a Level III liability in the fair-value hierarchy.

Fair Value Option Apollo has elected the fair value option for the convertible notes issued by HFA and for the assets and liabilities of the consolidated VIEs. Such election is irrevocable and is applied to financial instruments on an individual basis at initial recognition. Apollo has elected to separately present interest income in the condensed consolidated statements of operations from other changes in the fair value of the convertible notes issued by HFA. Apollo has applied the fair value option for certain corporate loans, other investments and debt obligations held by these entities that otherwise would not have been carried at fair value. Refer to note 4 for further disclosure on financial instruments of the consolidated VIEs for which the fair value option has been elected.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Financial Instruments held by Consolidated VIEs

The consolidated VIEs hold investments that are traded over-the-counter. Investments in securities that are traded on a securities exchange or comparable over-the-counter quotation systems are valued based on the last reported sale price at that date. If no sales of such investments are reported on such date, and in the case of over-the-counter securities or other investments for which the last sale date is not available, valuations are based on independent market quotations obtained from market participants, recognized pricing services or other sources deemed relevant, and the prices are based on the average of the bid and ask prices, or at ascertainable prices at the close of business on such day. Market quotations are generally based on valuation pricing models or market transactions of similar securities adjusted for security-specific factors such as relative capital structure priority and interest and yield risks, among other factors.

The consolidated VIEs also have debt obligations that are recorded at fair value. The valuation approach used to estimate the fair values of debt obligations is the discounted cash flow method, which includes consideration of the cash flows of the debt obligation based on projected quarterly interest payments and quarterly amortization. Debt obligations are discounted based on the appropriate yield curve given the loan's respective maturity and credit rating. Management uses its discretion and judgment in considering and appraising relevant factors for determining the valuations of its debt obligations.

Compensation and Benefits

Equity-Based Compensation Equity-based compensation is measured based on the grant date fair value of the award. Equity-based awards that do not require future service (i.e., vested awards) are expensed immediately. Equity-based employee awards that require future service are expensed over the relevant service period. The Company estimates forfeitures for equity-based awards that are not expected to vest. Equity-based awards granted to non-employees for services provided to the affiliates are remeasured to fair value at the end of each reporting period and expensed over the relevant service period.

Salaries, Bonus and Benefits Salaries, bonus and benefits includes base salaries, discretionary and non-discretionary bonuses, severance and employee benefits. Bonuses are accrued over the service period.

From time to time, the Company may assign profits interests received in lieu of management fees to certain investment professionals. Such assignments of profits interests are treated as compensation and benefits when assigned.

The Company sponsors a 401(k) Savings Plan whereby U.S.-based employees are entitled to participate in the plan based upon satisfying certain eligibility requirements. The Company may provide discretionary contributions from time to time. No contributions relating to this plan were made by the Company for the three months ended March 31, 2012 and 2011, respectively.

Profit Sharing Expense Profit sharing expense consists of a portion of carried interest earned in one or more funds allocated to employees and former employees. Profit sharing expense is recognized as the related carried interest income is recognized. Profit sharing expense can be reversed during periods when there is a decline in carried interest income that was previously recognized. Additionally, profit sharing expenses paid may be subject to clawback from employees, former employees and the Contributing Partners.

In June 2011, the Company adopted a performance based incentive arrangement for certain Apollo partners and employees designed to more closely align compensation on an annual basis with the overall realized performance of the Company. This arrangement enables certain partners and employees to earn discretionary compensation based on carried interest realizations earned by the Company in a given year, which amounts are reflected in profit sharing expense in the accompanying condensed consolidated financial statements.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Incentive Fee Compensation Certain employees are entitled to receive a discretionary portion of incentive fee income from certain of our capital markets funds, based on performance for the year. Incentive fee compensation expense is recognized on an accrual basis as the related carried interest income is earned. Incentive fee compensation expense may be subject to reversal until the carried interest income crystallizes.

Other Income (Loss)

Net Gains (Losses) from Investment Activities Net gains (losses) from investment activities include both realized gains and losses and the change in unrealized gains and losses in the Company's investment portfolio between the opening balance sheet date and the closing balance sheet date. The condensed consolidated financial statements include the net realized and unrealized gains (losses) of AAA, Apollo Senior Loan Fund and the investment in HFA discussed in note 3.

Net Gains from Investment Activities of Consolidated Variable Interest Entities Changes in the fair value of the consolidated VIEs' assets and liabilities and related interest, dividend and other income and expenses subsequent to consolidation are presented within net gains (losses) from investment activities of consolidated variable interest entities and are attributable to Non-Controlling Interests in the condensed consolidated statements of operations.

Net Income (Loss) Per Class A Share U.S. GAAP requires use of the two-class method of computing earnings per share for all periods presented for each class of common stock and participating security as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for distributions declared on all classes of securities to arrive at undistributed earnings. During periods of net losses, the net loss is reduced for distributions declared on participating securities only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity.

The remaining earnings are allocated to common Class A Shares and participating securities to the extent that each security shares in earnings as if all of the earnings for the period had been distributed. Each total is then divided by the applicable number of shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes all outstanding common shares and all potential common shares assumed issued if they are dilutive. The numerator is adjusted for any changes in income or loss that would result from a hypothetical conversion of these potential common shares.

Use of Estimates The preparation of the condensed consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the condensed consolidated financial statements, the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Apollo's most significant estimates include goodwill, intangible assets, income taxes, carried interest income from affiliates, non-cash compensation and fair value of investments and debt in the consolidated and unconsolidated funds and VIEs. Actual results could differ materially from those estimates.

Recent Accounting Pronouncements

In April 2011, the FASB amended existing guidance for agreements to transfer financial assets that both entitle and obligate the transferor to repurchase or redeem the financial assets before their maturity. The amendments remove from the assessment of effective control the criterion requiring the transferor to have the ability to repurchase or redeem the financial assets on substantially the agreed terms, even in the event of default by the transferee and the collateral maintenance implementation guidance related to that criterion. The guidance is effective for the first interim or annual period beginning on or after December 15, 2011 and is to be applied prospectively. The adoption of this guidance did not have a material impact on the Company's condensed consolidated financial statements.

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

In May 2011, the FASB issued an update which includes amendments that result in common fair value measurement and disclosure requirements in U.S. GAAP and IFRSs. Consequently, the amendments change the wording used to describe many of the requirements in U.S. GAAP for measuring fair value and for disclosing information about fair value measurements. The guidance also requires enhanced disclosures about fair value measurements, including, among other things, (a) for fair value measurements categorized within Level III of the fair value hierarchy, (1) a quantitative disclosure of the unobservable inputs and assumptions used in the measurement, (2) the valuation process used by the reporting entity, and (3) a narrative description of the sensitivity of the fair value measurement to changes in unobservable inputs and the interrelationships between those unobservable inputs, if any, and (b) the categorization by level of the fair value hierarchy for items that are not measured at fair value in the statement of financial position but for which the fair value is required to be disclosed (for example, a financial instrument that is measured at amortized cost in the statement of financial position but for which fair value is disclosed). The guidance also amends disclosure requirements for significant transfers between Level I and Level II and now requires disclosure of all transfers between Levels I and II in the fair value hierarchy. The amended guidance is effective for interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material impact on the Company's condensed consolidated financial statements, as the impact of the guidance is primarily limited to enhanced disclosures.

In June 2011, the FASB issued an update which includes amendments that eliminate the option to present components of other comprehensive income (OCI) as part of the statement of changes in stockholders' equity and requires entities to report components of other comprehensive income in either (1) a single continuous statement of comprehensive income or (2) two separate but consecutive statements. In a single continuous statement, entities must include the components of net income, a total for net income, the components of OCI, a total for OCI, and a total for comprehensive income. Under the two separate but continuous statements approach, the first statement would include components of net income, consistent with the income statement format used today, and the second statement would include components of OCI. For public entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. In December 2011, the FASB issued an amendment to this update deferring changes related to the presentation of reclassification adjustments out of accumulated other comprehensive income. The adoption of this guidance did not have an impact on the Company's condensed consolidated financial statements as the Company presents separate condensed consolidated statements of comprehensive income.

In September 2011, the FASB issued an update which amends the guidance related to testing goodwill for impairment. Under the revised guidance, entities testing goodwill for impairment have the option to perform a qualitative assessment before calculating the fair value of the reporting unit (i.e., step 1 of the goodwill impairment test). If entities determine, on the basis of qualitative factors, that the fair value of the reporting unit is more likely than not to be less than the carrying amount, the two-step impairment test would be required. Otherwise, further testing would not be needed. The update does not amend the requirement to test goodwill for impairment between annual tests if events or circumstances warrant. The amendments are effective for all entities for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance is not expected to have an impact on the Company's condensed consolidated financial statements when the Company performs its annual goodwill impairment test in June, 2012.

In December 2011, the FASB issued amended guidance which will enhance disclosures required by U.S. GAAP by requiring improved information about financial instruments and derivative instruments that are either (1) offset or (2) subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they are offset. This information will enable users of an entity's financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position, including the effect or potential effect of rights of setoff associated with certain financial instruments and derivative instruments. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The Company is in the process of evaluating the impact that this guidance will have on its condensed consolidated financial statements.

3. INVESTMENTS

The following table represents Apollo's investments:

	March 31, 2012	December 31, 2011
Investments, at fair value	\$ 1,660,281	\$ 1,552,122
Other investments	346,727	305,343
Total Investments	\$ 2,007,008	\$ 1,857,465

Investments at Fair Value

Investments at fair value consist of financial instruments held by AAA, investments held by the Senior Loan Fund, the Company's investment in HFA, other investments held by the Company at fair value. As of March 31, 2012 and December 31, 2011, the net assets of the consolidated funds (excluding VIEs) were \$1,607.0 million and \$1,505.5 million, respectively. The following investments, except the investment in HFA and other investments, are presented as a percentage of net assets of the consolidated funds and VIEs:

Investments, at Fair Value	March 31, 2012					December 31, 2011				
	Fair Value		Total	Cost	% of Net Assets of Consolidated Funds	Fair Value		Total	Cost	% of Net Assets of Consolidated Funds

Securities

At March 31, 2012 and December 31, 2011, the sole investment held by AAA was its investment in AAA Investments, L.P. (AAA Investments), which is measured based on AAA's share of net asset value of AAA Investments. The following tables represent each investment of AAA Investments constituting more than five percent of the net assets of the funds that the Company consolidates (excluding VIEs) as of the aforementioned dates:

Momentive Performance Materials Holdings, Inc.	Equity	80,657	85,300	5.7

AAA Investments owns equity, as a private equity co-investment and converted from debt positions, through its investment in Autumnleaf, L.P. and Apollo Fund VI BC, L.P. in CEVA Logistics. AAA Investments' combined share of these debt and equity investments was valued at \$122.2 million and \$75.2 million as of March 31, 2012 and December 31, 2011, respectively. At March 31, 2012, AAA Investments' combined share of these debt and equity investments was greater than 5% of the net assets of the consolidated funds. Apollo Strategic Value Offshore Fund, Ltd. (the Apollo Strategic Value Fund) has an ownership interest in a special purpose vehicle, Apollo VIF/SVF Bradco LLC, which owns interests in Bradco Supply Corporation. AAA Investments' share of this investment is valued at \$94.4 million and \$80.9 million at March 31, 2012 and December 31, 2011, respectively. At March 31, 2012 and December 31, 2011, AAA Investments' combined share of these debt and equity investments was greater than 5% of the net assets of the consolidated funds. In addition to the AAA Investments' private equity co-investment in Momentive Performance Materials Holdings Inc. (Momentive) noted above, AAA Investments has an ownership interest in the debt of Momentive. AAA Investments' combined share of these debt and equity investments is greater than 5% of the net assets of the consolidated funds and is valued at \$85.9 million at December 31, 2011.

The Apollo Strategic Value Fund primarily invests in the securities of leveraged companies in North America and Europe through three core strategies: distressed investments, value-driven investments and special opportunities. In connection with the redemptions requested by AAA Investments of its investment in the Apollo Strategic Value Fund, the remainder of AAA Investments' investment in the Apollo Strategic Value Fund was converted into liquidating shares issued by the Apollo Strategic Value Fund. The liquidating shares were initially allocated a pro rata portion of each of the Apollo Strategic Value Fund's existing investments and liabilities, and as those investments are sold, AAA Investments is allocated the proceeds from such disposition less its proportionate share of any current expenses incurred by the Apollo Strategic Value Fund.

During the first quarter of 2012, the general partner of the Apollo Asia Opportunity Offshore Fund, Ltd. (the Apollo Asia Opportunity Fund) determined that it was in the best interests of the investors in the Apollo Asia Opportunity Fund to wind down the fund and begin making distributions to investors shortly after March 31, 2012. The General Partner of the Apollo Asia Opportunity Fund expects that a substantial amount of the investment in the Apollo Asia Opportunity Fund will be returned shortly after March 31, 2012. The remainder of the investment in the Apollo Asia Opportunity Fund is currently expected to be distributed as the less liquid investments are realized, with the final liquidation expected to occur in 2013, although the actual timing of the realizations may differ substantially from this estimate.

Apollo Life Re Ltd. is an Apollo-sponsored vehicle that owns the majority of the equity of Athene Holding Ltd. (Athene), the parent of Athene Life Re Ltd., a Bermuda-based reinsurance company focused on the life reinsurance sector, Athene Annuity & Life Assurance Company (formerly Liberty Life Insurance Company), a recently acquired Delaware-domiciled (formerly South Carolina domiciled) stock life insurance company focused on retail sales and reinsurance in the retirement services market, Investors Insurance Corporation, a recently acquired Delaware-domiciled stock life insurance company focused on the retirement services market and Athene Life Insurance Company, a recently organized Indiana-domiciled stock life insurance company focused on the institutional guaranteed investment contract backed note and funding agreement markets.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Senior Loan Fund

On December 31, 2011, the Company invested \$26.0 million in the Apollo Credit Senior Loan Fund, L.P. (Senior Loan Fund). As a result, the Company became the sole investor in the fund and therefore consolidated the assets and liabilities of the fund. The fund invests in U.S. denominated senior secured loans, senior secured bonds and other income generating fixed-income investments. At least 90% of the Senior Loan Fund's portfolio of investments must consist of senior secured, floating rate loans or cash or cash equivalents. Up to 10% of the Senior Loan Fund's portfolio may consist of non-first lien fixed income investments and other income generating fixed income investments, including but not limited to senior secured bonds. The Senior Loan Fund may not purchase assets rated (tranche rating) at B3 or lower by Moody's, or equivalent rating by another nationally recognized rating agency.

The Company has classified the instruments associated with the Senior Loan Fund investment as Level II and Level III investments. All Level II and Level III investments of the Senior Loan Fund were valued using broker quotes.

HFA

On March 7, 2011, the Company invested \$52.1 million (including expenses related to the purchase) in a convertible note with an aggregate principal amount of \$50.0 million and received 20,833,333 stock options issued by HFA, an Australian based specialist global funds management company.

The terms of the convertible note allow the Company to convert the note, in whole or in part, into common shares of HFA at an exchange rate equal to the principal plus accrued payment-in-kind interest (or PIK interest) divided by US\$0.98 at any time, and convey participation rights, on an as-converted basis, in any dividends declared in excess of \$6.0 million per annum, as well as seniority rights over HFA common equity holders. Unless previously converted, repurchased or cancelled, the note will be converted on the eighth anniversary of its issuance on March 11, 2019. Additionally, the note has a percentage coupon interest of 6% per annum, paid via principal capitalization (PIK interest) for the first four years, and thereafter either in cash or via principal capitalization at HFA's discretion. The PIK interest provides for the Company to receive additional common shares of HFA if the note is converted. The Company has elected the fair value option for the convertible note. The convertible note is valued using an if-converted basis, which is based on a hypothetical exit through conversion to common equity (for which quoted price exists) as of the valuation date. The Company separately presents interest income in the condensed consolidated statements of operations from other changes in the fair value of the convertible note. For the three months ended March 31, 2012, the Company recorded \$0.8 million in PIK interest income included in interest income in the condensed consolidated statements of operations. The terms of the stock options allow for the Company to acquire 20,833,333 fully paid ordinary shares of HFA at an exercise price in Australian Dollars (A\$) of A\$8.00 (exchange rate of A\$1.00 to \$1.03 as of March 31, 2012) per stock option. The stock options became exercisable upon issuance and expire on the eighth anniversary of the issuance date. The stock options are accounted for as a derivative and are valued at their fair value under U.S. GAAP at each balance sheet date. As a result, for the three months ended March 31, 2012 and 2011, the Company recorded an unrealized gain of approximately \$3.4 million and \$17.8 million, related to the convertible note and stock options within net gains from investment activities in the condensed consolidated statements of operations.

The Company has classified the instruments associated with the HFA investment as Level III investments.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Balances include other assets and liabilities of certain funds in which AAA Investments has invested. Other assets and liabilities at the fund level primarily include cash and cash equivalents, broker receivables and payables and amounts due to and from affiliates. Carrying values approximate fair value for other assets and liabilities, and accordingly, extended valuation procedures are not required.

- (2) Balances include other assets, liabilities and general partner interests of AAA Investments and are primarily comprised of \$402.5 million in long-term debt offset by cash and cash equivalents at the March 31, 2012 and December 31, 2011 balance sheet dates. Carrying values approximate fair value for other assets and liabilities and, accordingly, extended valuation procedures are not required.

The significant unobservable inputs used in the fair value measurement of the Level 3 investments are the comparable multiples and weighed average cost of capital rates applied in the valuation models for each investment. These inputs in isolation can cause significant increases or decreases in fair value. Specifically, the comparable multiples are generally multiplied by the underlying companies EBITDA to establish the Total Enterprise Value of our portfolio company investments. The comparable multiple is determined based on the implied trading multiple of public industry peers. Similarly, when a discounted cash flow model is used to determine fair value, the significant input used in the valuation model is the discount rate applied to present value the projected cash flows. An increase in the discount rate can significantly lower the fair value of an investment; conversely a decrease in the discount rate can significantly increase the fair value of an investment. The discount rate is determined based on the weighted average cost of capital calculation that weights the cost of equity and the cost of debt based on comparable debt to equity ratios.

4. VARIABLE INTEREST ENTITIES

The Company consolidates entities that are VIEs for which the Company has been designated as the primary beneficiary. The purpose of such VIEs is to provide strategy-specific investment opportunities for investors in exchange for management and performance based fees. The investment strategies of the entities that the Company manages may vary by entity, however, the fundamental risks of such entities have similar characteristics, including loss of invested capital and the return of carried interest income previously distributed to the Company by certain private equity and capital markets entities. The nature of the Company's involvement with VIEs includes direct and indirect investments and fee arrangements. The Company does not provide performance guarantees and has no other financial obligations to provide funding to VIEs other than its own capital commitments. There is no recourse to the Company for the consolidated VIEs' liabilities.

The assets and liabilities of the consolidated VIEs are comprised primarily of investments and debt, at fair value, and are included within assets and liabilities of consolidated variable interest entities, respectively, in the condensed consolidated statements of financial condition.

Consolidated Variable Interest Entities

In accordance with the methodology described in note 2, Apollo consolidated four VIEs under the amended consolidation guidance during 2010, an additional VIE during the second quarter of 2011, and six additional VIEs during the fourth quarter of 2011 in connection with its acquisition of Gulf Stream Asset Management, LLC ("Gulf Stream"). During the first quarter of 2012, Apollo consolidated two newly formed VIEs.

Certain of the consolidated VIEs were formed for the sole purpose of issuing collateralized notes to investors. The assets of these VIEs are primarily comprised of senior secured loans and the liabilities are primarily comprised of debt. Through its role as collateral manager of these VIEs, it was determined that Apollo had the power to direct the activities that most significantly impact the economic performance of these VIEs. Additionally, Apollo determined that the potential fees that it could receive directly and indirectly from these VIEs represent rights to returns that could potentially be significant to such VIEs. As a result, Apollo determined that it is the primary beneficiary and therefore should consolidate the VIEs.

One of the consolidated VIEs was formed to purchase loans and bonds in a leveraged structure for the benefit of its limited partners, which included certain Apollo funds that contributed equity to the consolidated VIE. Through its role as general partner of this VIE, it was determined that Apollo had the characteristics of the power to direct the activities that most significantly impact the VIE's economic performance. Additionally, the Apollo funds have involvement with the VIE that have the characteristics of the right to receive benefits from the VIE that could potentially be significant to the VIE. As a group, the Company and its related parties have the characteristics of a controlling financial interest. Apollo determined that it is the party within the related party group that is most closely associated with the VIE and therefore should consolidate it.

The assets of these consolidated VIEs are not available to creditors of the Company. In addition, the investors in these consolidated VIEs have no recourse against the assets of the Company. The Company has elected the fair value option for financial instruments held by its consolidated VIEs, which includes investments in loans and corporate bonds, as well as debt obligations held by such consolidated VIEs. Other assets include amounts due from brokers and interest receivables. Other liabilities include payables for securities purchased, which represent open trades within the consolidated VIEs and primarily relate to corporate loans that are expected to settle within the next sixty days.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Fair Value Measurements

The following table summarizes the valuation of Apollo's consolidated VIEs in fair value hierarchy levels as of March 31, 2012 and December 31, 2011:

	Level I		Level II		Level III		Totals	
	March 31, 2012	December 31, 2011						
Investments, at fair value	\$	\$	\$ 3,542,554	\$ 3,055,357	\$ 215,246	\$ 246,609	\$ 3,757,800	\$ 3,301,966

	Level I		Level II		Level III		Totals	
	March 31, 2012	December 31, 2011						
Liabilities, at fair value	\$	\$	\$	\$	\$ 3,700,536	\$ 3,189,837	\$ 3,700,536	\$ 3,189,837

Level III investments include corporate loan and corporate bond investments held by the consolidated VIEs, while the Level III liabilities consist of notes and loans, the valuations of which are discussed further in note 2. All Level II and III investments were valued using broker quotes. Transfers of investments out of Level III and into Level II or Level I, if any, are accounted for as of the end of the reporting period in which the transfer occurred. For the three months ended March 31, 2012 and 2011, there were no transfers between Level I and Level II investments.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

The following table summarizes the changes in investments of consolidated VIEs, which are measured at fair value and characterized as Level III investments:

	For the Three Months Ended March 31,	
	2012	2011
Balance, Beginning of Period	\$ 246,609	\$ 170,369
Purchases of investments	226,945	284,625
Sale of investments	(39,274)	(50,459)
Net realized (losses) gains	(4,658)	1,288
Changes in net unrealized gains	11,592	2,422
Transfers out of Level III	(290,517)	(296,382)
Transfers into Level III	64,549	23,564
Balance, End of Period	\$ 215,246	\$ 135,427
Changes in net unrealized gains included in Net (Losses) Gains from Investment Activities of consolidated VIEs related to investments still held at reporting date	\$ 6,236	\$ 760

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Investments were transferred out of Level III into Level II and into Level III out of Level II, respectively, as a result of subjecting the broker quotes on these investments to various criteria which include the number and quality of broker quotes, the standard deviation of obtained broker quotes, and the percentage deviation from independent pricing services.

Net (Losses) Gains from Investment Activities of Consolidated Variable Interest Entities

The following table presents net (losses) gains from investment activities of the consolidated VIEs for the three months ended March 31, 2012 and 2011, respectively:

	For the Three Months Ended March 31,	
	2012	2011
Net unrealized gains from investment activities	\$ 70,019	\$ 32,147
Net realized gains (losses) from investment activities	2,285	(15,044)
Net gains from investment activities	72,304	17,103
Net unrealized losses from debt	(88,578)	(49,944)
Net realized gains from debt		41,819
Net losses from debt	(88,578)	(8,125)
Interest and other income	45,631	14,761
Other expenses	(45,558)	(6,651)
Net (Losses) Gains from Investment Activities of Consolidated VIEs	\$ (16,201)	\$ 17,088

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Senior Secured Notes and Subordinated Notes Included within liabilities of consolidated VIEs debt, at fair value are amounts due to third-party institutions of the consolidated VIEs. The following table summarizes the principal provisions of the debt of the consolidated VIEs as of March 31, 2012 and December 31, 2011:

	March 31, 2012			December 31, 2011		
	Principal Outstanding	Weighted Average Interest Rate	Weighted Average Remaining Maturity in Years	Principal Outstanding	Weighted Average Interest Rate	Weighted Average Remaining Maturity in Years
Senior Secured Notes ⁽²⁾⁽³⁾	\$ 3,506,834	1.44%	8.9	\$ 3,121,126	1.35%	8.9
Subordinated Notes ⁽²⁾⁽³⁾	463,688	N/A ⁽¹⁾	8.8	416,275	N/A ⁽¹⁾	8.8
	\$ 3,970,522			\$ 3,537,401		

- (1) The subordinated notes do not have contractual interest rates but instead receive distributions from the excess cash flows of the VIEs.
- (2) The fair value of Senior Secured and Subordinated Notes as of March 31, 2012 and December 31, 2011 was \$3,701 million and \$3,190 million, respectively.
- (3) The debt at fair value of the consolidated VIEs is collateralized by assets of the consolidated VIEs and assets of one vehicle may not be used to satisfy the liabilities of another. As of March 31, 2012 and December 31, 2011, the fair value of the consolidated VIE assets was \$4,092 million and \$3,533 million, respectively. This collateral consisted of cash and cash equivalents, investments at fair value and other assets.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

As of March 31, 2012, the fair value of \$3,560 million of senior secured notes and subordinated notes were valued using broker quotes. The remaining fair value of \$141 million of subordinated notes was valued using a discounted cash flow model. The significant unobservable inputs used in the fair value measurement of the subordinated notes include the discount rate applied in the valuation models, default and recovery rates. These inputs in isolation can cause significant increases (decreases) in fair value. Specifically, when a discounted cash flow model is used to determine fair value, the significant input used in the valuation model is the discount rate applied to present value the projected cash flows. Increases in the discount rate can significantly lower the fair value of an investment; conversely decrease in the discount rate can significantly increase the fair value of an investment. The discount rate is determined based on the market rates an investor would expect for a similar investment with similar risks.

The following table provides quantitative measures used to determine the fair values of the Level III debt of the consolidated VIEs valued using discounted cash flow as of March 31, 2012:

		As of March 31, 2012		
	Fair Value	Valuation Technique	Unobservable Input	Range
Subordinated Notes	\$ 141,408	Discounted Cash Flow	Discount Rate	17.0% 17.0%
			Default Rate	1.5% 1.5%
			Recovery Rate	80.0% 80.0%

The consolidated VIEs have elected the fair value option to value the term loans and notes payable. The general partner uses its discretion and judgment in considering and appraising relevant factors in determining valuation of these loans. As of March 31, 2012, the notes payable are classified as Level III liabilities. Because of the inherent uncertainty in the valuation of the term loans and notes payable, which are not publicly traded, estimated values may differ significantly from the values that would have been reported had a ready market for such investments existed.

The consolidated VIEs' debt obligations contain various customary loan covenants as described above. As of the balance sheet date, the Company was not aware of any instances of noncompliance with any of these covenants.

Variable Interest Entities Which are Not Consolidated

The Company holds variable interests in certain VIEs which are not consolidated, as it has been determined that Apollo is not the primary beneficiary.

The following tables present the carrying amounts of the assets and liabilities of the VIEs for which Apollo has concluded that it holds a significant variable interest, but that it is not the primary beneficiary. In addition, the tables present the maximum exposure to loss relating to those VIEs.

		March 31, 2012	
	Total Assets	Total Liabilities	Apollo Exposure
Private Equity	\$ 14,293,325	\$ (31,022)	\$ 7,689
Capital Markets	3,155,272	(515,428)	14,872
Real Estate	2,122,756	(1,635,416)	5,831
Total	\$ 19,571,353 ⁽¹⁾	\$ (2,181,866) ⁽²⁾	\$ 28,392 ⁽³⁾

- (1) Consists of \$827,987 in cash, \$18,222,185 in investments and \$521,181 in receivables.
- (2) Represents \$2,167,487 in debt and other payables, \$9,607 in securities sold, not purchased, and \$4,772 in capital withdrawals payable.
- (3) Apollo's exposure is limited to its direct and indirect investments in those entities in which Apollo holds a significant variable interest.

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

		December 31, 2011	
	Total Assets	Total Liabilities	Apollo Exposure
Private Equity	\$ 11,879,948	\$ (146,374)	\$ 8,753
Capital Markets	3,274,288	(1,095,266)	11,305
Real Estate	2,216,870	(1,751,280)	
Total	\$ 17,371,106⁽¹⁾	\$ (2,992,920)⁽²⁾	\$ 20,058⁽³⁾

(1) Consists of \$383,017 in cash, \$16,507,142 in investments and \$480,947 in receivables.

(2) Represents \$2,874,394 in debt and other payables, \$86,102 in securities sold, not purchased, and \$32,424 in capital withdrawals payable.

(3) Apollo's exposure is limited to its direct and indirect investments in those entities in which Apollo holds a significant variable interest. At March 31, 2012, AAA Investments, the sole investment of AAA, invested in certain of the Company's unconsolidated VIEs, including LeverageSource, L.P. and AutumnLeaf, L.P. At March 31, 2012, the aggregate amount of such investments was \$169.2 million. The Company's ownership interest in AAA was 2.38% at March 31, 2012.

At December 31, 2011, AAA Investments, the sole investment of AAA, invested in certain of the Company's unconsolidated VIEs, including LeverageSource, L.P. and AutumnLeaf, L.P. At December 31, 2011, the aggregate amount of such investments was \$131.8 million. The Company's ownership interest in AAA was 2.45% at December 31, 2011.

5. CARRIED INTEREST RECEIVABLE

Carried interest receivable from private equity and capital markets funds consists of the following:

	March 31, 2012	December 31, 2011
Private equity	\$ 1,039,650	\$ 672,952
Capital markets	330,170	195,630
Total Carried Interest Receivable	\$ 1,369,820	\$ 868,582

The table below provides a roll-forward of the carried interest receivable balance for the three months ended March 31, 2012:

	Private Equity	Capital Markets	Real Estate	Total
Carried interest receivable, January 1, 2012	\$ 672,952	\$ 195,630	\$	\$ 868,582
Change in fair value of funds ⁽¹⁾	413,928	154,514	1,677	570,119
Foreign exchange gain		1,604		1,604
Fund cash distributions to the Company	(47,230)	(21,578)	(1,677)	(70,485)
Carried Interest Receivable, March 31, 2012⁽²⁾	\$ 1,039,650	\$ 330,170	\$	\$ 1,369,820

- (1) During the three months ended March 31, 2012, the Company recorded a reversal of \$34.1 million and \$18.1 million of a general partner obligation to return previously distributed carried interest income or fees relating to Fund VI and SOMA, respectively.
- (2) As of March 31, 2012, the Company had a general partner obligation of \$41.2 million relating to Fund VI. The general partner obligation is recognized based upon a hypothetical liquidation of the fund as of March 31, 2012. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund.

The timing of the payment of carried interest due to the general partner or investment manager varies depending on the terms of the applicable fund agreements. Generally, carried interest with respect to the private equity funds is payable and is distributed to the fund's general partner upon realization of an investment if the fund's cumulative returns are in excess of the preferred return. For most capital markets funds, carried interest is payable based on realizations after the end of the relevant fund's fiscal year or fiscal quarter, subject to high watermark provisions. There is currently no carried interest receivable associated with the Company's real estate segment.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

6. OTHER LIABILITIES

Other liabilities consist of the following:

	March 31, 2012	December 31, 2011
Deferred taxes	\$ 16,176	\$ 2,774
Deferred rent	15,675	14,798
Deferred payment related to acquisition	3,858	3,858
Unsettled trades and redemption payable	7,137	2,902
Interest rate swap agreements	2,027	3,843
Other	4,269	4,875
Total Other Liabilities	\$ 49,142	\$ 33,050

Interest Rate Swap Agreements The principal financial instruments used for cash flow hedging purposes are interest rate swaps. Apollo enters into interest rate swap agreements to manage its exposure to interest rate changes. The swaps effectively converted a portion of the Company's variable rate debt under the AMH Credit Agreement (discussed in note 8) to a fixed rate, without exchanging the notional principal amounts. Apollo entered into an interest rate swap agreement whereby Apollo receives floating rate payments in exchange for fixed rate payments based on 5.175%, on the notional amount of \$167.0 million, effectively converting a portion of its floating rate borrowings to a fixed rate. The interest rate swap expires in May 2012. Apollo has hedged only the risk related to changes in the benchmark interest rate (three month LIBOR). As of March 31, 2012 and December 31, 2011, the Company has recorded a liability of \$2.0 million and \$3.8 million, respectively, to recognize the fair value of this derivative.

The Company has determined that the valuation of the interest rate swaps fall within Level II of the fair value hierarchy. The Company estimates the fair value of its interest rate swaps using discounted cash flow models, which project future cash flows based on the instruments' contractual terms using market-based expectations for interest rates. The Company also includes a credit risk adjustment to the cash flow discount rate to incorporate the impact of non-performance risk in the recognized measure of the fair value of the swaps. This adjustment is based on the counterparty's credit risk when the swaps are in a net asset position and on the Company's own credit risk when the swaps are in a net liability position.

7. INCOME TAXES

The Company is treated as a partnership for tax purposes and is therefore not subject to U.S. Federal and state income taxes; however, APO Corp., a wholly-owned subsidiary of the Company, is subject to U.S. Federal corporate income taxes. In addition, certain subsidiaries of the Company are subject to New York City Unincorporated Business Tax (NYC UBT) attributable to the Company's operations apportioned to New York City and certain non-U.S. subsidiaries of the Company are subject to income taxes in their local jurisdictions. APO Corp. is required to file a standalone Federal corporate tax return, as well as filing standalone corporate state and local tax returns in California, New York and New York City. The Company's provision for income taxes is accounted in accordance with U.S. GAAP.

The Company's provision for income taxes totaled \$14.6 million and \$8.8 million for the three months ended March 31, 2012 and 2011, respectively. The Company's effective tax rate was approximately 3.27% and 3.39% for the three months ended March 31, 2012 and 2011, respectively.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Based upon the Company's review of its federal, state, local and foreign income tax returns and tax filing positions, the Company determined no unrecognized tax benefits for uncertain tax positions were required to be recorded. In addition, the Company does not believe that it has any tax positions for which it is reasonably possible that it will be required to record significant amounts of unrecognized tax benefits within the next twelve months.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

The Company files its tax returns as prescribed by the tax laws of the jurisdictions in which it operates. In the normal course of business, the Company is subject to examination by federal and certain state, local and foreign tax authorities. With a few exceptions, as of March 31, 2012, Apollo and its predecessor entities' U.S. federal, state, local and foreign income tax returns for the years 2008 through 2011 are open under the normal statute of limitations and therefore subject to examination.

8. DEBT

Debt consists of the following:

	March 31, 2012		December 31, 2011	
	Outstanding Balance	Annualized Weighted Average Interest Rate	Outstanding Balance	Annualized Weighted Average Interest Rate
AMH Credit Agreement	\$ 728,273	6.06% ⁽¹⁾	\$ 728,273	5.39% ⁽¹⁾
CIT secured loan agreement	10,018	3.61%	10,243	3.39%
Total Debt	\$ 738,291	6.02%	\$ 738,516	5.35%

(1) Includes the effect of interest rate swaps.

AMH Credit Agreement On April 20, 2007, Apollo Management Holdings, L.P. (AMH), a subsidiary of the Company which is a Delaware limited partnership owned by APO Corp. and Holdings, entered into a \$1.0 billion seven year credit agreement (the AMH Credit Agreement). Interest payable under the AMH Credit Agreement may from time to time be based on Eurodollar (LIBOR) or Alternate Base Rate (ABR) as determined by the borrower. Through the use of interest rate swaps, AMH has irrevocably elected three-month LIBOR for \$167 million of the debt for five years from the closing date of the AMH Credit Agreement, which expires in May 2012. The remaining amount of the debt is computed currently based on three-month LIBOR. The interest rate of the Eurodollar loan, which was amended as discussed below, is the daily Eurodollar rate plus the applicable margin rate (4.25% for loans with extended maturity, as discussed below, and 1.50% for loans without the extended maturity as of March 31, 2012 and 3.75% for loans with extended maturity and 1.00% for loans without the extended maturity as of December 31, 2011). The interest rate on the ABR term loan, which was amended as discussed below, for any day, will be the greatest of (a) the prime rate in effect on such day, (b) the Federal Funds Rate in effect on such day plus 0.5% and (c) the one-month Eurodollar Rate plus 1.00%, in each case plus the applicable margin. The AMH Credit Agreement originally had a maturity date of April 2014.

On December 20, 2010, Apollo amended the AMH Credit Agreement to extend the maturity date of \$995.0 million (including the \$90.9 million of fair value debt repurchased by the Company) of the term loans from April 20, 2014 to January 3, 2017 and modified certain other terms of the credit facility. Pursuant to this amendment, AMH or an affiliate was required to purchase from each lender that elected to extend the maturity date of its term loan a portion of such extended term loan equal to 20% thereof. In addition, AMH or an affiliate is required to repurchase at least \$50.0 million aggregate principal amount of term loans by December 31, 2014 and at least \$100.0 million aggregate principal amount of term loans (inclusive of the previously purchased \$50.0 million) by December 31, 2015 at a price equal to par plus accrued interest. The sweep leverage ratio was also extended to end at the new loan term maturity date. The interest rate for the highest applicable margin for the loan portion extended changed to LIBOR plus 4.25% and ABR plus 3.25%. On December 20, 2010, an affiliate of AMH that is a guarantor under the AMH Credit Agreement repurchased approximately \$180.8 million of term loans in connection with the extension of the maturity date of such loans and thus the AMH Credit Agreement (excluding the portions held by AMH affiliates) had a remaining balance of \$728.3 million. The Company determined that the amendments to the AMH Credit Agreement resulted in a debt extinguishment which did not result in any gain or loss.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

The interest rate on the \$723.3 million, net (\$995.0 million portion less amount repurchased by the Company) of the loan at March 31, 2012 was 4.75% and the interest rate on the remaining \$5.0 million

-35-

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

portion of the loan at March 31, 2012 was 2.00%. The estimated fair value of the Company's long-term debt obligation related to the AMH Credit Agreement is believed to be approximately \$784.6 million based on a yield analysis using available market data of comparable securities with similar terms and remaining maturities. The \$728.3 million carrying value of debt that is recorded on the condensed consolidated statements of financial condition at March 31, 2012 is the amount for which the Company expects to settle the AMH Credit Agreement.

As of March 31, 2012 and December 31, 2011, the AMH Credit Agreement was guaranteed by, and collateralized by, substantially all of the assets of Apollo Principal Holdings II, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings IX, L.P. and AMH, as well as cash proceeds from the sale of assets or similar recovery events and any cash deposited pursuant to the excess cash flow covenant, which will be deposited as cash collateral to the extent necessary as set forth in the AMH Credit Agreement. As of March 31, 2012, the consolidated net assets (deficit) of Apollo Principal Holdings II, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings IX, L.P. and AMH and their respective subsidiaries were \$103.8 million, \$65.8 million, \$53.4 million, \$172.4 million and \$(987.4) million, respectively. As of December 31, 2011, the consolidated net assets (deficit) of Apollo Principal Holdings II, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings IX, L.P. and AMH and their respective subsidiaries were \$56.6 million, \$46.2 million, \$50.1 million, \$131.9 million and \$(1,014.3) million, respectively.

In accordance with the AMH Credit Agreement as of March 31, 2012, Apollo Principal Holdings II, L.P., Apollo Principal Holdings IV, L.P., Apollo Principal Holdings V, L.P., Apollo Principal Holdings IX, L.P. and AMH and their respective subsidiaries were subject to certain negative and affirmative covenants. Among other things, the AMH Credit Agreement includes an excess cash flow covenant and an asset sales covenant. The AMH Credit Agreement does not contain any financial maintenance covenants.

If AMH's debt to EBITDA ratio (the Leverage Ratio) as of the end of any fiscal year exceeds the level set forth in the next sentence (the Excess Sweep Leverage Ratio), AMH must deposit in the cash collateral account the lesser of (a) 100% of its Excess Cash Flow (as defined in the AMH Credit Agreement) and (b) the amount necessary to reduce the Leverage Ratio on a pro forma basis as of the end of such fiscal year to 0.25 to 1.00 below the Excess Sweep Leverage Ratio. The Excess Sweep Leverage Ratio is: for 2012, 4.00 to 1.00; for 2013, 4.00 to 1.00; for 2014, 3.75 to 1.00; for 2015, 3.50 to 1.00; and thereafter, 3.50 to 1.00.

In addition, AMH must deposit the lesser of (a) 50% of any remaining Excess Cash Flow and (b) the amount required to reduce the Leverage Ratio on a pro forma basis at the end of each fiscal year to a level 0.25 to 1.00 below the Sweep Leverage Ratio (as defined in the next paragraph) for such fiscal year.

If AMH receives net cash proceeds from certain non-ordinary course asset sales, then such net cash proceeds shall be deposited in the cash collateral account as necessary to reduce its Leverage Ratio on a pro forma basis as of the last day of the most recently completed fiscal quarter (after giving effect to such non-ordinary course asset sale and such deposit) to (the following specified levels for the specified years, the Sweep Leverage Ratio) (i) for 2012 and 2013, a Leverage Ratio of 3.50 to 1.00, (ii) for 2014, a Leverage Ratio of 3.25 to 1.00, (iii) for all other years, a Leverage Ratio of 3.00 to 1.00.

The AMH Credit Agreement contains customary events of default, including events of default arising from non-payment, material misrepresentations, breaches of covenants, cross default to material indebtedness, bankruptcy and changes in control of AMH. As of March 31, 2012, the Company was not aware of any instances of non-compliance with the AMH Credit Agreement.

CIT Secured Loan Agreement During the second quarter of 2008, the Company entered into four secured loan agreements totaling \$26.9 million with CIT Group/Equipment Financing Inc. (CIT) to finance the purchase of certain fixed assets. The loans bear interest at LIBOR plus 318 basis points per annum with interest and principal to be repaid monthly and a balloon payment of the remaining principal

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

totaling \$9.4 million due at the end of the terms in April 2013. At March 31, 2012, the interest rate was 3.42%. On April 28, 2011, the Company sold its ownership interest in certain assets which served as collateral to the CIT secured loan agreement for \$11.3 million with \$11.1 million of the proceeds going to CIT directly. As a result of the sale and an additional payment made by the Company of \$1.1 million, the Company satisfied the loan associated with the related asset of \$12.2 million on April 28, 2011. As of March 31, 2012, the carrying value of the remaining CIT secured loan is \$10.0 million.

Apollo has determined that the carrying value of this debt approximates fair value as the loans are primarily variable rate in nature and would be categorized as a Level III liability in the fair value hierarchy.

9. NET INCOME PER CLASS A SHARE

U.S. GAAP requires use of the two-class method of computing earnings per share for all periods presented for each class of common stock and participating security as if all earnings for the period had been distributed. Under the two-class method, during periods of net income, the net income is first reduced for distributions declared on all classes of securities to arrive at undistributed earnings. During periods of net losses, the net loss is reduced for distributions declared on participating securities only if the security has the right to participate in the earnings of the entity and an objectively determinable contractual obligation to share in net losses of the entity.

The remaining earnings are allocated to common Class A Shares and participating securities to the extent that each security shares in earnings as if all of the earnings for the period had been distributed. Each total is then divided by the applicable number of shares to arrive at basic earnings per share. For the diluted earnings, the denominator includes all outstanding common shares and all potential common shares assumed issued if they are dilutive. The numerator is adjusted for any changes in income or loss that would result from the assumed conversion of these potential common shares.

The table below presents basic and diluted net income per Class A share using the two-class method for the three months ended March 31, 2012 and 2011:

	Basic and Diluted	
	For the Three Months Ended	
	March 31,	
	2012	2011
Numerator:		
Net income attributable to Apollo Global Management, LLC	\$ 98,043	\$ 38,156
Distributions declared on Class A shares	(58,080) ⁽¹⁾	(16,647) ⁽²⁾
Distributions on participating securities	(10,306)	(3,258)
Earnings allocable to participating securities	(4,749)	(3,007)
Undistributed Income Attributable to Class A Shareholders	\$ 24,908	\$ 15,244
Denominator:		
Weighted average number of Class A shares outstanding	125,269,253	98,215,736
Net income per Class A share: Basic and Diluted⁽³⁾		
Distributable Earnings	\$ 0.46	\$ 0.17
Undistributed income	0.20	0.16

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Net Income per Class A Share	\$	0.66	\$	0.33
------------------------------	----	------	----	------

- (1) The Company declared a \$0.46 distribution on Class A shares on February 12, 2012.
- (2) The Company declared a \$0.17 distribution on Class A shares on January 4, 2011.
- (3) For the three months ended March 31, 2012, share options and unvested RSUs were determined to be dilutive, and were accordingly included in the diluted earnings per share calculation. The resulting diluted earnings per share amount was not significantly different from basic earnings per share and therefore, was presented as the same amount. The AOG Units were determined to be anti-dilutive for the three months ended March 31, 2012. For the three months ended March 31, 2011, unvested RSUs were determined to be dilutive, and were accordingly included in the diluted earnings per share calculation. The

-37-

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

resulting diluted earnings per share amount was not significantly different from basic earnings per share and therefore, was presented as the same amount. The AOG Units and share options were determined to be anti-dilutive for the three months ended March 31, 2011. On October 24, 2007, the Company commenced the granting of restricted share units (RSUs) that provide the right to receive, upon vesting, Class A shares of Apollo Global Management, LLC, pursuant to the Company's 2007 Omnibus Equity Incentive Plan. Certain RSU grants to employees during 2010 and 2011 provide the right to receive distribution equivalents on vested RSUs on an equal basis any time a distribution is declared. The Company refers to these RSU grants as Plan Grants. For certain Plan Grants made before 2010, distribution equivalents are paid in January of the calendar year next following the calendar year in which a distribution on Class A shares was declared. In addition, certain RSU grants to employees in 2010 and 2011 (the Company refers to these as Bonus Grants) provide that both vested and unvested RSUs participate in distribution equivalents on an equal basis with the Class A shareholders any time a distribution is declared. As of March 31, 2012, approximately 18.7 million vested RSUs and 5.3 million unvested RSUs were eligible for participation in distribution equivalents.

Any distribution equivalent paid to an employee will not be returned to the Company upon forfeiture of the award by the employee. Vested and unvested RSUs that are entitled to non-forfeitable distribution equivalents qualify as participating securities and are included in the Company's basic and diluted earnings per share computations using the two-class method. The holder of an RSU participating security would have a contractual obligation to share in the losses of the entity if the holder is obligated to fund the losses of the issuing entity or if the contractual principal or mandatory redemption amount of the participating security is reduced as a result of losses incurred by the issuing entity. Because the RSU participating securities do not have a mandatory redemption amount and the holders of the participating securities are not obligated to fund losses, neither the vested RSUs nor the unvested RSUs are subject to any contractual obligation to share in losses of the Company.

Holders of AOG Units are subject to the vesting requirements and transfer restrictions set forth in the agreements with the respective holders, and may up to four times each year (subject to the terms of the exchange agreement) exchange their AOG Units for Class A shares on a one-for-one basis. A limited partner must exchange one partnership unit in each of the eight Apollo Operating Group partnerships to effect an exchange for one Class A share. If fully converted, the result would be an additional 240,000,000 Class A shares added to the diluted earnings per share calculation.

Apollo has one Class B share outstanding, which is held by Holdings. The voting power of the Class B share is reduced on a one vote per one AOG Unit basis in the event of an exchange of AOG Units for Class A shares, as discussed above. The Class B share has no net income (loss) per share as it does not participate in Apollo's earnings (losses) or distributions. The Class B share has no distribution or liquidation rights. The Class B share has voting rights on a pari passu basis with the Class A shares. The Class B share currently has a super voting power of 240,000,000 votes.

(1) Transaction did not have a material impact on ownership.

10. EQUITY-BASED COMPENSATION

AOG Units

The fair value of the AOG Units of approximately \$5.6 billion is charged to compensation expense on a straight-line basis over the five or six year service period, as applicable. For the three months ended March 31, 2012 and 2011, \$116.2 million and \$258.2 million of compensation expense was recognized, respectively. The estimated forfeiture rate was 3% for Contributing Partners and 0% for Managing Partners based on actual forfeitures as well as the Company's future forfeiture expectations. As of March 31, 2012, there was \$391.8 million of total unrecognized compensation cost related to unvested AOG Units that are expected to vest over the next 15 months.

The following table summarizes the activity of the AOG Units for the three months ended March 31, 2012:

	Apollo Operating Group Units	Weighted Average Grant Date Fair Value
Balance at January 1, 2012	22,593,210	\$ 22.64
Granted		
Forfeited		

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Vested at March 31, 2012	(5,063,556)		22.94
Balance at March 31, 2012	17,529,654	\$	22.55

Units Expected to Vest As of March 31, 2012, approximately 17,400,000 AOG Units are expected to vest.

RSUs

On October 24, 2007, the Company commenced the granting of RSUs under the Company's 2007 Omnibus Equity Incentive Plan. These grants are accounted for as a grant of equity awards in accordance with U.S. GAAP. All grants after March 29, 2011 consider the public share price of the Company. For Plan Grants the fair value is based on grant date fair value, and are discounted for transfer restrictions and lack of distributions until vested. For Bonus Grants, the valuation methods consider transfer restrictions and timing of distributions. The total fair value is charged to compensation expense on a straight-line basis over the vesting period, which is generally up to 24 quarters (for Plan Grants) or annual vesting over three years (for Bonus Grants). There were no RSUs granted during the quarter ended March 31, 2012. The actual

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

forfeiture rate was 1.3% and 0.6% for the three months ended March 31, 2012 and 2011, respectively. For the three months ended March 31, 2012 and 2011, \$31.0 million and \$23.8 million of compensation expense were recognized, respectively.

Delivery of Class A Shares

During the first quarter of 2012 and 2011, the Company delivered Class A Shares for vested RSUs. The Company allows RSU participants to settle their tax liabilities with a reduction of their Class A share delivery from the originally granted and vested RSUs. The amount, when agreed to by the participant, results in a tax liability and a corresponding accumulated deficit adjustment. The adjustment was \$17.0 million and \$9.0 million in the first quarter in 2012 and 2011, respectively, and is disclosed in the condensed consolidated statements of changes in shareholders equity.

The delivery of RSUs does not cause a transfer of amounts in the condensed consolidated statements of changes in shareholders equity to the Class A Shareholders. The delivery of Class A Shares for vested RSUs causes the income allocated to the Non-Controlling Interests to shift to the Class A shareholders from the date of delivery forward. During the three months ended March 31, 2012, the Company delivered 2,337,853 million Class A Shares in settlement of vested RSUs, which caused the Company's ownership interest in the Apollo Operating Group to increase to 34.5% from 34.1%.

The following table summarizes RSU activity for the three months ended March 31, 2012:

	Unvested	Weighted Average Grant Date Fair Value	Vested	Total Number of RSUs Outstanding
Balance at January 1, 2012	20,480,773	\$ 11.38	20,240,008	40,720,781
Granted				
Forfeited	(263,907)	11.55		(263,907)
Delivered		11.17	(3,466,843)	(3,466,843)
Vested	(1,961,145)	11.67	1,961,145	
Balance at March 31, 2012	18,255,721	\$ 11.35	18,734,310	36,990,031 ⁽¹⁾

(1) Amount excludes RSUs which have vested and have been issued in the form of Class A shares.

Units Expected to Vest As of March 31, 2012, approximately 17,200,000 RSUs are expected to vest.

Share Options

Under the Company's 2007 Omnibus Equity Incentive Plan, 5,000,000 options were granted on December 2, 2010. These options vested and became exercisable with respect to 4/24 of the option shares on December 31, 2011 and the remainder vest in equal installments over each of the remaining 20 quarters with full vesting on December 31, 2016. In addition, 555,556 options were granted on January 22, 2011 and 25,000 options were granted on April 9, 2011. Of the options granted on January 22, 2011, half of such options that vested and became exercisable on December 31, 2011 were exercised on March 5, 2012 and the other half that were due to vest and become exercisable on December 31, 2012 were forfeited during the quarter ended March 31, 2012. The options granted on April 9, 2011 vested and became exercisable with respect to half of the options shares on December 31, 2011 and the other half vests in four equal quarterly installments starting on March 31, 2012 and

Edgar Filing: Apollo Global Management LLC - Form 10-Q

ending on December 31, 2012. For the three months ended March 31, 2012 and 2011, \$1.2 million and \$1.3 million of compensation expense were recognized as a result of option grants, respectively.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Apollo measures the fair value of each option award on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions used for options awarded during 2011:

Assumptions:	2011⁽²⁾
Risk-free interest rate	2.79%
Weighted average expected dividend yield	2.25%
Expected volatility factor ⁽¹⁾	40.22%
Expected life in years	5.72
Fair value of options per share	\$ 8.44

(1) The Company determined its expected volatility based on comparable companies using daily stock prices.

(2) Represents weighted average of 2011 grants.

The following table summarizes the share option activity for the three months ended March 31, 2012:

	Options Outstanding	Weighted Average Exercise Price	Aggregate Fair Value	Weighted Average Remaining Contractual Term
Balance at January 1, 2012	5,580,556	\$ 8.14	\$ 32,996	\$ 8.93
Granted				
Exercised	(277,778)	9.00	(2,364)	
Forfeited	(277,778)	9.00	(2,364)	
Balance at March 31, 2012	5,025,000	8.05	\$ 28,268	8.67
Exercisable at March 31, 2012	1,057,291	\$ 8.15	\$ 5,959	\$ 8.67

Units Expected to Vest As of March 31, 2012, approximately 3,700,000 options are expected to vest.

The expected life of the options granted represents the period of time that options are expected to be outstanding and is based on the contractual term of the option. Unamortized compensation cost related to unvested share options at March 31, 2012 was \$21.0 million and is expected to be recognized over a weighted average period of 4.7 years.

AAA RDUs

Incentive units that provide the right to receive AAA restricted depository units (RDUs) following vesting are granted periodically to employees of Apollo. These grants are accounted for as equity awards in accordance with U.S. GAAP. The incentive units granted to employees generally vest over three years. In contrast, the Company's Managing Partners and Contributing Partners have received distributions of fully-vested AAA RDUs. The fair value at the date of the grants is recognized on a straight-line basis over the vesting period (or upon grant in the case of fully vested AAA RDUs). The grant date fair value considers the public share price of AAA. Vested AAA RDUs can be converted into ordinary common units of AAA subject to applicable securities law restrictions. During the three months ended March 31, 2012 and 2011, the actual

Edgar Filing: Apollo Global Management LLC - Form 10-Q

forfeiture rate was 0%. For the three months ended March 31, 2012 and 2011, \$0.1 million and \$0.1 million of compensation expense was recognized, respectively.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

During the three months ended March 31, 2012 and 2011, the Company delivered 60,702 and 389,785 RDUs, respectively, to individuals who had vested in these units. The deliveries in 2012 and 2011 resulted in a reduction of the accrued compensation liability of \$0.5 million and \$3.8 million, respectively, and the recognition of a net decrease of additional paid in capital in 2012 of \$1.3 million and a net decrease in 2011 of \$2.7 million, respectively. These amounts are presented in the condensed consolidated statements of changes in shareholders' equity. There was \$0.1 million and \$0.5 million of liability for undelivered RDUs included in accrued compensation and benefits in the condensed consolidated statements of financial condition as of March 31, 2012 and December 31, 2011, respectively. The following table summarizes RDU activity for the three months ended March 31, 2012:

	Unvested	Weighted Average Grant Date Fair Value	Vested	Total Number of RDUs Outstanding
Balance at January 1, 2012	196,653	\$ 8.17	60,702	257,355
Granted	256,673	9.45		256,673
Forfeited				
Delivered		8.69	(60,702)	(60,702)
Vested				
Balance at March 31, 2012	453,326	\$ 8.89		453,326

Units Expected to Vest As of March 31, 2012, approximately 426,000 RDUs are expected to vest.

The following table summarizes the activity of RDUs available for future grants:

	RDUs Available For Future Grants
Balance at January 1, 2012	1,947,837
Purchases	16,335
Granted	(387,617) ⁽¹⁾
Forfeited	
Balance at March 31, 2012	1,576,555

- (1) On March 7, 2012, the Company issued and delivered 130,944 RDUs to certain employees as part of AAA's carry reinvestment program. This resulted in a decrease in profit sharing payable of \$0.6 million in the condensed consolidated statements of financial condition. No additional compensation expense was recognized.

Restricted Stock and Restricted Stock Unit Awards ARI

Edgar Filing: Apollo Global Management LLC - Form 10-Q

On September 29, 2009, 97,500 and 145,000 shares of ARI restricted stock were granted to the Company and certain of the Company's employees, respectively. Additionally, on December 31, 2009, 5,000 shares of ARI restricted stock were granted to an employee of the Company. The fair value of the Company and employee awards granted was \$1.8 million and \$2.7 million, respectively. These awards generally vest over three years or twelve quarters, with the first quarter vesting on January 1, 2010. On March 23, 2010, July 1, 2010 and July 21, 2010, 102,084, 5,000 and 16,875 shares of ARI restricted stock units (ARI RSUs), respectively, were granted to certain of the Company's employees. Pursuant to the March 23, 2010 and July 21, 2010 issuances, 102,084 and 16,875 shares of ARI restricted stock, respectively, were forfeited by the Company's employees. As the fair value of ARI RSUs was not greater than the forfeiture of the restricted stock, no additional value will be amortized. On April 1, 2011 and August 4, 2011, 5,000 and 152,750 ARI RSUs, respectively, were granted to certain of the Company's employees. On August 4, 2011, 156,000 ARI RSUs were granted to the Company. On December 28, 2011, the Company issued 45,587 ARI RSUs to certain of the Company's employees. On March 15, 2012, 20,000 ARI RSUs were granted to an employee of the Company. The awards granted to the Company are accounted for as investments and deferred revenue in the condensed consolidated statements of financial condition. As these awards vest, the deferred revenue is recognized as management fees. The investment is accounted for using the equity method of accounting for awards granted to the Company and as a deferred compensation asset for the awards granted to employees. Compensation expense will be recognized on a straight line-basis over the vesting period for the awards granted to the employees. The Company recorded an asset and a liability upon receiving the awards on behalf of the Company's employees. The fair value of the awards to employees is based on the grant date fair value, which utilizes the public share price of ARI, less discounts for certain restrictions. The awards granted to the Company's employees are remeasured each period to reflect the fair value of the asset and liability and any changes in these values are recorded in

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

the condensed consolidated statements of operations. For the three months ended March 31, 2012 and 2011, \$0.5 million and \$0.3 million of management fees and \$0.4 million and \$0.2 million of compensation expense were recognized in the condensed consolidated statements of operations, respectively. The actual forfeiture rate for unvested ARI restricted stock awards and ARI RSUs was 1% and 0% for the three months ended March 31, 2012 and 2011, respectively.

The following table summarizes activity for the ARI restricted stock awards and ARI RSUs that were granted to both the Company and certain of its employees for the three months ended March 31, 2012:

	ARI Restricted Stock Unvested	ARI RSUs Unvested	Weighted Average Grant Date Fair Value	ARI RSUs Vested	Total Number of RSUs Outstanding
Balance at January 1, 2012	32,502	374,754	\$ 15.12	73,542	448,296

Vested awards of the employees of the Company		(52,585)	15.31	52,585	
Vested awards of the Company	(8,125)	(52,000)	15.34	52,000	
Balance at March 31, 2012	24,377	284,647	\$ 15.07	178,127	462,774

Units Expected to Vest As of March 31, 2012, approximately 274,000 and 24,377 shares of ARI RSUs and ARI restricted stock, respectively, are expected to vest.

Restricted Stock Unit Awards Apollo Residential Mortgage, Inc. (AMTG)

On July 27, 2011, 18,750 and 11,250 AMTG restricted stock units (AMTG RSUs) were granted to the Company and certain of the Company's employees, respectively. On September 26, 2011, 875 AMTG RSUs were granted to certain employees of the Company. The fair value of the Company and employee awards granted was \$0.3 million and \$0.2 million, respectively. These awards generally vest over three years or twelve calendar quarters, with the first quarter vesting on October 1, 2011. The awards granted to the Company are accounted for as investments and deferred revenue in the condensed consolidated statements of financial condition. As these awards vest, the deferred revenue is recognized as management fees. The investment is accounted for using the equity method of accounting for awards granted to the Company and as a deferred compensation asset for the awards granted to employees. Compensation expense will be recognized on a straight line-basis over the vesting period for the awards granted to the employees. The Company recorded an asset and a liability upon receiving the awards on behalf of the Company's employees. The awards granted to the Company's employees are remeasured each period to reflect the fair value of the asset and liability and any changes in these values are recorded in the condensed consolidated statements of operations.

The fair value of the awards to employees is based on the grant date fair value, which utilizes the public share price of AMTG less discounts for certain restrictions. For the three months ended March 31, 2012, \$0.0 million of management fees and \$0.0 million of compensation expense were recognized in the condensed consolidated statements of operations, respectively. The actual forfeiture rate for AMTG RSUs was 0% for the three months ended March 31, 2012.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

The following table summarizes activity for the AMTG RSUs that were granted to both the Company and certain of its employees for the three months ended March 31, 2012:

	AMTG RSUs Unvested	Weighted Average Grant Date Fair Value	Vested	Total Number of RSUs Outstanding
Balance at January 1, 2012	28,305	\$ 17.56	2,570	30,875
Vested awards of the employees of the Company	(1,011)	16.57	1,011	
Vested awards of the Company	(1,563)	18.20	1,563	
Balance at March 31, 2012	25,731	\$ 17.56	5,144	30,875

Units Expected to Vest As of March 31, 2012, approximately 25,000 AMTG RSUs are expected to vest.

Equity-Based Compensation Allocation

Equity-based compensation is allocated based on ownership interests. Therefore, the amortization of the AOG Units is allocated to Shareholders Equity attributable to Apollo Global Management, LLC and the Non-Controlling Interests, which results in a difference in the amounts charged to equity-based compensation expense and the amounts credited to shareholders' equity attributable to Apollo Global Management, LLC in the Company's condensed consolidated financial statements.

Below is a reconciliation of the equity-based compensation allocated to Apollo Global Management, LLC for the three months ended March 31, 2012:

	Total Amount	Non-Controlling Interest % in Apollo Operating Group	Allocated to Non- Controlling Interest in Apollo Operating Group ⁽¹⁾	Allocated to Apollo Global Management, LLC
AOG Units	\$ 116,171	65.5%	\$ 76,330	\$ 39,841
RSUs and Share Options	32,162			32,162
ARI Restricted Stock Awards, ARI RSUs and AMTG RSUs	395	65.5	259	136
AAA RDUs	138	65.5%	90	48
Total Equity-Based Compensation	\$ 148,866		76,679	72,187
Less ARI Restricted Stock Awards, ARI RSUs and AMTG RSUs			(349)	(184)
Capital Increase Related to Equity-Based Compensation			\$ 76,330	\$ 72,003

- (1) Calculated based on average ownership percentage for the period considering Class A share issuances during the period.

11. RELATED PARTY TRANSACTIONS AND INTERESTS IN CONSOLIDATED ENTITIES

The Company typically facilitates the initial payment of certain operating costs incurred by the funds that it manages as well as their affiliates. These costs are normally reimbursed by such funds and are included in due from affiliates.

Due from affiliates and due to affiliates are comprised of the following:

	As of March 31, 2012	As of December 31, 2011
Due from Affiliates:		
Due from private equity funds	\$ 23,697	\$ 28,465
Due from portfolio companies	83,207	61,867
Management and advisory fees receivable from capital markets funds	31,225	23,545
Due from capital markets funds	26,580	15,822
Due from Contributing Partners, employees and former employees	20,609	30,353
Due from real estate funds	12,209	13,453
Other	2,265	3,235

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Total Due from Affiliates	\$ 199,792	\$ 176,740
Due to Affiliates:		
Due to Managing Partners and Contributing Partners in connection with the tax receivable agreement	\$ 451,743	\$ 451,743

Dividends payable to employees	7,250	12,532
Other ⁽¹⁾	7,938	7,972
Total Due to Affiliates	\$ 519,559	\$ 578,764

(1) Includes a \$4.7 million contingent consideration liability due to former owners of Gulf Stream.

Tax Receivable Agreement

Subject to certain restrictions, each of the Managing Partners and Contributing Partners has the right to exchange their vested AOG Units for the Company's Class A shares. Certain Apollo Operating Group entities have made an election under Section 754 of the U.S. Internal Revenue Code, as amended, which will result in an adjustment to the tax basis of the assets owned by Apollo Operating Group at the time of the exchange. These exchanges will result in increases in tax deductions that will reduce the amount

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

of tax that APO Corp. will otherwise be required to pay in the future. Additionally, the further acquisition of AOG Units from the Managing Partners and Contributing Partners also may result in increases in tax deductions and tax basis of assets that will further reduce the amount of tax that APO Corp. will otherwise be required to pay in the future.

APO Corp. entered into a tax receivable agreement (TRA) with the Managing Partners and Contributing Partners that provides for the payment to the Managing Partners and Contributing Partners of 85% of the amount of cash savings, if any, in U.S. Federal, state, local and foreign income taxes that APO Corp. would realize as a result of the increases in tax basis of assets that resulted from the Reorganization. If the Company does not make the required annual payment on a timely basis as outlined in the TRA, interest is accrued on the balance until the payment date. These payments are expected to occur approximately over the next 20 years. In connection with the amendment of the AMH partnership agreement in April of 2010, the tax receivable agreement was revised to reflect the Managing Partners' agreement to defer 25% or \$12.1 million of the required payments pursuant to the TRA that is attributable to the 2010 fiscal year for a period of four years until April 5, 2014. During the three months ended March 31, 2012, there were no payments made in connection with the TRA.

Due from Contributing Partners, Employees and Former Employees

The Company has accrued \$12.5 million and \$22.1 million in receivables as of March 31, 2012 and December 31, 2011, respectively from the Contributing Partners and certain employees and former employees of Fund VI for the potential return of carried interest income that would be due if the private equity fund were liquidated at the balance sheet date. In addition, there was a \$6.5 million receivable as of March 31, 2012 and December 31, 2011 from the Contributing Partners and certain employees associated with a credit agreement with Fund VI as described below in Due to Private Equity Funds.

Management Fee Waiver and Notional Investment Program

Apollo has forgone a portion of management fee revenue that it would have been entitled to receive in cash and instead received profits interests and assigned these profits interests to employees and partners. The amount of management fees waived and related compensation expense amounted to \$6.8 million and \$7.7 million for the three months ended March 31, 2012 and 2011, respectively.

Distributions

The table below presents the determination, declaration, and payment of the amount of quarterly distributions which were made at the sole discretion of the Company (in millions, except per share amounts):

Distributions Declaration	Distributions per Class A Share Amount	Distributions Payment Date	Distributions to AGM Class A Shareholders	Distributions to Non-Controlling Interest Holders in the Apollo Operating Group	Total Distributions from Apollo Operating Group	Distribution Equivalents on Participating Securities
January 4, 2011	0.17	January 14, 2011	\$ 16.6	\$ 40.8	\$ 57.4	\$ 3.3
May 12, 2011	0.22	June 1, 2011	26.8	52.8	79.6	4.7
August 9, 2011	0.24	August 29, 2011	29.5	57.6	87.1	5.1
November 3, 2011	0.20	December 2, 2011	24.8	48.0	72.8	4.3
February 12, 2012	0.46	February 29, 2012	58.1	110.4	168.5	10.3

Indemnity

Carried interest income from certain funds that the Company manages can be distributed to us on a current basis, but is subject to repayment by the subsidiary of the Apollo Operating Group that acts as general partner of the fund in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, subject to certain limitations, the obligation of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's or Contributing Partner's distributions. An existing shareholders agreement includes clauses that indemnify each of the Company's Managing Partners and certain Contributing Partners against all amounts

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

that they pay pursuant to any of these personal guarantees in favor of certain funds that the Company manages (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that the Company's Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that the Company's Managing Partners, Contributing Partners and certain investment professionals are required to pay amounts in connection with a general partner obligation for the return of previously made distributions, we will be obligated to reimburse the Company's Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though we did not receive the certain distribution to which that general partner obligation related.

Due to Private Equity Funds

On June 30, 2008, the Company entered into a credit agreement with Fund VI, pursuant to which Fund VI advanced \$18.9 million of carried interest income to the limited partners of Apollo Advisors VI, L.P., who are also employees of the Company. The loan obligation accrues interest at an annual fixed rate of 3.45% and terminates on the earlier of June 30, 2017 or the termination of Fund VI. In March 2011, a right of offset for the indemnified portion of the loan obligation was established between the Company and Fund VI, therefore the loan was reduced in the amount of \$10.9 million, which is offset in carried interest receivable on the condensed consolidated statements of financial condition. At December 31, 2011, the total outstanding loan aggregated \$9.0 million, including accrued interest of \$1.0 million, which approximated fair value, of which approximately \$6.5 million was not subject to the indemnity discussed above and is a receivable from the Contributing Partners and certain employees. During the three months ended March 31, 2012, there was \$0.0 million interest paid and \$0.1 million accrued interest on the outstanding loan obligation. As of March 31, 2012, the total outstanding loan aggregated \$9.1 million, including accrued interest of \$1.0 million which approximated fair value, of which approximately \$6.5 million was not subject to the indemnity discussed above and is a receivable from the Contributing Partners and certain employees.

In addition, assuming Fund VI is liquidated on the balance sheet date, the Company has also accrued a liability to Fund VI of \$41.2 million and \$75.3 million at March 31, 2012 and December 31, 2011, respectively, in connection with the potential general partner obligation to return carried interest income that was previously distributed from Fund VI. Of this amount, approximately \$12.5 million and \$22.1 million is a receivable from Contributing Partners, employees and former employees at March 31, 2012 and December 31, 2011, respectively.

Due to Capital Markets Funds

In connection with the Gulf Stream acquisition during October 2011, the Company will also make payments to the former owners of Gulf Stream under a contingent consideration obligation which requires the Company to transfer cash to the former owners of Gulf Stream based on a specified percentage of incentive fee revenue. The contingent consideration liability had a fair value of approximately \$4.7 million as of October 24, 2011 (the date of acquisition) and March 31, 2012, which was determined based on the present value of the estimated range of undiscounted incentive fee payable cash flows between \$0 and approximately \$8.7 million using a discount rate of 13.7%.

Similar to the private equity funds, certain capital markets funds allocate carried interest income to the Company. Assuming SOMA liquidated on December 31, 2011, the Company had accrued a liability to SOMA of \$18.1 million in connection with the potential general partner obligation to return previously distributed carried interest income from SOMA. This amount reversed during the three months ended March 31, 2012, as such there was no general partner obligation accrued as of March 31, 2012.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Due to Real Estate Funds

In connection with the acquisition of Citi Property Investors (CPI) during November 2010, Apollo is contingently obligated to Citigroup Inc. based on a specified percentage of future earnings from the date of acquisition through December 31, 2012. The estimated fair value of the contingent liability was \$1.2 million as of March 31, 2012 and December 31, 2011, respectively, which was determined based on discounted cash flows from the date of acquisition through December 31, 2012 using a discount rate of 7%.

Regulated Entities

During 2011, the Company formed Apollo Global Securities, LLC (AGS), which is a registered broker dealer with the SEC and is a member of the Financial Industry Regulatory Authority, or FINRA , subject to the minimum net capital requirements of the SEC. AGS has continuously operated in excess of these requirements. From time to time, this entity is involved in transactions with affiliates of Apollo, including portfolio companies of the funds we manage, whereby AGS earns underwriting and transaction fees for its services. The Company also has one entity based in London which is subject to the capital requirements of the U.K. Financial Services Authority. This entity has continuously operated in excess of these regulatory capital requirements.

Due to Strategic Investor/Strategic Relationship Agreement

On April 20, 2010, the Company announced that it entered into a strategic relationship agreement with the California Public Employees Retirement System (CalPERS). The strategic relationship agreement provides that Apollo will reduce management and other fees charged to CalPERS on funds it manages, or in the future will manage, solely for CalPERS by \$125 million over a five-year period or as close a period as required to provide CalPERS with that benefit. The agreement further provides that Apollo will not use a placement agent in connection with securing any future capital commitments from CalPERS.

Interests in Consolidated Entities

The table below presents equity interests in Apollo s consolidated, but not wholly-owned, subsidiaries and funds.

Net (income) loss attributable to Non-Controlling Interests consists of the following:

	Three Months Ended	
	March 31,	
	2012	2011
	(in thousands)	
AAA ⁽¹⁾	\$ (150,162)	\$ (136,225)
Consolidated VIEs ⁽²⁾	30,294	(17,088)
Interest in management companies and a co-invest vehicle ⁽³⁾	166	(3,638)
Net income attributable to Non-Controlling Interests in consolidated entities	(119,702)	(156,951)
Net income attributable to Non-Controlling Interests in Apollo Operating Group	(213,396)	(55,998)
Net income attributable to Non-Controlling Interests	\$ (333,098)	\$ (212,949)

Edgar Filing: Apollo Global Management LLC - Form 10-Q

- (1) Reflects the Non-Controlling Interests in the net income of AAA and is calculated based on the Non-Controlling Interests ownership percentage in AAA, which was approximately 98% during the three months ended March 31, 2012 and 2011.
- (2) Reflects the Non-Controlling Interests in the net loss (income) of the consolidated VIEs and includes \$(30.3) million and \$2.8 million of (losses) gains recorded within appropriated partners' capital related to consolidated VIEs during the three months ended March 31, 2012 and 2011, respectively.
- (3) Reflects the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets management entities and a private equity co-invest vehicle.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

12. COMMITMENTS AND CONTINGENCIES

Financial Guarantees Apollo has provided financial guarantees on behalf of certain employees for the benefit of unrelated third-party lenders, in connection with their capital commitment to certain funds managed by the Company. As of March 31, 2012, the maximum exposure relating to these financial guarantees approximated \$3.8 million. Apollo has historically not incurred any liabilities as a result of these agreements and does not expect to in the future. Accordingly, no liability has been recorded in the accompanying condensed consolidated financial statements.

As the general partner of Apollo/Artus Investor 2007-I, L.P. (Artus), the Company may be obligated for certain losses in excess of those allocable to the limited partners to the extent that there is negative equity in that fund. As of March 31, 2012, the Company has no current obligations to Artus.

Investment Commitments As a limited partner, general partner and manager of the Apollo private equity funds, capital markets and real estate funds, Apollo has unfunded capital commitments as of March 31, 2012 and December 31, 2011 of \$202.1 million and \$137.9 million, respectively.

Apollo has an ongoing obligation to acquire additional common units of AAA in an amount equal to 25% of the aggregate after-tax cash distributions, if any, that are made to its affiliates pursuant to the carried interest distribution rights that are applicable to investments made through AAA Investments.

Debt Covenants Apollo's debt obligations contain various customary loan covenants. As of the balance sheet date, the Company was not aware of any instances of noncompliance with any of these covenants.

Litigation and Contingencies We are, from time to time, party to various legal actions arising in the ordinary course of business, including claims and litigation, reviews, investigations and proceedings by governmental and self-regulatory agencies regarding our business.

On July 16, 2008, Apollo was joined as a defendant in a pre-existing purported class action pending in Massachusetts federal court against, among other defendants, numerous private equity firms. The suit alleges that beginning in mid-2003, Apollo and the other private equity firm defendants violated the U.S. antitrust laws by forming bidding clubs or consortia that, among other things, rigged the bidding for control of various public corporations, restricted the supply of private equity financing, fixed the prices for target companies at artificially low levels, and allocated amongst themselves an alleged market for private equity services in leveraged buyouts. The suit seeks class action certification, declaratory and injunctive relief, unspecified damages, and attorneys' fees. On August 27, 2008, Apollo and its co-defendants moved to dismiss plaintiffs' complaint and on November 20, 2008, the Court granted the company's motion. The Court also dismissed two other defendants, Permira and Merrill Lynch. In an order dated August 18, 2010, the Court granted in part and denied in part Plaintiffs' motion to expand the complaint and to obtain additional discovery. The Court ruled that Plaintiffs could amend the complaint and obtain discovery in a second discovery phase limited to eight additional transactions. The Court gave the plaintiffs until September 17, 2010 to amend the complaint to include the additional eight transactions. On September 17, 2010, the plaintiffs filed a motion to amend the complaint by adding the additional eight transactions and adding Apollo as a defendant. On October 6, 2010, the Court granted plaintiffs' motion to file the fourth amended complaint. Plaintiffs' fourth amended complaint, filed on October 7, 2010, adds Apollo, as a defendant. Apollo joined in the other defendants' October 21, 2010 motion to dismiss the third claim for relief and all claims by the PanAmSat Damages Sub-class in the Fourth Amended Complaint, which motion was granted on January 13, 2011. On November 4, 2010, Apollo moved to dismiss, arguing that the claims against Apollo are time-barred and that the allegations against Apollo are insufficient to state an antitrust conspiracy claim. On February 17, 2011, the Court denied Apollo's motion to dismiss, ruling that Apollo should raise the statute of limitations issues on summary judgment after discovery is completed. Apollo filed its answer to the fourth amended complaint on March 21, 2011. On July 11, 2011, the plaintiffs filed a motion for leave to file a fifth amended complaint that adds ten additional transactions and expands the scope of the class seeking relief. On September 7, 2011, the Court denied the motion for

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

leave to amend without prejudice and gave plaintiffs permission to take limited discovery on the ten additional transactions. The Court set April 17, 2012, as the deadline for completing all fact discovery. In March 2012, the Court extended that deadline so that the parties could continue to take depositions until May 31, 2012, though the parties have agreed to schedule some depositions in June 2012 as well. Currently, Apollo does not believe that a loss from liability in this case is either probable or reasonably estimable. The Court granted Apollo's motion to dismiss plaintiffs' initial complaint in 2008, ruling that Apollo was released from the only transaction in which it allegedly was involved. While plaintiffs have survived Apollo's motion to dismiss the fourth amended complaint, the Court stated in denying the motion that it will consider the statute of limitations (one of the bases for Apollo's motion to dismiss) at the summary judgment stage. Based on the applicable statute of limitations, among other reasons, Apollo believes that plaintiffs' claims lack factual and legal merit and intends to defend it vigorously. For these reasons, no estimate of possible loss, if any, can be made at this time.

On March 6, 2012, several plaintiffs filed a complaint on behalf of several putative classes of consumers against, among others, Trilegiant Corporation, Inc. (Trilegiant), its parent company, Affinion Group, LLC (Affinion), and Apollo, which owns approximately 69% of Affinion's common stock. The putative class action, captioned Hope Kelm, et al. v. Chase Bank, USA, N.A., et al. was filed in the United States District Court for the District of Connecticut, and also names as defendants several credit card companies and online merchants with which Trilegiant conducts business. On March 15, 2012, plaintiffs filed a nearly identical putative class action, also in the District of Connecticut and naming similar defendants, including Apollo, captioned Debra Miller, et al. v. 1-800-Flowers.com, Inc., et al. (No. 12-cv-396). In both cases, the plaintiffs allege that Trilegiant, aided by its business partners, has developed a set of business practices intended to create consumer confusion and ultimately defraud consumers into unknowingly paying fees to clubs for unwanted services. Plaintiffs allege that Apollo is a proper defendant because of its stock ownership and ability to appoint the majority of Affinion's board. The complaint asserts claims under the Racketeer Influenced Corrupt Organizations Act; the Electronic Communications Privacy Act; the Connecticut Unfair Trade Practices Act; and the California Business and Professional Code, and seeks, among other things, restitution or disgorgement, injunctive relief, compensatory, treble and punitive damages, and attorneys' fees. Apollo believes that plaintiffs' claims against it are without merit. For this reason, and because the claims against Apollo are in their early stages, no reasonable estimate of possible loss, if any, can be made at this time.

Various state attorneys general and federal and state agencies have initiated industry-wide investigations into the use of placement agents in connection with the solicitation of investments, particularly with respect to investments by public pension funds. Certain affiliates of Apollo have received subpoenas and other requests for information from various government regulatory agencies and investors in Apollo's funds, seeking information regarding the use of placement agents. CalPERS, one of our Strategic Investors, announced on October 14, 2009, that it had initiated a special review of placement agents and related issues. The Report of the CalPERS Special Review was issued on March 14, 2011. That report does not allege any wrongdoing on the part of Apollo or its affiliates. Apollo is continuing to cooperate with all such investigations and other reviews. In addition, on May 6, 2010, the California Attorney General filed a civil complaint against Alfred Villalobos and his company, Arvco Capital Research, LLC (Arvco) (a placement agent that Apollo has used) and Federico Buenrostro Jr., the former CEO of CalPERS, alleging conduct in violation of certain California laws in connection with CalPERS's purchase of securities in various funds managed by Apollo and another asset manager. Apollo is not a party to the civil lawsuit and the lawsuit does not allege any misconduct on the part of Apollo. Likewise, on April 23, 2012, the United States Securities and Exchange Commission filed a lawsuit alleging securities fraud on the part of Arvco, as well as Messrs. Buenrostro and Villalobos, in connection with their activities concerning certain CalPERS investments in funds managed by Apollo. This lawsuit also does not allege wrongdoing on the part of Apollo, and in fact alleges that Apollo was defrauded by Arvco, Villalobos, and Buenrostro. Apollo believes that it has handled its use of placement agents in an appropriate manner. Finally, on December 29, 2011, the United States Bankruptcy Court for the District of Nevada approved an application made by Mr. Villalobos, Arvco and related entities (the Arvco Debtors) in their consolidated bankruptcy proceedings to hire special litigation counsel to pursue certain claims on behalf of the bankruptcy estates of the Arvco Debtors, including potential claims against Apollo (a) for fees that Apollo purportedly owes the Arvco Debtors for placement agent services, and (b) for indemnification of legal fees and expenses arising

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

out of the Arvco Debtors' defense of the California Attorney General action described above. To date, no such claims have been brought. Apollo denies the merit of any such claims and will vigorously contest them, if they are brought.

Although the ultimate outcome of these matters cannot be ascertained at this time, we are of the opinion, after consultation with counsel, that the resolution of any such matters to which we are a party at this time will not have a material effect on our financial statements. Legal actions material to us could, however, arise in the future.

Commitments Apollo leases office space and certain office equipment under various lease and sublease arrangements, which expire on various dates through 2022. As these leases expire, it can be expected that in the normal course of business, they will be renewed or replaced. Certain lease agreements contain renewal options, rent escalation provisions based on certain costs incurred by the landlord or other inducements provided by the landlord. Rent expense is accrued to recognize lease escalation provisions and inducements provided by the landlord, if any, on a straight-line basis over the lease term and renewal periods where applicable. Apollo has entered into various operating lease service agreements in respect of certain assets.

As of March 31, 2012, the approximate aggregate minimum future payments required for operating leases were as follows:

	Remaining 2012	2013	2014	2015	2016	Thereafter	Total
Aggregate minimum future payments	\$ 24,787	\$ 32,602	\$ 32,307	\$ 30,959	\$ 30,937	\$ 99,315	\$ 250,907

Expenses related to non-cancellable contractual obligations for premises, equipment, auto and other assets were \$9.4 million and \$8.5 million for the three months ended March 31, 2012 and 2011, respectively.

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Other Long-term Obligations These obligations relate to payments on management service agreements related to certain assets and payments with respect to certain consulting agreements entered into by Apollo Investment Consulting, LLC. A significant portion of these costs are reimbursable by funds or portfolio companies. As of March 31, 2012, fixed and determinable payments due in connection with these obligations are as follows:

	Remaining 2012	2013	2014	2015	2016	Thereafter	Total
Other long-term obligations	\$ 9,361	\$ 1,713	\$ 500	\$ 104	\$	\$	\$ 11,678

Contingent Obligations Carried interest income in both private equity funds and certain capital markets funds is subject to reversal in the event of future losses to the extent of the cumulative carried interest recognized in income to date. If all of the existing investments became worthless, the amount of cumulative revenues that has been recognized by Apollo through March 31, 2012 and that would be reversed approximates \$1.9 billion. Management views the possibility of all of the investments becoming worthless as remote. Carried interest income is affected by changes in the fair values of the underlying investments in the funds that Apollo manages. Valuations, on an unrealized basis, can be significantly affected by a variety of external factors including, but not limited to, bond yields and industry trading multiples. Movements in these items can affect valuations quarter to quarter even if the underlying business fundamentals remain stable. The table below indicates the potential future reversal of carried interest income:

	March 31, 2012
Private Equity Funds:	
Fund VII	\$ 970,244
Fund VI	88,228
Fund V	258,507
Fund IV	67,412
AAA	14,131
Total Private Equity Funds	1,398,522
Capital Markets Funds:	
Distressed and Event-Driven Hedge Funds (Value Funds, SOMA)	44,158
Mezzanine Funds (AIE II)	26,941
Non-Performing Loan Fund (EPF)	49,084
Senior Credit Funds (COF I/COF II, ACLF, AEC, collateralized loan obligations (CLOs))	367,271
Other	4,053
Total Capital Market Funds	491,507
Total	\$ 1,890,029

Additionally, at the end of the life of certain funds that the Company manages, there could be a payment due to a fund by the Company if the Company as general partner has received more carried interest income than was ultimately earned. The general partner obligation amount, if any, will depend on final realized values of investments at the end of the life of each fund. As discussed in note 11, the Company has recorded a general partner obligation to return previously distributed carried interest income of fees of \$41.2 million relating to Fund VI as of March 31, 2012.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Certain private equity and capital markets funds may not generate carried interest income as a result of unrealized and realized losses that are recognized in the current and prior reporting period. In certain cases, carried interest income will not be generated until additional unrealized and realized gains occur. Any appreciation would first cover the deductions for invested capital, unreturned organizational expenses, operating expenses, management fees and priority returns based on the terms of the respective fund agreements.

-52-

APOLLO GLOBAL MANAGEMENT, LLC

NOTES TO CONDENSED CONSOLIDATED

FINANCIAL STATEMENTS

(dollars in thousands, except share data)

One of the Company's subsidiaries, AGS, provides underwriting commitments in connection with security offerings to the portfolio companies of the funds we manage. As of March 31, 2012, there were no underwriting commitments outstanding related to such offerings.

In connection with the Gulf Stream acquisition, the Company will also make payments to the former owners of Gulf Stream under a contingent consideration obligation which requires the Company to transfer cash to the former owners of Gulf Stream based on a specified percentage of incentive fee revenue.

In connection with the CPI acquisition, the consideration transferred in the acquisition is a contingent consideration in the form of a liability incurred by Apollo to CPI. The liability is an obligation of Apollo to transfer cash to CPI based on a specified percentage of future earnings. The estimated fair value of the contingent liability is \$1.2 million as of March 31, 2012.

13. MARKET AND CREDIT RISK

In the normal course of business, Apollo encounters market and credit risk concentrations. Market risk reflects changes in the value of investments due to changes in interest rates, credit spreads or other market factors. Credit risk includes the risk of default on Apollo's investments, where the counterparty is unable or unwilling to make required or expected payments.

The Company is subject to a concentration risk related to the investors in its funds. As of March 31, 2012, no individual investor accounted for more than 10% of the total committed capital to Apollo's active funds.

Apollo's derivative financial instruments contain credit risk to the extent that its counterparties may be unable to meet the terms of the agreements. Apollo seeks to minimize this risk by limiting its counterparties to highly rated major financial institutions with good credit ratings. Management does not expect any material losses as a result of default by other parties.

Substantially all amounts on deposit with major financial institutions that exceed insured limits are invested in interest-bearing accounts with U.S. money center banks.

Apollo is exposed to economic risk concentrations insofar as Apollo is dependent on the ability of the funds that it manages to compensate it for the services the management companies provide to these funds. Further, the incentive income component of this compensation is based on the ability of such funds to generate returns above certain specified thresholds.

Additionally, Apollo is exposed to interest rate risk. Apollo has debt obligations that have variable rates. Interest rate changes may therefore affect the amount of interest payments, future earnings and cash flows. At March 31, 2012 and December 31, 2011, \$738.3 million and \$738.5 million of Apollo's debt balance (excluding debt of the consolidated VIEs) had a variable interest rate, respectively. However, as of March 31, 2012 and December 31, 2011, \$167.0 million of the debt had been effectively converted to a fixed rate using interest rate swaps through May 2012 as discussed in note 8.

14. SEGMENT REPORTING

Apollo conducts its management and incentive businesses primarily in the United States and substantially all of its revenues are generated domestically. These businesses are conducted through the following three reportable segments:

Private Equity primarily invests in control equity and related debt instruments, convertible securities and distressed debt investments;

Capital Markets primarily invests in non-control debt and non-control equity investments, including distressed debt instruments; and

APOLLO GLOBAL MANAGEMENT, LLC
NOTES TO CONDENSED CONSOLIDATED
FINANCIAL STATEMENTS

(dollars in thousands, except share data)

Real Estate primarily invests in legacy commercial mortgage-backed securities, commercial first mortgage loans, mezzanine investments and other commercial real estate-related debt investments. Additionally, the Company sponsors real estate funds that focus on opportunistic investments in distressed debt and equity recapitalization transactions.

These business segments are differentiated based on the varying investment strategies. The performance is measured by management on an unconsolidated basis because management makes operating decisions and assesses the performance of each of Apollo's business segments based on financial and operating metrics and data that exclude the effects of consolidation of any of the affiliated funds.

The Company's financial results vary, since carried interest, which generally constitutes a large portion of the income from the funds that Apollo manages, as well as the transaction and advisory fees that the Company receives, can vary significantly from quarter to quarter and year to year. As a result, the Company emphasizes long-term financial growth and profitability to manage its business.

The tables below present the financial data for Apollo's reportable segments further separated between the management and incentive business as of March 31, 2012 and for the three months ended March 31, 2012 and 2011, respectively, which management believes is useful to the reader. The Company's management business has fairly stable revenues and expenses except for transaction fees, while its incentive business is more volatile and can have significant fluctuations as it is affected by changes in the fair value of investments due to market performance of the Company's business. The financial results of the management entities, as reflected in the management business section of the segment tables that follow, generally include management fee revenues, advisory and transaction fees and expenses exclusive of profit sharing expense. The financial results of the advisory entities, as reflected in the incentive business sections of the segment tables that follow, generally include carried interest income, investment income, profit sharing expense and incentive fee based compensation.

Economic Net Income (Loss)

Economic Net Income (ENI) is a key performance measure used by management in evaluating the performance of Apollo's private equity, capital markets and real estate segments. Management also believes the components of ENI such as the amount of management fees, advisory and transaction fees and carried interest income are indicative of the Company's performance. Management also uses ENI in making key operating decisions such as the following:

Decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires;

Decisions related to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses; and

Decisions relating to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in such funds and those of the Company's shareholders by providing such individuals a profit sharing interest in the carried interest income earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on the Company's performance and growth for the year.

ENI is a measure of profitability and has certain limitations in that it does not take into account certain items included under U.S. GAAP. ENI represents segment income (loss) attributable to Apollo Global Management, LLC, which excludes the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and amortization of AOG Units, (ii) income tax expense, (iii) amortization of intangibles associated with the 2007 Reorganization as well as acquisitions and (iv) Non-

Controlling Interests excluding the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets management companies. In addition, segment data excludes the assets, liabilities and operating results of the funds and VIEs that are included in the condensed consolidated financial statements.

During the fourth quarter 2011, the Company modified the measurement of ENI to better evaluate the performance of Apollo's private equity, capital markets and real estate segments in making key operating decisions. These modifications include a reduction to ENI for equity-based compensation expense for RSUs (excluding RSUs granted in connection with the 2007 private placement) and share options, reduction for non-controlling interests related to the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets management companies and an add-back for amortization of intangibles associated with the 2007 Reorganization and acquisitions. These modifications to ENI have been reflected in the prior period presentation of our segment results. The impact of this modification on ENI is reflected in the table below for the three months ended March 31, 2011:

	Impact of Modification on ENI			
	Private Equity Segment	Capital Markets Segment	Real Estate Segment	Total Reportable Segments
For the three months ended March 31, 2011	\$ (4,816)	\$ (6,549)	\$ (2,215)	\$ (13,580)

The following table presents the financial data for Apollo's reportable segments as of and for the three months ended March 31, 2012:

	As of and for the Three Months Ended March 31, 2012			
	Private Equity Segment	Capital Markets Segment	Real Estate Segment	Total Reportable Segments
Revenues:				
Advisory and transaction fees from affiliates	\$ 25,880	\$ 1,356	\$	\$ 27,236

15. SUBSEQUENT EVENTS

On December 16, 2011, Apollo announced that it agreed to merge Stone Tower Capital LLC and its related management companies, a leading alternative credit manager with approximately \$18.7 billion of assets under management, into Apollo's capital markets business. The transaction closed on April 2, 2012.

On April 3, 2012 the Company issued 150,000 Class A shares in settlement of vested RSUs. This issuance did not cause a material change to the Company's ownership interest in the Apollo Operating Group.

On May 8, 2012, the Company declared a cash distribution of \$0.25 per Class A share, which will be paid on May 30, 2012 to holders of record on May 21, 2012.

MANAGEMENT'S DISCUSSION AND ANALYSIS

OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with Apollo Global Management, LLC's condensed consolidated financial statements and the related notes included within this Quarterly Report on Form 10-Q. This discussion contains forward-looking statements that are subject to known and unknown risks and uncertainties. Actual results and the timing of events may differ significantly from those expressed or implied in such forward-looking statements due to a number of factors, including those included in the section entitled "Risk Factors" in our Form 10-K for the year ended December 31, 2011 filed with the SEC on March 9, 2012. The highlights listed below have had significant effects on many items within our condensed consolidated financial statements and affect the comparison of the current period's activity with those of prior periods.

General

Our Businesses

Founded in 1990, Apollo is a leading global alternative investment manager. We are contrarian, value-oriented investors in private equity, credit-oriented capital markets and real estate with significant distressed expertise and a flexible mandate in the majority of our funds that enables our funds to invest opportunistically across a company's capital structure. We raise and invest funds and managed accounts on behalf of some of the world's most prominent pension and endowment funds as well as other institutional and individual investors. Apollo is led by our Managing Partners, Leon Black, Joshua Harris and Marc Rowan, who have worked together for more than 20 years and lead a team of 553 employees, including 204 investment professionals, as of March 31, 2012. This team possesses a broad range of transaction, financial, managerial and investment skills. We have offices in New York, Houston, Los Angeles, London, Frankfurt, Luxembourg, Singapore, Hong Kong and Mumbai.

Apollo conducts its management and incentive businesses primarily in the United States and substantially all of its revenues are generated domestically. These businesses are conducted through the following three reportable segments:

- (i) ***Private equity*** primarily invests in control equity and related debt instruments, convertible securities and distressed debt instruments;
- (ii) ***Capital markets*** primarily invests in non-control debt and non-control equity instruments, including distressed debt instruments; and
- (iii) ***Real estate*** invests in legacy commercial mortgage-backed securities, commercial first mortgage loans, mezzanine investments and other commercial real estate-related debt investments. Additionally, the Company sponsors real estate funds that focus on opportunistic investments in distressed debt and equity recapitalization transactions.

These business segments are differentiated based on the varying investment strategies. The performance is measured by management on an unconsolidated basis because management makes operating decisions and assesses the performance of each of Apollo's business segments based on financial and operating metrics and data that exclude the effects of consolidation of any of the affiliated funds.

Our financial results vary since carried interest, which generally constitutes a large portion of the income we receive from the funds that we manage, as well as the transaction and advisory fees that we receive, can vary significantly from quarter to quarter and year to year. As a result, we emphasize long-term financial growth and profitability to manage our business.

In addition, the growth in our fee-generating AUM during the last year has primarily been in our capital markets segment. The average management fee rate for these new capital markets products is at market rates for such products and in certain cases is below our historical rates. Also, due to the complexity of these new product offerings, the Company has incurred and will continue to incur additional costs associated with managing these products. To date, these additional costs have been offset by realized economies of scale and ongoing cost management.

As of March 31, 2012, we had total AUM of \$86.1 billion across all of our businesses. Our latest private equity buyout fund, Fund VII, held a final closing in December 2008, raising a total of \$14.7 billion, and as of March 31, 2012 Fund VII had \$5.4 billion of uncalled commitments, or dry powder, remaining. We have consistently produced attractive long-term investment returns in our private equity funds, generating a 39% gross IRR and a 26% net IRR on a compound annual basis from inception through March 31, 2012. A number of our capital markets funds have also performed well since their inception through March 31, 2012.

As of March 31, 2012, approximately 93% of our total AUM was in funds with a contractual life at inception of seven years or more, and 9% of our total AUM was in permanent capital vehicles with unlimited duration.

Business Environment

Although global capital markets have experienced significant improvement from historically low levels, during the first quarter of 2012, the economic environment continued to be characterized by uncertainty and volatility as investors seek further indications regarding the sustainability of the recent market recovery. Following weak performance in 2011, global capital markets have improved meaningfully. However, the current environment continues to be characterized by uncertainty particularly relating to the economic health of certain parts of Europe. The S&P 500 rose approximately 13% during the first quarter of 2012, while the VIX (a measure of equity market volatility) dropped approximately 34% during the same period. The credit markets in which Apollo is most active generally improved and financing activity increased from the prior quarter. In December 2011 the European Central Bank began providing massive amounts of liquidity to European banks, which appears to have alleviated market concerns of a near term European market breakdown and possible contagion. Longer term, however, serious financial and liquidity problems remain in Europe and elsewhere in the world. During the particularly volatile and uncertain economic environment, which we believe began in the third quarter of 2007, we have been relying on our deep industry, credit and financial structuring experience, coupled with our strengths as value-oriented, distressed investors, to deploy a significant amount of new capital. As examples of this, from the beginning of the third quarter of 2007 and through March 31, 2012, we have deployed approximately \$29.5 billion of gross invested capital across our private equity and certain capital markets funds, focused on control, distressed and buyout investments, leveraged loan portfolios and mezzanine, non-control distressed and non-performing loans. In addition, from the beginning of the fourth quarter of 2007 through March 31, 2012, the funds managed by Apollo have acquired approximately \$17.2 billion in face value of distressed debt at discounts to par value and purchased approximately \$39.4 billion in face value of leveraged senior loans at discounts to par value from financial institutions. Since we purchased many of these leveraged loan portfolios from highly motivated sellers, we were able to secure, in certain cases, attractive long-term, low cost financing.

In addition to deploying capital in new investments, we have been depending on our over 20 years of experience to enhance value in the current investment portfolio of the funds to which we serve as an investment manager. We have been relying on our restructuring and capital markets experience to work proactively with our funds' portfolio company management teams to generate cost and working capital savings, reduce capital expenditures, and optimize capital structures through several means such as debt exchange offers and the purchase of portfolio company debt at discounts to par value. For example, as of March 31, 2012, Fund VI and its underlying portfolio companies purchased or retired approximately \$19.4 billion in face value of debt and captured approximately \$9.6 billion of discount to par value of debt in portfolio companies such as CEVA Logistics, Caesars Entertainment, Realogy and Momentive Performance Materials. In certain situations, funds managed by Apollo are the largest owner of the total outstanding debt of the portfolio company. In addition to the attractive return profile associated with these portfolio company debt purchases, we believe that building positions as senior creditors within the existing portfolio companies is strategic to the existing equity ownership positions. Additionally, the portfolio companies of Fund VI have implemented approximately \$3.1 billion of cost savings programs on an aggregate basis from the date Fund VI invested in them through March 31, 2012, which we believe will positively impact their operating profitability.

Regardless of the market or economic environment at any given time, we rely on our contrarian, value-oriented approach to consistently invest capital on behalf of our investors throughout economic cycles by focusing on opportunities that we believe are often overlooked by other investors. We believe

that our expertise in capital markets, focus on nine core industry sectors and investment experience allow us to respond quickly to changing environments. For example, in our private equity business, our private equity funds have had success investing in buyouts and credit opportunities during both expansionary and recessionary economic periods. During the recovery and expansionary periods of 1994 through 2000 and late 2003 through the first half of 2007, our private equity funds invested or committed to invest approximately \$13.7 billion primarily in traditional and corporate partner buyouts. During the recessionary periods of 1990 through 1993, 2001 through late 2003 and the current recessionary period, our private equity funds have invested \$25.2 billion, of which \$16.4 billion was in distressed buyouts and debt investments when the debt securities of quality companies traded at deep discounts to par value.

Managing Business Performance

We believe that the presentation of Economic Net Income (Loss) supplements a reader's understanding of the economic operating performance of each segment.

Economic Net Income (Loss)

ENI is a measure of profitability and does not take into account certain items included under U.S. GAAP. ENI represents segment income (loss) attributable to Apollo, which excludes the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and amortization of Apollo Operating Group units (AOG Units), (ii) income tax expense, (iii) amortization of intangibles associated with the 2007 Reorganization as well as acquisitions and (iv) Non-Controlling Interests excluding the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets management companies. In addition, segment data excludes the assets, liabilities and operating results of the funds and VIEs that are included in the condensed consolidated financial statements. Adjustments relating to income tax expense, intangible asset amortization and Non-Controlling Interests are common in the calculation of supplemental measures of performance in our industry. We believe the exclusion of the non-cash charges related to equity-based compensation awarded in connection with our 2007 Reorganization provides investors with a meaningful indication of our performance because these charges relate to the equity portion of our capital structure and not our core operating performance.

During the fourth quarter of 2011, the Company modified the measurement of ENI to better evaluate the performance of Apollo's private equity, capital markets and real estate segments in making key operating decisions. These modifications include a reduction to ENI for equity-based compensation for RSUs (excluding RSUs granted in connection with the 2007 private placement) and share options, a reduction for non-controlling interests related to the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets management companies and an add-back for amortization of intangibles associated with the 2007 Reorganization and acquisitions. These modifications to ENI have been reflected in the prior period presentation of our segment results. The impact of this modification on ENI is reflected in the table below for the three months ended March 31, 2011:

	Impact of Modification on ENI			
	Private Equity Segment	Capital Markets Segment	Real Estate Segment	Total Reportable Segments
For the three months ended March 31, 2011	\$ (4,816)	\$ (6,549)	\$ (2,215)	\$ (13,580)

ENI is a key performance measure used for understanding the performance of our operations from period to period and although not every company in our industry defines these metrics in precisely the same way that we do, we believe that this metric, as we use it, facilitates comparisons with other companies in our industry. We use ENI to evaluate the performance of our private equity, capital markets and real estate segments as management believes the amount of management fees, advisory and transaction fees and carried interest income are indicative of the Company's performance. Management also uses ENI in making key operating decisions such as the following:

Decisions related to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires. As the amount of fees, investment income, and ENI is indicative of the performance of the management companies and advisors within each segment, management can assess the need for additional resources and the location for deployment of the new hires based on the results of this measure. For example, a positive ENI could indicate the need for additional staff to manage the respective segment whereas a negative ENI could indicate the need to reduce staff assigned to manage the respective segment.

Decisions related to capital deployment such as providing capital to facilitate growth for our business and/or to facilitate expansion into new businesses. As the amount of fees, investment income, and ENI is indicative of the performance of the management companies and advisors within each segment, management can assess the availability and need to provide capital to facilitate growth or expansion into new businesses based on the results of this measure. For example, a negative ENI may indicate the lack of performance of a segment and thus indicate a need for additional capital to be deployed into the respective segment.

Decisions relating to the allocation of resources such as staffing decisions including hiring and locations for deployment of the new hires.

Decisions relating to capital deployment such as providing capital to facilitate growth for the business and/or to facilitate expansion into new businesses.

Decisions related to expenses, such as determining annual discretionary bonuses and equity-based compensation awards to its employees. With respect to compensation, management seeks to align the interests of certain professionals and selected other individuals with those of the investors in such funds and those of the Company's shareholders by providing such individuals a profit sharing interest in the carried interest income earned in relation to the funds. To achieve that objective, a certain amount of compensation is based on the Company's performance and growth for the year.

ENI does not take into account certain items included when calculating net income under U.S. GAAP and as such, we do not rely solely on ENI as a performance measure and also consider our U.S. GAAP results. The following items, which are significant to our business, are excluded when calculating ENI:

- (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and amortization of AOG Units, although these costs are expected to be recurring components of our costs we may be able to incur lower cash compensation costs with the granting of equity-based compensation;
- (ii) income tax, which represents a necessary and recurring element of our operating costs and our ability to generate revenue because ongoing revenue generation is expected to result in future income tax expense;
- (iii) amortization of intangible assets associated with the 2007 Reorganization and acquisitions, which is a recurring item until all intangibles have been fully amortized; and
- (iv) Non-Controlling Interests excluding the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets management companies, which is expected to be a recurring item and represents the aggregate of the income or loss that is not owned by the Company.

We believe that ENI is helpful for an understanding of our business and that investors should review the same supplemental financial measure that management uses to analyze our segment performance. This measure supplements and should be considered in addition to and not in lieu of the results of operations discussed below in "Overview of Results of Operations" that have been prepared in accordance with U.S. GAAP.

The following summarizes the adjustments to ENI that reconcile ENI to the net income (loss) attributable to Apollo determined in accordance with U.S. GAAP:

Inclusion of the impact of RSUs granted in connection with the 2007 private placement and non-cash equity-based compensation expense relating to the amortization of AOG Units. Management assesses our performance based on management fees, advisory and transaction fees, and carried interest income generated by the business and excludes the impact of non-cash charges related to RSUs granted in connection with the 2007 private placement and amortization of AOG Units because these non-cash charges are not viewed as part of our core operations.

Inclusion of the impact of income taxes as we do not take income taxes into consideration when evaluating the performance of our segments or when determining compensation for our employees. Additionally, income taxes at the segment level (which exclude APO Corp.'s corporate taxes) are not meaningful, as the majority of the entities included in our segments operate as partnerships and therefore are only subject to New York City unincorporated business taxes and foreign taxes when applicable.

Inclusion of amortization of intangible assets associated with the 2007 Reorganization and subsequent acquisitions as these non-cash charges are not viewed as part of our core operations.

Carried interest income, management fees and other revenues from Apollo funds are reflected on an unconsolidated basis. As such, ENI excludes the Non-Controlling Interests in consolidated funds, which remain consolidated in our condensed consolidated financial statements. Management views the business as an alternative investment management firm and therefore assesses performance using the combined total of carried interest income and management fees from each of our funds. One exception is the Non-Controlling Interest related to certain individuals who receive an allocation of income from certain of our capital markets management companies, which is deducted from ENI to better reflect the performance attributable to shareholders.

ENI may not be comparable to similarly titled measures used by other companies and is not a measure of performance calculated in accordance with U.S. GAAP. We use ENI as a measure of operating performance, not as a measure of liquidity. ENI should not be considered in isolation or as a substitute for operating income, net income, operating cash flows, investing and financing activities, or other income or cash flow statement data prepared in accordance with U.S. GAAP. The use of ENI without consideration of related U.S. GAAP measures is not adequate due to the adjustments described above. Management compensates for these limitations by using ENI as a supplemental measure to U.S. GAAP results, to provide a more complete understanding of our performance as management measures it. A reconciliation of ENI to our U.S. GAAP net income (loss) attributable to Apollo can be found in the notes to our condensed consolidated financial statements.

Operating Metrics

We monitor certain operating metrics that are common to the alternative investment management industry. These operating metrics include Assets Under Management, private equity dollars invested and uncalled private equity commitments.

Assets Under Management

Assets Under Management, or AUM, refers to the investments we manage or with respect to which we have control. Our AUM equals the sum of:

- (i) the fair value of our private equity investments plus the capital that we are entitled to call from our investors pursuant to the terms of their capital commitments plus non-recallable capital to the extent a fund is within the commitment period in which management fees are calculated based on total commitments to the fund;

- (ii) the net asset value, or NAV, of our capital markets funds, other than certain senior credit funds, which are structured as collateralized loan obligations (such as Artus, which we measure by using the mark-to-market value of the aggregate principal amount of the underlying collateralized loan obligations) or certain collateralized loan obligation and collateralized debt obligation credit funds that have a fee generating basis other than mark-to-market asset values, plus used or available leverage and/or capital commitments;
- (iii) the gross asset values or net asset value of our real estate entities and the structured portfolio vehicle investments included within the funds we manage, which includes the leverage used by such structured portfolio vehicles;
- (iv) the incremental value associated with the reinsurance investments of the funds we manage; and
- (v) the fair value of any other investments that we manage plus unused credit facilities, including capital commitments for investments that may require pre-qualification before investment plus any other capital commitments available for investment that are not otherwise included in the clauses above.

Our AUM measure includes Assets Under Management for which we charge either no or nominal fees. Our definition of AUM is not based on any definition of Assets Under Management contained in our operating agreement or in any of our Apollo fund management agreements. We consider multiple factors for determining what should be included in our definition of AUM. Such factors include but are not limited to (1) our ability to influence the investment decisions for existing and available assets; (2) our ability to generate income from the underlying assets in our funds; and (3) the AUM measures that we believe are used by other investment managers. Given the differences in the investment strategies and structures among other alternative investment managers, our calculation of AUM may differ from the calculations employed by other investment managers and, as a result, this measure may not be directly comparable to similar measures presented by other investment managers.

Assets Under Management Fee-Generating/Non-Fee Generating

Fee-generating AUM consists of assets that we manage and on which we earn management fees or monitoring fees pursuant to management agreements on a basis that varies among the Apollo funds. Management fees are normally based on net asset value, gross assets, adjusted par asset value, adjusted cost of all unrealized portfolio investments, capital commitments, adjusted assets, stockholders equity, invested capital contributions, each as defined in the applicable management agreement. Monitoring fees for AUM purposes are based on the total value of certain structured portfolio vehicle investments, which normally include leverage, less any portion of such total value that is already considered in fee-generating AUM.

Non-fee generating AUM consists of assets that do not produce management fees or monitoring fees. These assets generally consist of the following: (a) fair value above invested capital for those funds that earn management fees based on invested capital, (b) net asset values related to general partner interests and co-investments, (c) unused credit facilities, (d) available commitments on those funds that generate management fees on invested capital, (e) structured portfolio vehicle investments that do not generate monitoring fees and (f) the difference between gross assets and net asset value for those funds that earn management fees based on net asset value.

We use non-fee generating AUM combined with fee-generating AUM as a performance measurement of our investment activities, as well as to monitor fund size in relation to professional resource and infrastructure needs. Non-fee generating AUM includes assets on which we could earn carried interest income.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

The table below displays fee-generating and non-fee generating AUM by segment as of March 31, 2012 and 2011 and December 31, 2011. The changes in market conditions, additional funds raised and acquisitions have had significant impacts to our AUM:

	As of March 31,		As of December 31,
	2012	2011 (in millions)	2011
Total Assets Under Management	\$ 86,126 ⁽¹⁾	\$ 69,959	\$ 75,222
Fee-generating	59,571	48,269	58,121
Non-fee generating	26,555 ⁽¹⁾	21,690	17,101
Private Equity	38,398	39,578	35,384
Fee-generating	27,653	27,804	28,031
Non-fee generating	10,745	11,774	7,353
Capital Markets	36,465	23,834	31,867
Fee-generating	28,207	17,660	26,553
Non-fee generating	8,258	6,174	5,314
Real Estate	8,263	6,547	7,971
Fee-generating	3,711	2,805	3,537
Non-fee generating	4,552	3,742	4,434

(1) Includes \$3.0 billion of commitments from a strategic investment account that have yet to be deployed to an Apollo fund within our three segments.

During the three months ended March 31, 2012, our total fee-generating AUM increased primarily due to increases in subscriptions and other inflows across our three segments. The fee-generating AUM of our capital markets funds increased during the three months ended March 31, 2012 primarily due to additional inflows by Athene, as well as increased subscriptions and leverage. The fee-generating AUM of our real estate segment increased due to additional subscriptions and net segment transfers from other segments as well as increased income partially offset by distributions. The fee-generating AUM of our private equity funds decreased primarily due to leverage and distributions, partially offset by income and subscriptions.

When the fair value of an investment exceeds invested capital, we are normally entitled to carried interest income on the difference between the fair value once realized and invested capital after also considering certain expenses and preferred return amounts, as specified in the respective partnership agreements; however, we generally do not earn management fees on such excess. As a result of the growth in both the size and number of funds that we manage, we have experienced an increase in our management fees and advisory and transaction fees. To support this growth, we have also experienced an increase in operating expenses, resulting from hiring additional personnel, opening new offices to expand our geographical reach and incurring additional professional fees.

With respect to our private equity funds and certain of our capital markets and real estate funds, we charge management fees on the amount of committed or invested capital and we generally are entitled to carried interest on the realized gains on the disposition of investments. Certain funds may have current fair values below invested capital, however, the management fee would still be computed on the invested capital for such funds. With respect to ARI and AMTG, we receive management fees on stockholders equity as defined in the respective management agreement. In addition, our fee-generating AUM reflects leverage vehicles that generate monitoring fees on value in excess of fund commitments. As of March 31, 2012, our total fee-generating AUM was comprised of approximately 89% of assets that earned management fees and the remaining balance of assets earned monitoring fees.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

The Company's entire fee-generating AUM is subject to management or monitoring fees. The components of fee-generating AUM by segment as of March 31, 2012 and 2011 are presented below:

	Private Equity	As of March 31, 2012		Total
		Capital Markets	Real Estate	
		(in millions)		
Fee-generating AUM based on capital commitments	\$ 14,857	\$ 3,000	\$ 260	\$ 18,117
Fee-generating AUM based on invested capital	8,644	2,902	1,857	13,403
Fee-generating AUM based on gross/adjusted assets	972	17,059	1,364 ⁽⁴⁾	19,395
Fee-generating AUM based on leverage ⁽¹⁾	3,180	3,156		6,336
Fee-generating AUM based on NAV		2,090	230	2,320
Total Fee-Generating AUM	\$ 27,653⁽²⁾	\$ 28,207⁽³⁾	\$ 3,711	\$ 59,571

- (1) Monitoring fees are normally based on the total value of certain special purpose vehicle investments, which includes leverage, less any portion of such total value that is already considered for fee-generating AUM. Monitoring fees are typically calculated using a 0.5% annual rate.
- (2) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at March 31, 2012 was 62 months.
- (3) The fee-generating AUM for the capital markets funds has no concentration across the investment strategies.
- (4) The fee-generating AUM for our real estate entities is based on an adjusted equity amount as specified by the respective management agreements.

	Private Equity	As of March 31, 2011		Total
		Capital Markets	Real Estate	
		(in millions)		
Fee-generating AUM based on capital commitments	\$ 14,289	\$ 2,029	\$ 262	\$ 16,580
Fee-generating AUM based on invested capital	8,565	2,961	1,765	13,291
Fee-generating AUM based on gross/adjusted assets	1,239	6,459		7,698
Fee-generating AUM based on leverage ⁽¹⁾	3,711	3,553		7,264
Fee-generating AUM based on NAV		2,658	778 ⁽⁴⁾	3,436
Total Fee-Generating AUM	\$ 27,804⁽²⁾	\$ 17,660⁽³⁾	\$ 2,805	\$ 48,269

- (1) Monitoring fees are normally based on the total value of certain special purpose vehicle investments, which includes leverage, less any portion of such total value that is already considered for fee-generating AUM. Monitoring fees are typically calculated using a 0.5% annual rate.
- (2) The weighted average remaining life of the private equity funds excluding permanent capital vehicles at March 31, 2011 is 68 months.
- (3) The fee-generating AUM for the capital markets funds has no concentration across the investment strategies.
- (4) The fee-generating AUM for our real estate entities is based on an adjusted equity amount as specified by the respective management agreements.

Private Equity

During the three months ended March 31, 2012, the AUM in our private equity segment increased by \$3.0 billion, or 8.5%. This increase was a result of \$3.2 billion of income that was primarily attributable to improved unrealized gains in our private equity funds including \$1.6 billion in Fund VI and \$1.4 billion in Fund VII. Offsetting this increase was \$0.2 billion of decreased leverage, including \$0.1 billion in Fund VI. See

Segment Analysis, which includes a detailed discussion of the impact that significant changes in our AUM within our private equity, capital markets and real estate segments had on our revenues by segment.

During the three months ended March 31, 2011, the AUM in our private equity segment increased by \$0.8 billion, or 2.0%. This increase was a result of \$1.8 billion of income that was primarily attributable to improved unrealized gains in our private equity funds including \$1.0 billion in Fund VI and \$0.6 billion in Fund VII. Offsetting this increase was \$1.2 billion of distributions, including \$0.4 billion in Fund VI and \$0.6 billion in Fund VII.

Capital Markets

During the three months ended March 31, 2012, AUM in our capital markets segment increased by \$4.6 billion, or 14.4%. This increase was a result of \$1.4 billion related to other inflows from Athene, \$1.1 billion of income that was primarily attributable to improved unrealized gains across most of our capital markets funds, and additional subscriptions of \$1.0 billion, primarily comprised of additional capital raised in connection with three recently formed funds. Apollo Centre Street Partnership, L.P. (ACSP) raised \$0.6 billion, Financial Credit Investment I, L.P. (FCI) raised \$0.2 billion and Apollo European Principal Finance Fund II, L.P. (EPF II) raised \$0.2 billion during the three months ended March 31, 2012. The increase was also impacted by an additional \$1.4 billion of leverage from a number of our capital markets funds. These increases were offset by a \$0.1 billion decrease in AUM that was impacted by distributions, net segment transfers out of \$0.1 billion and redemptions of \$0.1 billion.

During the three months ended March 31, 2011, AUM in our capital markets segment increased by \$1.6 billion, or 7.0%. This increase was a result of \$0.9 billion of income that was primarily attributable to improved unrealized gains in our capital markets funds, and additional subscriptions of \$0.8 billion, primarily comprised of additional capital raised in connection with two recently formed funds. FCI raised \$0.2 billion and Apollo Senior Floating Rate Fund Inc. (AFT) raised \$0.3 billion. The increase was also impacted by an additional \$0.6 billion of leverage from a number of our capital markets funds. These increases were offset by a \$0.4 billion decrease in AUM that was impacted by distributions from EPF, ACLF, COF II and VIF.

Real Estate

During the three months ended March 31, 2012, AUM in our real estate segment increased by \$0.3 billion, or 3.7%, which was primarily the result of \$0.2 billion of income that was primarily attributable to improved unrealized gains across most of our real estate funds and \$0.3 billion of additional subscriptions. These increases were offset by a \$0.2 billion decrease in AUM that was impacted by distributions from various real estate funds.

During the three months ended March 31, 2011, AUM in our real estate segment increased by \$0.1 billion, or 1.2%, which was primarily the result of \$0.1 billion of net segment transfers.

Private Equity Dollars Invested and Uncalled Private Equity Commitments

Private equity dollars invested represents the aggregate amount of capital invested by our private equity funds during a reporting period. Uncalled private equity commitments, by contrast, represent unfunded commitments by investors in our private equity funds to contribute capital to fund future investments or expenses incurred by the funds, fees and applicable expenses as of the reporting date. Private equity dollars invested and uncalled private equity commitments are indicative of the pace and magnitude of fund capital that is deployed or will be deployed, and which therefore could result in future

revenues that include transaction fees and incentive income. Private equity dollars invested and uncalled private equity commitments can also give rise to future costs that are related to the hiring of additional resources to manage and account for the additional capital that is deployed or will be deployed. Management uses private equity dollars invested and uncalled private equity commitments as key operating metrics since we believe the results measure our investment activities.

The following table summarizes the private equity dollars invested during the specified reporting periods:

	For the Three Months Ended March 31, 2012 2011 (in millions)	
Private equity dollars invested	\$ 984	\$ 802

The following table summarizes the uncalled private equity commitments as of March 31, 2012 and December 31, 2011:

	As of March 31, 2012	As of December 31, 2011 (in millions)	As of March 31, 2011
Uncalled private equity commitments	\$ 7,396	\$ 8,204	\$ 10,162

The Historical Investment Performance of Our Funds

Below we present information relating to the historical performance of our funds, including certain legacy Apollo funds that do not have a meaningful amount of unrealized investments, and in respect of which the general partner interest has not been contributed to us.

When considering the data presented below, you should note that the historical results of our funds are not indicative of the future results that you should expect from such funds, from any future funds we may raise or from your investment in our Class A shares. An investment in our Class A shares is not an investment in any of the Apollo funds, and the assets and revenues of our funds are not directly available to us. As a result of the deconsolidation of most of our funds, we have not consolidated those funds in our financial statements for periods after either August 1, 2007 or November 30, 2007. The historical and potential future returns of the funds we manage are not directly linked to returns on our Class A shares. Therefore, you should not conclude that continued positive performance of the funds we manage will necessarily result in positive returns on an investment in our Class A shares. However, poor performance of the funds that we manage would cause a decline in our revenue from such funds, and would therefore have a negative effect on our performance and in all likelihood the value of our Class A shares. There can be no assurance that any Apollo fund will continue to achieve the same results in the future.

Moreover, the historical returns of our funds should not be considered indicative of the future results you should expect from such funds or from any future funds we may raise, in part because:

market conditions during previous periods were significantly more favorable for generating positive performance, particularly in our private equity business, than the market conditions we have experienced for the last few years and may experience in the future;

our funds' returns have benefited from investment opportunities and general market conditions that currently do not exist and may not repeat themselves, and there can be no assurance that our current or future funds will be able to avail themselves of profitable investment opportunities;

our private equity funds' rates of return, which are calculated on the basis of net asset value of the funds' investments, reflect unrealized gains, which may never be realized;

our funds' returns have benefited from investment opportunities and general market conditions that may not repeat themselves, including the availability of debt capital on attractive terms and the availability of distressed debt opportunities, and we may not be able to achieve the same returns or profitable investment opportunities or deploy capital as quickly;

the historical returns that we present are derived largely from the performance of our earlier private equity funds, whereas future fund returns will depend increasingly on the performance of our newer funds, which may have little or no realized investment track record;

Fund VI and Fund VII are several times larger than our previous private equity funds, and this additional capital may not be deployed as profitably as our prior funds;

the attractive returns of certain of our funds have been driven by the rapid return of invested capital, which has not occurred with respect to all of our funds and we believe is less likely to occur in the future;

our track record with respect to our capital markets and real estate funds is relatively short as compared to our private equity funds;

in recent years, there has been increased competition for private equity investment opportunities resulting from the increased amount of capital invested in private equity funds and periods of high liquidity in debt markets, which may result in lower returns for the funds; and

our newly established funds may generate lower returns during the period that they take to deploy their capital; consequently, we do not provide return information for any funds which have not been actively investing capital for at least 24 months prior to the valuation date as we believe this information is not meaningful.

Finally, our private equity IRRs have historically varied greatly from fund to fund. For example, Fund IV has generated a 12% gross IRR and a 9% net IRR since its inception through March 31, 2012, while Fund V has generated a 61% gross IRR and a 44% net IRR since its inception through March 31, 2012. Accordingly, the IRR going forward for any current or future fund may vary considerably from the historical IRR generated by any particular fund, or for our private equity funds as a whole. Future returns will also be affected by the applicable risks, including risks of the industries and businesses in which a particular fund invests. See Item 1A. Risk Factors - Risks Related to Our Businesses in our Form 10-K for the year ended December 31, 2011 filed with the SEC on March 9, 2012. The historical returns attributable to our funds should not be considered as indicative of the future results of our funds or of our future results or of any returns expected on an investment in our Class A shares.

Investment Record

Private Equity

The following table summarizes the investment record of certain of our private equity fund portfolios. All amounts are as of March 31, 2012, unless otherwise noted:

	Vintage Year	Committed Capital	Total Invested Capital	(in millions)		Total Value	As of March 31, 2012		As of December 31, 2011	
							Gross IRR	Net IRR	Gross IRR	Net IRR
ANRP ⁽²⁾	2012	\$ 583	\$ 83	\$	\$ 80	\$ 80	NM ⁽²⁾	NM ⁽²⁾	N/A	N/A
Fund VII	2008	14,676	11,607	5,854	12,115	17,969	35%	25%	31%	22%
Fund VI	2006	10,136	11,767	4,856	10,772	15,628	10	9	6	5
Fund V	2001	3,742	5,192	11,155	1,508	12,663	61	44	61	44
Fund IV	1998	3,600	3,481	6,693	142	6,835	12	9	12	9
Fund III	1995	1,500	1,499	2,654	64	2,718	18	12	18	12
Fund I, II & MIA ⁽³⁾	1990/92	2,220	3,773	7,924		7,924	47	37	47	37
Total		\$ 36,457	\$ 37,402	\$ 39,136	\$ 24,681	\$ 63,817	39%⁽⁴⁾	26%⁽⁴⁾	39%⁽⁴⁾	25%⁽⁴⁾

- (1) Figures include the market values, estimated fair value of certain unrealized investments and capital committed to investments.
- (2) Apollo Natural Resources Partners, L.P. (ANRP) commenced investing capital less than 24 months prior to the period indicated. Given the limited investment period and overall longer investment period for private equity funds, the return information was deemed not meaningful.
- (3) Fund I and Fund II were structured such that investments were made from either fund depending on which fund had available capital. We do not differentiate between Fund I and Fund II investments for purposes of performance figures because they are not meaningful on a separate basis and do not demonstrate the progression of returns over time.
- (4) Total IRR is calculated based on total cash flows for all funds presented.

Capital Markets

The following table summarizes the investment record for certain funds with a defined maturity date and internal rate of return since inception, which is computed for the purposes of this table based on the actual dates of capital contributions, distributions and ending limited partners capital as of the specified date. All amounts are as of March 31, 2012, unless otherwise noted:

Strategy	Vintage Year	Committed Capital	Total Invested Capital	(in millions)		Total Value	As of March 31, 2012		As of December 31, 2011

Value Funds ⁽⁸⁾	Distressed and Event Driven	2003/2006	861.1	67.3	11.6	5.5	50.0
Totals			\$ 4,395.8				

- Returns have not been presented as the fund commenced investing capital less than 24 months prior to the period indicated and therefore such return information was deemed not meaningful.
- ACSP is a strategic investment account with \$600 million of committed capital.
- In July 2011, Apollo Residential Mortgage, Inc. (AMTG) completed its initial public offering raising approximately \$203.0 million in net proceeds.
- The Apollo Senior Floating Rate Fund Inc. (AFT) completed its initial public offering during the first quarter of 2011.
- SOMA returns for primary mandate, which follows similar strategies as the Value Funds and excludes SOMA's investments in other Apollo funds.
- Fund is denominated in Euros and translated into U.S. dollars at an exchange rate of 1.00 to \$1.33 as of March 31, 2012.
- Net return for AINV represents NAV return including reinvested dividends. Net asset value and returns are as of December 31, 2011.
- Value Funds consist of Apollo Strategic Value Master Fund, L.P., together with its feeder funds (SVF) and Apollo Value Investment Master Fund, L.P., with its feeder funds (VIF).

Real Estate

The following table summarizes the investment record for certain funds with a defined maturity date and internal rate of return since inception, which for the purposes of this table is computed based on the actual dates of capital contributions, distributions and ending limited partners capital as of the specified date. All amounts are as of March 31, 2012, unless otherwise noted.

Totals		\$ 8,626.8	\$ 3,225.3	\$ 5,260.8	\$ 1,034.4	\$ 3,414.9	\$ 4,449.3				

- (1) Figures include estimated fair value of unrealized investments.
- (2) Returns have not been presented as the fund commenced investing capital less than 24 months prior to the period indicated and therefore such return information was deemed not meaningful.
- (3) AGRE U.S. Real Estate Fund, L.P., a newly formed closed-end private investment fund that intends to make real estate-related investments principally located in the United States, held closings in January 2011 and June 2011 for a total of \$134.9 million in base capital commitments and \$250 million in additional capital commitments. Additionally, there was \$72.0 million of co-invest commitments raised for an investment in the first quarter of 2012, which is included in the figures in the table above.
- (4) As part of the CPI acquisition, Apollo acquired general partner interests in fully invested funds. The net IRRs from the inception of the respective fund to March 31, 2012 were (10.3)%, 3.7% and (16.3)% for the CPI Capital Partners North America, Asia Pacific and Europe funds, respectively. These net IRRs were primarily achieved during a period in which Apollo did not make the initial investment decisions and Apollo only became the general partner or manager of these funds upon completing the acquisition on November 12, 2010.
- (5) CPI Capital Partners Europe is denominated in Euros and translated into U.S. dollars at an exchange rate of 1.00 to \$1.33 as of March 31, 2012.

- (6) CPI Other consists of funds or individual investments of which we are not the general partner or manager and only receive fees pursuant to either a sub-advisory agreement or an investment management and administrative agreement. CPI Other fund performance is a result of invested capital prior to Apollo's management of these funds. Return and certain other performance data is therefore not considered meaningful as we perform primarily an administrative role.

Apollo also manages Apollo Commercial Real Estate Finance, Inc. (NYSE: ARI), which as of March 31, 2012 had total raised capital and total stockholders' equity of \$355.3 million and \$338.4 million, respectively.

Performance information for our funds is included throughout this discussion and analysis to facilitate an understanding of our results of operations for the periods presented. An investment in our Class A shares is not an investment in any of our funds. The performance information reflected in this discussion and analysis is not indicative of the possible performance of our Class A shares and is also not necessarily indicative of the future results of any particular fund. There can be no assurance that our funds will continue to achieve, or that our future funds will achieve, comparable results.

The following table provides a summary of the cost and fair value of our funds' investments by segment:

	As of March 31, 2012	As of December 31, 2011 (in millions)	As of March 31, 2011
Private Equity⁽¹⁾:			
Cost	\$ 16,623	\$ 15,956	\$ 14,228
Fair Value	24,617	20,700	23,819
Capital Markets:			
Cost	12,144 ⁽²⁾	10,917	9,658
Fair Value	12,901 ⁽²⁾	11,696	11,693
Real Estate:			
Cost	4,508 ⁽³⁾	4,791 ⁽³⁾	4,009 ⁽³⁾
Fair Value	4,095 ⁽³⁾	4,344 ⁽³⁾	3,405 ⁽³⁾

- (1) Includes the cost and fair values of our private equity investments which represent the current invested capital and unrealized values, respectively, in ANRP, Fund VII, Fund VI, Fund V and Fund IV.
 (2) Includes AINV amounts as of December 31, 2011.
 (3) Includes CPI Funds with investment cost and fair value of \$1.6 billion and \$1.1 billion as of March 31, 2012, \$1.5 billion and \$1.1 billion as of December 31, 2011 and \$1.7 billion and \$1.1 billion as of March 31, 2011.

Overview of Results of Operations

Revenues

Advisory and Transaction Fees from Affiliates. As a result of providing advisory services with respect to actual and potential private equity and capital markets investments, we are entitled to receive fees for transactions related to the acquisition and, in certain instances, disposition of portfolio companies as well as fees for ongoing monitoring of portfolio company operations and directors' fees. We also receive an advisory fee for advisory services provided to certain capital markets funds. In addition, monitoring fees are generated on certain special purpose vehicle investments. Under the terms of the limited partnership agreements for certain of our private equity and capital markets funds, the advisory and transaction fees earned are subject to a reduction of a percentage of such advisory and transaction fees (the "Management Fee Offsets").

The Management Fee Offsets are calculated for each fund as follows:

65%-68% for private equity funds gross advisory, transaction and other special fees;

65%-80% for certain capital markets funds gross advisory, transaction and other special fees; and

100% for certain other capital markets funds gross advisory, transaction and other special fees.

These offsets are reflected as a decrease in advisory and transaction fees from affiliates on our condensed consolidated statements of operations.

Additionally, in the normal course of business, the management companies incur certain costs related to private equity funds (and certain capital markets funds) transactions that are not consummated, or broken deal costs. A portion of broken deal costs related to certain of our private equity funds, up to the total amount of advisory and transaction fees, are reimbursed by the unconsolidated funds (through reductions of the Management Fee Offsets described above), except for Fund VII and certain of our capital markets funds which initially bear all broken deal costs and these costs are factored into the Management Fee Offsets.

Management Fees from Affiliates. The significant growth of the assets we manage has had a positive effect on our revenues. Management fees are calculated based upon any of net asset value, gross assets, adjusted costs of all unrealized portfolio investments, capital commitments, invested capital, adjusted assets, capital contributions, or stockholders equity, each as defined in the applicable management agreement of the unconsolidated funds.

Carried Interest Income from Affiliates. The general partners of our funds, in general, are entitled to an incentive return that can amount to as much as 20% of the total returns on fund capital, depending upon performance of the underlying funds and subject to preferred returns and high water marks, as applicable. The carried interest income from affiliates is recognized in accordance with U.S. GAAP guidance applicable to accounting for arrangement fees based on a formula. In applying the U.S. GAAP guidance, the carried interest from affiliates for any period is based upon an assumed liquidation of the funds assets at the reporting date, and distribution of the net proceeds in accordance with the funds allocation provisions.

As of March 31, 2012, approximately 69% of the fair value of our fund investments was determined using market-based valuation methods (i.e., reliance on broker or listed exchange quotes) and the remaining 31% was determined primarily by comparable company and industry multiples or discounted cash flow models. For our private equity, capital markets and real estate segments, the percentage determined using market-based valuation methods as of March 31, 2012 was 64%, 82% and 40%, respectively. See Item 1A. Risk Factors Risks Related to Our Businesses in our Form 10-K for the year ended December 31, 2011 filed with the SEC on March 9, 2012. Our private equity funds performance, and our performance, may be adversely affected by the financial performance of our portfolio companies and the industries in which our funds invest for discussion regarding certain industry-specific risks that could affect the fair value of our private equity funds portfolio company investments.

Carried interest income fee rates can be as much as 20% for our private equity funds. In our private equity funds, the Company does not earn carried interest income until the investors in the fund have achieved cumulative investment returns on invested capital (including management fees and expenses) in excess of an 8% hurdle rate. Additionally, certain of our capital markets funds have various carried interest rates and hurdle rates. Certain capital markets funds allocate carried interest to the general partner in a similar manner as the private equity funds. In our private equity, certain capital markets and certain real estate funds, so long as the investors achieve their priority returns, there is a catch-up formula whereby the Company earns a priority return for a portion of the return until the Company s carried interest income equates to its incentive fee rate for that fund; thereafter, the Company participates in returns from the fund at the carried interest income rate. Carried interest income is subject to reversal to the extent that the carried interest income distributed exceeds the amount due to the general partner based on a fund s cumulative investment returns. The accrual for potential repayment of previously received carried interest income represents all amounts previously distributed to the general partner that would need to be repaid to the Apollo funds if these funds were to be liquidated based on the current fair value of the underlying funds investments as of the reporting date. This actual general partner obligation, however, would not become payable or realized until the end of a fund s life.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

The table below presents an analysis of our (i) carried interest receivable as of March 31, 2012 and (ii) realized and unrealized carried interest (loss) income for the three months ended March 31, 2012:

	As of March 31, 2012	Unrealized Carried Interest Income (Loss)	For the Three Months Ended March 31, 2012 Realized Carried Interest Income	Total Carried Interest Income (Loss)
	Carried Interest Receivable	(in millions)		
Private Equity Funds:				
Fund VII	\$ 781.1	\$ 287.9	\$ 24.6	\$ 312.5
Fund VI	89.5	34.1 ⁽²⁾	89.5	123.6
Fund V	136.6	11.6		11.6
Fund IV	18.3	0.4		0.4
AAA	14.1	(8.0)	8.0	
Total Private Equity Funds	1,039.6	326.0	122.1	448.1
Capital Markets Funds:				
Distressed and Event-Driven Hedge Funds (Value Funds, SOMA, AAOF)	26.4	31.8		31.8
Mezzanine Funds (AIE II, AINV)	11.5	5.7	9.6	15.3
Non-Performing Loan Fund (EPF)	49.0	(3.7)		(3.7)
Senior Credit Funds (COF I/COF II, ACLF, AEC, AESI, CLOs)	237.1	110.4 ⁽³⁾	23.8 ⁽³⁾	134.2 ⁽³⁾
Other	6.2	4.1	2.2	6.3
Total Capital Markets Funds	330.2	148.3	35.6	183.9
Real Estate Funds:				
CPI Other			1.7	1.7
Total Real Estate Funds			1.7	1.7
Total	\$ 1,369.8⁽¹⁾	\$ 474.3	\$ 159.4	\$ 633.7

- (1) There was a corresponding profit sharing payable of \$568.8 million as of March 31, 2012 that results in a net carried interest receivable amount of \$801.0 million as of March 31, 2012.
- (2) See the table below summarizing the fair value gains on investments and income needed to generate carried interest for funds and the related general partner obligation to return previously distributed carried interest income.
- (3) Includes \$11.2 million of unrealized and \$0.1 million of realized carried interest income generated from consolidated CLOs which is eliminated in consolidation.

As of March 31, 2012, the general partners of Fund IV, Fund V, Fund VII, AAA, the Value Funds, AIE II, COF I, COF II, AEC, ACLF, SOMA, EPF and certain CLOs were accruing carried interest income because the fair value of the investments of certain investors in these funds is in excess of the investors' cost basis and allocable share of expenses. As of March 31, 2012, Fund VII, Fund V and Fund IV were each above their hurdle rate of 8% and generating carried interest income. The investment manager of AINV accrues carried interest as it is realized. Additionally, COF I, COF II, ACLF, SOMA, AIE II and EPF were each above their hurdle rates of 8.0%, 7.5%, 10.0%, 7.0%, 7.5% and 8.0%, respectively, and generating carried interest income.

The general partners of certain of our distressed and event-driven hedge funds accrue carried interest when the fair value of investments exceeds the cost basis of the individual investors' investments in the fund, including any allocable share of expenses incurred in connection with such investments. These high water marks are applied on an individual investor basis. All of our distressed and event-driven hedge funds have investors with various high water marks and are subject to market conditions and investment performance. As of March 31, 2012, approximately 27% of the limited partners' capital in the Value Funds was generating carried interest income.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Carried interest income from our private equity funds and certain capital markets and real estate funds is subject to contingent repayment by the general partner in the event of future losses to the extent that the cumulative carried interest distributed from inception to date exceeds the amount computed as due to the general partner at the final distribution. General partner obligations relating to such contingent repayment, if applicable, are disclosed by fund in the table below and are included in Due to Affiliates on

-79-

Edgar Filing: Apollo Global Management LLC - Form 10-Q

the condensed consolidated statements of financial condition. As of March 31, 2012, there were no such general partner obligations related to our real estate funds. Carried interest receivables are reported on a separate line item within the condensed consolidated statements of financial condition.

The following table summarizes our carried interest income since inception through March 31, 2012:

	Carried Interest Income Since Inception				
	Undistributed by Fund and Recognized	Distributed by Fund and Recognized	Total Undistributed and Distributed by Fund and Recognized ⁽¹⁾ (in millions)	General Partner Obligation as of March 31, 2012 ⁽¹⁾	Maximum Carried Interest Income Subject to Potential Reversal ⁽²⁾
Private Equity Funds:					
Fund VII	\$ 781.1	\$ 324.2	\$ 1,105.3	\$	\$ 970.3
Fund VI	89.5	124.6	214.1	41.2	88.2
Fund V	136.6	1,277.6	1,414.2		258.5

Other	6.2		6.2		4.1
Total Capital Markets Funds	320.8	282.8	603.6		491.5
Total	\$ 1,360.4	\$ 2,615.8	\$ 3,976.2	\$ 41.2	\$ 1,890.0

- (1) Amounts were computed based on the fair value of fund investments on March 31, 2012. As a result, carried interest income has been allocated to and recognized by the general partner. Based on the amount of carried interest income allocated, a portion is subject to potential reversal or has been reduced by the general partner obligation to return previously distributed carried interest income or fees at March 31, 2012. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund.
- (2) Represents the amount of carried interest income that would be reversed if remaining fund investments became worthless on March 31, 2012. Amounts subject to potential reversal of carried interest income include amounts undistributed by a fund (i.e., the carried interest receivable), as well as a portion of the amounts that have been distributed by a fund, net of taxes not subject to a general partner obligation to return previously distributed carried interest income, except for Fund IV which is gross of taxes.
- (3) Mezzanine Funds amounts exclude (i) AINV, as carried interest from this fund is not subject to contingent repayment by the general partner and (ii) AIE I, as this fund is winding down.

The following table summarizes the fair value gains on investments and income needed to generate carried interest for funds with a general partner and has a general partner obligation based on the current fair value of the underlying funds' investments as of March 31, 2012:

Fund	General Partner Obligation ⁽¹⁾	Fair Value of Investments as of March 31, 2012	Fair Value Gain on Investments and
------	---	--	--

Edgar Filing: Apollo Global Management LLC - Form 10-Q

			Income to Reverse General Partner Obligation
		(in millions)	
Fund VI	\$ 41.2	\$ 10,771.8	\$ 85.2 ⁽²⁾

- (1) Based upon a hypothetical liquidation of Fund VI as of March 31, 2012, Apollo has recorded a general partner obligation to return previously distributed carried interest income, which represents amounts due to the fund. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of the fund's investments based on contractual termination of the fund.
- (2) The fair value gain on investments and income to reverse the general partner obligation is based on the life-to-date activity of the entire fund and assumes a hypothetical liquidation of the fund as of March 31, 2012.

Expenses

Compensation and Benefits. Our most significant expense is compensation and benefits expense. This consists of fixed salary, discretionary and non-discretionary bonuses, incentive fee compensation and profit sharing expense associated with the carried interest income earned from private equity funds and capital markets funds and compensation expense associated with the vesting of non-cash equity-based awards.

Our compensation arrangements with certain partners and employees contain a significant performance-based incentive component. Therefore, as our net revenues increase, our compensation costs also rise or can be lower when net revenues decrease. In addition, our compensation costs reflect the increased investment in people as we expand geographically and create new funds. All payments for services rendered by our Managing Partners prior to the Reorganization have been accounted for as partnership distributions rather than compensation and benefits expense. Refer to note 1 of the condensed consolidated financial statements for further discussion of the 2007 Reorganization. As a result, prior to the Reorganization, the condensed consolidated financial statements did not reflect compensation expense for services rendered by these individuals. Subsequent to the 2007 Reorganization, our Managing Partners were considered employees of Apollo. As such, payments for services made to these individuals, including the expense associated with AOG Units described below, have been recorded as compensation expense. The AOG Units were granted to the Managing Partners and Contributing Partners at the time of the Reorganization, as discussed in note 1 to our condensed consolidated financial statements.

In addition, certain professionals and selected other individuals have a profit sharing interest in the carried interest income earned in relation to our private equity and certain capital markets funds in order to better align their interests with our own and with those of the investors in these funds. Profit sharing expense is part of our compensation and benefits expense and is generally based upon a fixed percentage of private equity and capital markets carried interest income on a pre-tax and a pre-consolidated basis. Profit sharing expense can reverse during periods when there is a decline in carried interest income that was previously recognized. Profit sharing amounts are normally distributed to employees after the corresponding investment gains have been realized and generally before preferred returns achieved for the investors. Therefore, changes in our unrealized gains (losses) for investments have the same effect on our profit sharing expense. Profit sharing expense increases when unrealized gains increase. Realizations only impact profit sharing expense to the extent that the effects on investments have not been recognized previously. If losses on other investments within a fund are subsequently realized, the profit sharing amounts previously distributed are normally subject to a general partner obligation to return carried interest income previously distributed back to the funds. This general partner obligation due to the funds would be realized only when the fund is liquidated, which generally occurs at the end of the fund's term. However, indemnification clauses also exist for pre-reorganization realized gains, which, although our Managing Partners and Contributing Partners would remain personally liable, may indemnify our Managing Partners and Contributing Partners for 17.5% to 100% of the previously distributed profits regardless of the fund's future performance. Refer to note 11 to our condensed consolidated financial statements for further discussion of indemnification.

Salary expense for services rendered by our Managing Partners is limited to \$100,000 per year for a five-year period that commenced in July 2007 and may likely increase subsequent to September 2012. Additionally, our Managing Partners can receive other forms of compensation. In connection with the Reorganization, the Managing Partners and Contributing Partners received AOG Units with a vesting period of five to six years and certain employees were granted RSUs that typically have a vesting period of six years. Managing Partners, Contributing Partners and certain employees have also been granted AAA RDUs, or incentive units that provide the right to receive AAA RDUs, which both represent common units of AAA and generally vest over three years for employees and are fully-vested for Managing Partners and Contributing Partners on the grant date. In addition, ARI RSUs, ARI restricted stock and AMTG RSUs have been granted to the Company and certain employees in the real estate and capital markets segments and generally vest over three years. In addition, the Company granted share options to certain employees that generally vest and become exercisable in quarterly installments or annual installments depending on the contract terms over the next two to six years. Refer to note 10 to our condensed consolidated financial statements for further discussion of AOG Units and other equity-based compensation.

Other Expenses. The balance of our other expenses includes interest, litigation settlement, professional fees, placement fees, occupancy, depreciation and amortization and other general operating expenses. Interest expense consists primarily of interest related to the AMH Credit Agreement which has a variable interest amount based on LIBOR and ABR interest rates as discussed in note 8 to our condensed consolidated financial statements. Placement fees are incurred in connection with our capital raising activities. Occupancy expense represents charges related to office leases and associated expenses, such as utilities and maintenance fees. Depreciation and amortization of fixed assets is normally calculated using the straight-line method over their estimated useful lives, ranging from two to sixteen years, taking into consideration any residual value. Leasehold improvements are amortized over the shorter of the useful life of the asset or the expected term of the lease. Intangible assets are amortized based on the future cash flows over the expected useful lives of the assets. Other general operating expenses normally include costs related to travel, information technology and administration.

Other Income (Loss)

Net Gains (Losses) from Investment Activities. The performance of the consolidated Apollo funds has impacted our net gains (losses) from investment activities. Net gains (losses) from investment activities include both realized gains and losses and the change in unrealized gains and losses in our investment portfolio between the opening balance sheet date and the closing balance sheet date. Net unrealized gains (losses) are a result of changes in the fair value of unrealized investments and reversal of unrealized gains (losses) due to dispositions of investments during the reporting period. Significant judgment and estimation goes into the assumptions that drive these models and the actual values realized with respect to investments could be materially different from values obtained based on the use of those models. The valuation methodologies applied impact the reported value of investment company holdings and their underlying portfolios in our condensed consolidated financial statements.

Net Gains (Losses) from Investment Activities of Consolidated Variable Interest Entities. Changes in the fair value of the consolidated VIEs assets and liabilities and related interest, dividend and other income and expenses subsequent to consolidation are presented within net gains (losses) from investment activities of consolidated variable interest entities and are attributable to Non-Controlling Interests in the condensed consolidated statements of operations.

Interest Income. The Company recognizes security transactions on the trade date. Interest income is recognized as earned on an accrual basis. Discounts and premiums on securities purchased are accreted or amortized over the life of the respective securities using the effective interest method.

Other Income (Loss), Net. Other income, net includes gains (losses) arising from the remeasurement of foreign currency denominated assets and liabilities of foreign subsidiaries and other miscellaneous income and expenses.

Income Taxes. The Apollo Operating Group and its subsidiaries continue to generally operate in the U.S. as partnerships for U.S. Federal income tax purposes and generally as corporate entities in non-U.S. jurisdictions. Accordingly, these entities in some cases are subject to New York City unincorporated business tax, or in the case of non-U.S. entities, to non-U.S. corporate income taxes. In addition, APO Corp., a wholly-owned subsidiary of the Company, is subject to U.S. Federal, state and local corporate income tax, and the Company's provision for income taxes is accounted for in accordance with U.S. GAAP.

As significant judgment is required in determining tax expense and in evaluating tax positions, including evaluating uncertainties, we recognize the tax benefits of uncertain tax positions only where the position is more likely than not to be sustained assuming examination by tax authorities. The tax benefit is measured as the largest amount of benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. If a tax position is not considered more likely than not to be sustained, then no benefits of the position are recognized. The Company's tax positions are reviewed and evaluated quarterly to determine whether or not we have uncertain tax positions that require financial statement recognition.

Deferred income taxes are provided for the effects of temporary differences between the tax basis of an asset or liability and its reported amount in the condensed consolidated statements of financial condition. These temporary differences result in taxable or deductible amounts in future years.

Non-Controlling Interests

For entities that are consolidated, but not 100% owned, a portion of the income or loss and corresponding equity is allocated to owners other than Apollo. The aggregate of the income or loss and corresponding equity that is not owned by the Company is included in Non-Controlling Interests in the condensed consolidated financial statements. The Non-Controlling Interests relating to Apollo primarily include the 65.5% and 70.7% ownership interest in the Apollo Operating Group held by the Managing Partners and Contributing Partners through their limited partner interests in Holdings as of March 31, 2012 and March 31, 2011, respectively, and other ownership interests in consolidated entities, which primarily consist of the approximate 98% ownership interest held by limited partners in AAA for the three months ended March 31, 2012 and 2011, respectively. Non-Controlling Interests also include limited partner interests of Apollo managed funds in certain consolidated VIEs.

The authoritative guidance for Non-Controlling Interests in the condensed consolidated financial statements requires reporting entities to present Non-Controlling Interests as equity and provides guidance on the accounting for transactions between an entity and Non-Controlling Interests. According to the guidance, (1) Non-Controlling Interests are presented as a separate component of shareholders' equity on the Company's condensed consolidated statements of financial condition, (2) net income (loss) includes the net income (loss) attributed to the Non-Controlling Interest holders on the Company's condensed consolidated statements of operations, (3) the primary components of Non-Controlling Interest are separately presented in the Company's condensed consolidated statements of changes in shareholders' equity to clearly distinguish the interests in the Apollo Operating Group and other ownership interests in the consolidated entities and (4) profits and losses are allocated to Non-Controlling Interests in proportion to their ownership interests regardless of their basis.

On January 1, 2010, the Company adopted amended consolidation guidance issued by FASB on issues related to VIEs. The amended guidance significantly affects the overall consolidation analysis, changing the approach taken by companies in identifying which entities are VIEs and in determining which party is the primary beneficiary. The amended guidance requires continuous assessment of the reporting entity's involvement with such VIEs. The amended guidance also enhances the disclosure requirements for a reporting entity's involvement with VIEs, including presentation on the condensed consolidated statements of financial condition of assets and liabilities of consolidated VIEs that meet the separate presentation criteria and disclosure of assets and liabilities recognized in the condensed consolidated statements of financial condition and the maximum exposure to loss for those VIEs in which a reporting entity is determined to not be the primary beneficiary but in which it has a variable interest. The guidance provides a limited scope deferral for a reporting entity's interest in an entity that meets all of the following conditions: (a) the entity has all the attributes of an investment company as defined under the AICPA Audit and Accounting Guide, *Investment Companies*, or does not have all the attributes of an investment company but is an entity for which it is acceptable based on industry practice to apply measurement principles that are consistent with the AICPA Audit and Accounting Guide, *Investment Companies*, (b) the reporting entity does not have explicit or implicit obligations to fund any losses of the entity that could potentially be significant to the entity and (c) the entity is not a securitization entity, asset-backed financing entity or an entity that was formerly considered a qualifying special-purpose entity. The reporting entity is required to perform a consolidation analysis for entities that qualify for the deferral in accordance with previously issued guidance on variable interest entities. Apollo's involvement with the funds it manages is such that all three of the above conditions are met with the exception of certain vehicles which fail condition (c) above. As previously discussed, the incremental impact of adopting the amended consolidation guidance has resulted in the consolidation of certain VIEs managed by the Company. Additional disclosures related to Apollo's involvement with VIEs are presented in note 4 to our condensed consolidated financial statements.

Results of Operations

Below is a discussion of our consolidated results of operations for the three months ended March 31, 2012 and 2011, respectively. For additional analysis of the factors that affected our results at the segment level, refer to Segment Analysis below:

	For the Three Months Ended March 31,		Amount	Percentage
	2012	2011	Change	Change
	(in thousands)

Revenues

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Our revenues and other income include fixed components that result from measures of capital and asset valuations and variable components that result from realized and unrealized investment performance, as well as the value of successfully completed transactions.

Advisory and transaction fees from affiliates, including directors' fees and reimbursed broken deal costs, increased by \$7.8 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This increase was attributable to an increase in advisory and transaction fees in the private equity segment of \$10.8 million, offset by a decline in the capital markets segment of \$3.0 million. During the three months ended March 31, 2012, gross and net advisory fees, including directors' fees, were \$38.8 million and \$15.1 million, respectively, and gross and net transaction fees were \$32.7 million and \$12.4 million, respectively. During the three months ended March 31, 2011, gross and

net advisory fees, including directors' fees, were \$32.4 million and \$12.2 million, respectively, and gross and net transaction fees were \$20.2 million and \$8.3 million, respectively. The net transaction and advisory fees were further offset by \$0.3 million and \$1.1 million in broken deal costs during the three months ended March 31, 2012 and 2011, respectively, primarily relating to Fund VII. Advisory and transaction fees are reported net of Management Fee Offsets as calculated under the terms of the respective limited partnership agreements. See Overview of Results of Operations Revenues Advisory and Transaction Fees from Affiliates for a summary that addresses how the Management Fee Offsets are calculated for each fund.

Management fees from affiliates increased by \$9.0 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to an increase in management fees earned by our capital markets, private equity and real estate segments by \$9.3 million, \$1.5 million and \$1.1 million, respectively, as a result of corresponding increases in the net assets managed and fee-generating invested capital with respect to these segments during the period. Part of the increase in management fees earned from capital markets was attributable to \$2.9 million of fees earned from consolidated VIEs which are included in the capital markets segment results but were eliminated in consolidation.

Carried interest income from affiliates increased by \$63.6 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. Carried interest income from affiliates is driven by investment gains and losses of unconsolidated funds. During the three months ended March 31, 2012, there was \$463.1 million and \$159.2 million of unrealized and realized carried interest income, respectively, which resulted in total carried interest income from affiliates of \$622.3 million. During the three months ended March 31, 2011, there was \$411.4 million and \$147.4 million of unrealized and realized carried interest income, respectively, which resulted in total carried interest income from affiliates of \$558.8 million. The \$51.7 million increase in unrealized carried interest income was driven by significant improvements in the fair value of portfolio investments held by certain of our capital markets and private equity funds, primarily by Fund VII, COF I, Fund V, COF II, and SOMA, which had increased unrealized carried interest income of \$214.3 million, \$35.7 million, \$23.4 million, \$18.1 million and \$13.1 million, respectively, partially offset by Fund VI, Fund IV and EPF, which had decreased unrealized carried interest income of \$141.4 million, \$82.4 million and \$20.7 million, respectively, during the period. Included in the change in unrealized carried interest income is the reversal of \$34.1 million and \$18.1 million of the general partner obligation to return previously distributed carried interest income for Fund VI and SOMA, respectively, during the three months ended March 31, 2012. The \$11.8 million increase in realized carried interest income was attributable to increased dispositions along with higher interest and dividend distributions from portfolio investments held by certain of our capital markets, private equity and real estate funds, primarily by Fund VI, AAA and COF I, which had increased realized carried interest income of \$70.5 million, \$8.0 million and \$5.7 million, respectively, partially offset by Fund VII and Fund V, which had decreased realized carried interest income of \$50.1 million and \$24.9 million, respectively, during the three months ended March 31, 2012 as compared to the same period in 2011.

Expenses

Compensation and benefits decreased by \$119.9 million for the three ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to a reduction of equity-based compensation by \$134.7 million, specifically the amortization of AOG Units decreased by \$142.0 million due to the expiration of the vesting period for certain Managing Partners, partially offset by an increase in equity-based compensation relating to RSUs and share options of \$7.0 million due to additional grants subsequent to March 31, 2011. In addition, incentive fee compensation decreased by \$10.1 million due to the performance of certain of our capital markets funds during the period. Salary, bonus and benefits decreased by \$7.0 million due to the performance based incentive arrangement discussed below. These decreases were offset by an increase in profit sharing expense of \$31.9 million due to increased headcount and as a result of the favorable performance of certain of our private equity and capital markets funds during the period along with the performance based incentive arrangement discussed below.

The Company intends to, over time, seek to more directly tie compensation of its professionals to realized performance of the Company's business, which will likely result in greater variability in compensation. As previously disclosed, in June 2011, the Company adopted a performance based incentive arrangement (the Incentive Pool) whereby certain partners and employees earned discretionary compensation based on carried interest realizations earned by the Company during the year, which amounts

are reflected as profit sharing expense in the Company's condensed consolidated financial statements. The Company adopted the Incentive Pool to attract and retain, and provide incentive to, partners and employees of the Company and to more closely align the overall compensation of partners and employees with the overall realized performance of the Company. Allocations to the Incentive Pool and to its participants contain both a fixed and a discretionary component and may vary year-to-year depending on the overall realized performance of the Company and the contributions and performance of each participant. There is no assurance that the Company will continue to compensate individuals through performance-based incentive arrangements in the future and there may be periods when the Executive Committee of the Company's manager determines that allocations of realized carried interest income are not sufficient to compensate individuals, which may result in an increase in profit sharing expense.

Professional fees decreased by \$5.8 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was attributable to lower external accounting, tax, audit, legal and consulting fees incurred during the three months ended March 31, 2012, as compared to the same period in 2011 when the Company incurred incremental costs related to its IPO.

General, administrative and other expenses increased by \$2.6 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to increased travel, information technology, recruiting and other expenses incurred associated with the launch of our new funds and continued expansion of our global investment platform during the three months ended March 31, 2012 as compared to the same period in 2011.

Occupancy expense increased by \$1.5 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to additional expenses incurred from the extension of existing leases along with additional office space leased as a result of the increase in our headcount to support the expansion of our global investment platform during the three months ended March 31, 2012 as compared to the same period in 2011.

Depreciation and amortization expense increased by \$2.4 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to increased depreciation expense associated with additional assets placed in service subsequent to March 31, 2011.

Other Income (Loss)

Net (losses) gains from investment activities of consolidated VIEs changed by \$(33.3) million during the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to a decrease in net realized and unrealized gains (losses) relating to the debt held by the consolidated VIEs of \$80.5 million, along with an increase in other expenses of \$38.9 million during the period. These decreases were partially offset by higher net realized and unrealized gains (losses) relating to an increase in the fair values of investments held by the consolidated VIEs of \$55.2 million along with higher interest and other income of \$30.9 million during the three months ended March 31, 2012 as compared to the same period in 2011.

Income from equity method investments increased by \$21.4 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily driven by changes in the fair values of certain Apollo funds in which the Company has a direct interest. Fund VII, COF I, COF II and ACLF had the most significant impact and together generated \$37.4 million of income from equity method investments during the three months ended March 31, 2012 as compared to \$15.9 million of income from equity method investments during the three months ended March 31, 2011, resulting in a net increase of \$21.5 million. Refer to note 3 to our condensed consolidated financial statements for a complete summary of income (loss) from equity method investments by fund for the three months ended March 31, 2012 and 2011.

Other income, net decreased by \$2.2 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to losses resulting from fluctuations in exchange rates of foreign denominated assets and liabilities of subsidiaries and other miscellaneous income during the three months ended March 31, 2012 as compared to the same period in 2011.

Income Tax Provision

The income tax provision increased by \$5.7 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. As discussed in note 7 to our condensed consolidated financial statements, the Company's income tax provision primarily relates to the earnings generated by APO Corp., a wholly-owned subsidiary of Apollo Global Management, LLC that is subject to U.S. federal, state and local taxes. APO Corp. had income before taxes of \$35.7 million and \$19.4 million for the three months ended March 31, 2012 and 2011, respectively, after adjusting for permanent tax differences. The \$16.3 million change in income before taxes resulted in increased federal, state and local taxes of \$6.4 million during the period utilizing a marginal corporate tax rate. This was partially offset by a decrease in the income tax provision of \$0.7 million which primarily resulted from a decrease in the New York City Unincorporated Business Tax (NYC UBT), as well as taxes on foreign subsidiaries.

Non-Controlling Interests

Net (income) loss attributable to Non-Controlling Interests consisted of the following:

	Three Months Ended March 31,	
	2012	2011
	(in thousands)	
AAA ⁽¹⁾	\$ (150,162)	\$ (136,225)
Consolidated VIEs ⁽²⁾	30,294	(17,088)
Interest in management companies and a co-invest vehicle ⁽³⁾	166	(3,638)
Net income attributable to Non-Controlling Interests in consolidated entities	(119,702)	(156,951)
Net income attributable to Non-Controlling Interests in Apollo Operating Group	(213,396)	(55,998)
Net income attributable to Non-Controlling Interests	\$ (333,098)	\$ (212,949)

- (1) Reflects the Non-Controlling Interests in the net income of AAA and is calculated based on the Non-Controlling Interests ownership percentage in AAA, which was approximately 98% during the three months ended March 31, 2012 and 2011, respectively.
- (2) Reflects the Non-Controlling Interests in the net loss (income) of the consolidated VIEs and includes \$(30.3) million and \$2.8 million of (losses) gains recorded within appropriated partners' capital related to consolidated VIEs during the three months ended March 31, 2012 and 2011, respectively.
- (3) Reflects the remaining interest held by certain individuals who receive an allocation of income from certain of our capital markets entities and a private equity co-invest vehicle.

Initial Public Offering On April 4, 2011, the Company completed the initial public offering (IPO) of its Class A shares, representing limited liability company interests of the Company. Apollo Global Management, LLC received net proceeds from the IPO of approximately \$382.5 million, which were used to acquire additional AOG Units. As a result, Holdings' ownership interest in the Apollo Operating Group decreased from 70.7% to 66.5% and the Company's ownership interest increased from 29.3% to 33.5%. As such, the difference between the fair value of the consideration paid for the Apollo Operating Group level ownership interest and the book value on the date of the IPO is reflected in Additional Paid in Capital.

Net (income) loss attributable to Non-Controlling Interests in the Apollo Operating Group consisted of the following:

	Three Months Ended	
	March 31,	
	2012	2011
	(in thousands)	
Net income	\$ 431,141	\$ 251,105
Net income attributable to Non-Controlling Interests in consolidated entities	(119,702)	(156,951)
Net income after Non-Controlling Interests in consolidated entities	311,439	94,154
Adjustments:		
Income tax provision ⁽¹⁾	14,560	8,820
NYC UBT and foreign tax provision ⁽²⁾	(1,421)	(2,113)
Net loss (income) in non-Apollo Operating Group entities	198	(22,254)
Total adjustments	13,337	(15,547)
Net income after adjustments	324,776	78,607
Approximate ownership percentage of Apollo Operating Group ⁽³⁾	65.5%	70.7%
Net income attributable to Non-Controlling Interests in Apollo Operating Group	\$ 213,396	\$ 55,998

- (1) Reflects all taxes recorded in our condensed consolidated statements of operations. Of this amount, U.S. Federal, state and local corporate income taxes attributable to APO Corp. are added back to income (loss) of the Apollo Operating Group before calculating Non-Controlling Interests as the income (loss) allocable to the Apollo Operating Group is not subject to such taxes.
- (2) Reflects NYC UBT and foreign taxes that are attributable to the Apollo Operating Group and its subsidiaries related to its operations in the U.S. as partnerships and in non-U.S. jurisdictions as corporations. As such, these amounts are considered in the income (loss) attributable to the Apollo Operating Group.
- (3) This amount is calculated by applying the weighted average ownership percentage range of approximately 65.5% and 70.7% during the three months ended March 31, 2012 and 2011, respectively, to the condensed consolidated net income (loss) of the Apollo Operating Group before a corporate income tax provision and after allocations to the Non-Controlling Interests in consolidated entities.

Segment Analysis

Discussed below are our results of operations for each of our reportable segments. They represent the segment information available and utilized by our executive management, which consists of our Managing Partners, who operate collectively as our chief operating decision maker, to assess performance and to allocate resources. Management divides its operations into three reportable segments: private equity, capital markets and real estate. These segments were established based on the nature of investment activities in each fund, including the specific type of investment made, the frequency of trading, and the level of control over the investment. Segment results do not consider consolidation of funds, non-cash charges related to RSUs granted in connection with the 2007 private placement and equity-based compensation expense comprising amortization of AOG Units, income taxes, amortization of intangibles associated with the 2007 Reorganization and acquisitions and Non-Controlling Interests with the exception of allocations of income to certain individuals.

In addition to providing the financial results of our three reportable business segments, we further evaluate our individual reportable segments based on what we refer to as our Management Business and Incentive Business. Our Management Business is generally characterized by the predictability of its financial metrics, including revenues and expenses. The Management Business includes management fee revenues, advisory and transaction revenues, carried interest income from certain of our mezzanine funds and expenses, each of which we believe are more stable in nature. The financial performance of our Incentive Business is partially dependent upon quarterly mark-to-market unrealized valuations in

accordance with U.S. GAAP guidance applicable to fair value measurements. The Incentive Business

Edgar Filing: Apollo Global Management LLC - Form 10-Q

includes carried interest income, income from equity method investments and profit sharing expense that are associated with our general partner interests in the Apollo funds, which are generally less predictable and more volatile in nature.

Our financial results vary, since carried interest, which generally constitutes a large portion of the income from the funds that we manage, as well as the transaction and advisory fees that we receive, can vary significantly from quarter to quarter and year to year. As a result, we emphasize long-term financial growth and profitability to manage our business.

Private Equity

The following tables set forth our segment statement of operations information and our supplemental performance measure, ENI, for our private equity segment for the three months ended March 31, 2012 and 2011, respectively. ENI represents segment income (loss), excluding the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and equity-based compensation expense comprising amortization of AOG Units, (ii) income taxes, (iii) amortization of intangibles associated with the 2007 Reorganization and acquisitions and (iv) Non-Controlling Interest with the exception of allocations of income to certain individuals. In addition, segment data excludes the assets, liabilities and operating results of the Apollo funds and consolidated VIEs that are included in the condensed consolidated financial statements. ENI is not a U.S. GAAP measure.

- (1) Included in unrealized carried interest income from affiliates is reversal of \$34.1 million of the general partner obligation to return previously distributed carried interest income for Fund VI for the three months ended March 31, 2012. The general partner obligation is recognized based upon a hypothetical liquidation of the funds' net assets as of March 31, 2012. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of a fund's investments based on the contractual termination of the fund.

Revenues

Advisory and transaction fees from affiliates, including directors' fees and reimbursed broken deal costs, increased by \$10.8 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to an increase in transaction services rendered during the period. Gross advisory and transaction fees, including directors' fees, were \$65.1 million and \$42.5 million for the three months ended March 31, 2012 and 2011, respectively, an increase of \$22.6 million or 53.2%. The transaction fees earned during the three months ended March 31, 2012 primarily related to two portfolio investment transactions, specifically Rexnord Corporation and Taminco Group Holdings, which together generated \$29.6 million and \$10.7 million of gross and net transaction fees, respectively. Transaction fees earned during the three months ended March 31, 2011 primarily related to four portfolio investment transactions, specifically Brit Insurance, Alcan Engineering Products, Athlon Energy and Triton Holdings Ltd., which together generated \$17.5 million and \$5.6 million of gross and net transaction fees, respectively. The advisory fees earned during both periods were primarily generated by advisory and monitoring arrangements with several portfolio investments including LeverageSource, Realogy Corporation, Caesars Entertainment and Athene Holdings Ltd. and its affiliates, which generated gross and net fees of \$17.3 million and \$8.2 million, respectively, during the three months ended March 31, 2012 and gross and net fees of \$15.8 million and \$7.5 million, respectively, during the three months ended March 31, 2011. Advisory and transaction fees, including directors' fees, are reported net of Management Fee Offsets totaling \$38.9 million and \$26.3 million for the three

Edgar Filing: Apollo Global Management LLC - Form 10-Q

months ended March 31, 2012 and 2011, respectively, an increase of \$12.6 million or 47.9%. The net transaction and advisory fees were further offset by \$0.3 million and \$1.1 million in broken deal costs during the three months ended March 31, 2012 and 2011, primarily relating to Fund VII.

Management fees from affiliates increased by \$1.5 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to management fees of \$1.8 million earned from ANRP, which began paying fees during the third quarter of 2011 based on committed capital. This increase was offset by lower management fees earned from AAA Investments, Fund V and Fund VI, which collectively contributed to a decrease in management fees earned of \$0.3 million for the three months ended March 31, 2012 as compared to the same period in 2011.

Carried interest income from affiliates increased by \$6.3 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to an increase in realized carried interest income of \$3.5 million from dispositions along with higher interest and dividend income distributions from portfolio investments held during the period by Fund VI and AAA Investments of \$70.5 million and \$8.0 million, respectively, offset by decreases by Fund VII and Fund V of \$50.1 million and \$24.9 million, respectively, during the period. The remaining change relates to an increase in net unrealized carried interest income of \$2.8 million driven by increases in the fair values of the underlying portfolio investments held during the period by Fund VII and Fund V of \$214.3 and \$23.4 million, respectively, offset by decreases in the fair values of the underlying portfolio investments held during the period and reversal of previously recognized carried interest income by Fund VI, Fund IV and AAA of \$141.4 million, \$82.4 million and \$11.1 million, respectively. Included in the change in net unrealized carried interest income was a reversal of the general partner obligation to return previously distributed carried interest income for Fund VI of \$34.1 million during the three months ended March 31, 2012.

Expenses

Compensation and benefits expense increased by \$5.7 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily a result of a \$12.1 million increase in profit sharing expense driven by an increase in carried interest income earned by certain of our funds during the period along with the new performance-based incentive arrangement the Company adopted in June 2011 for certain Apollo partners and employees. Also, equity-based compensation increased by \$0.6 million during the period. These increases were offset by decreased salary, bonus and benefits expense of \$7.0 million due to the new performance based incentive arrangement, partially offset by increased headcount during the three months ended March 31, 2012 as compared to the same period in 2011.

Other expenses decreased by \$2.7 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to decreased professional fees of \$3.2 million due to lower external accounting, tax, audit, legal and consulting fees incurred during the period compared to 2011 when the Company incurred incremental costs related to the IPO.

Other Income

Income from equity method investments increased by \$14.8 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was driven by increases in the fair values of our private equity investments held, primarily relating to Apollo's ownership interest in Fund VII which resulted in increased income from equity method investments of \$13.7 million during the three months ended March 31, 2012 as compared to the same period in 2011.

Other income, net decreased by \$1.9 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to losses resulting from fluctuations in exchange rates of foreign denominated assets and liabilities of subsidiaries during the three months ended March 31, 2012 as compared to the same period in 2011.

Capital Markets

The following tables set forth segment statement of operations information and ENI, for our capital markets segment for the three months ended March 31, 2012 and 2011, respectively. ENI represents segment income (loss), excluding the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and equity-based compensation expense related to the amortization of AOG Units, (ii) income taxes, (iii) amortization of intangibles associated with the 2007 Reorganization and acquisitions and (iv) Non-Controlling Interest with the exception of allocations of income to certain individuals. In addition, segment data excludes the assets, liabilities and operating results of the Apollo funds and consolidated VIEs that are included in the condensed consolidated financial statements. ENI is not a U.S. GAAP measure.

The general partner obligation is recognized based upon a hypothetical liquidation of the funds' net assets as of March 31, 2012. The actual determination and any required payment of a general partner obligation would not take place until the final disposition of a fund's investments based on the contractual termination of the fund.

Revenues

Advisory and transaction fees from affiliates decreased by \$3.0 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. Gross advisory and transaction fees, including directors' fees, were \$6.4 million and \$10.1 million for the three months ended March 31, 2012 and 2011, respectively, a decrease of \$3.7 million or 36.6%. The transaction fees earned during both periods related to portfolio investments of FCI which generated gross and net fees of \$0.4 million and \$2.7 million during the three months ended March 31, 2012 and 2011, respectively. The advisory fees earned during both periods were primarily generated by deal activity related to investments in LeverageSource, which resulted in gross and net advisory fees of \$5.8 million and \$0.8 million, respectively, during the three months ended March 31, 2012 and gross and net fees of \$6.6 million and \$0.8 million, respectively, during the three months ended March 31, 2011. Advisory and transaction fees, including directors' fees, are reported net of Management Fee Offsets totaling \$5.0 million and \$5.8 million for the three months ended March 31, 2012 and 2011, respectively, a decrease of \$0.8 million or 13.8%.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Management fees from affiliates increased by \$9.3 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to management fees earned from Gulf Stream which was acquired during the fourth quarter of 2011 and generated \$3.1 million of fees during the three months ended March 31, 2012. In addition, increased asset allocation fees earned from Athene generated fees of \$2.2 million during the period, these fees are partially offset by a corresponding expense categorized as sub-advisory fees and included within professional fees expense. Furthermore, an increase in value of commitments in FCI and managed assets of AFT resulted in increased management fees earned of \$1.2 million and \$0.8 million, respectively, during the period. These increases were partially offset by decreased management fees earned by AINV of \$0.9 million as a result of a decrease in gross adjusted assets during the period. The remaining change was attributable to overall increased assets managed by the other capital markets funds which collectively contributed \$2.9 million to the increase in management fees during the period.

Carried interest income from affiliates increased by \$66.8 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was attributable to an increase in net unrealized carried interest income of \$60.0 million driven by increased net asset values primarily with respect to COF I, COF II, Gulf Stream and SOMA resulting in increased unrealized carried interest income of \$35.7 million, \$18.1 million, \$14.5 million and \$13.1 million, respectively, partially offset by decreased unrealized carried interest income attributable to EPF and ACLF of \$20.7 million and \$3.6 million, respectively, due to lower investment valuations during the period. Included in the change in unrealized carried interest income was a reversal of the general partner obligation to return previously distributed carried interest income with respect to SOMA of \$18.1 million during for the three months ended March 31, 2012. The remaining change was attributable to an increase in realized carried interest income earned during the period of \$6.8 million resulting from an increase in dividends and interest income on portfolio investments held by certain of our capital markets funds, primarily by COF I and COF II of \$5.7 million and \$3.1 million, respectively, offset by a decrease from AINV of \$2.9 million during the period.

Expenses

Compensation and benefits expense increased by \$15.9 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily a result of an \$18.3 million increase in profit sharing expense due to the favorable performance of certain of our capital markets funds during the period along with the new performance based incentive arrangement the Company adopted in June 2011 for certain Apollo partners and employees. In addition, equity-based compensation expense increased by \$4.6 million due to additional grants of RSUs subsequent to March 31, 2011, along with a \$3.1 million increase in salary, bonus and benefits due to an increase in headcount during the period. These increases were offset by decreased incentive fee compensation expense of \$10.1 million due to the performance of certain of our capital markets funds during the period.

Other Income

Net income from investment activities decreased by \$14.4 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was related to a decrease in unrealized income resulting from the change in the fair value of the investment in HFA during the three months ended March 31, 2012 as compared to the same period in 2011.

Income from equity method investments increased by \$8.6 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was driven by increases in the fair values of investments held by certain of our capital markets funds, primarily COF I, COF II and ACLF which resulted in increases in income from equity method investments of \$4.8 million, \$1.8 million and \$1.2 million, respectively, during the three months ended March 31, 2012 as compared to the same period in 2011.

Real Estate

The following tables set forth our segment statement of operations information and our supplemental performance measure, ENI, for our real estate segment for the three months ended March 31, 2012 and 2011, respectively. ENI represents segment income (loss), excluding the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and equity-based compensation expense comprising amortization of AOG Units, (ii) income taxes, (iii) amortization of intangibles associated with the 2007 Reorganization and acquisitions and (iv) Non-Controlling Interests. In addition, segment data excludes the assets, liabilities and operating results of the Apollo funds and consolidated VIEs that are included in the condensed consolidated financial statements. ENI is not a U.S. GAAP measure.

Revenues

Management fees increased by \$1.1 million for the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to increased management fees earned from AGRE CMBS Accounts (defined as AGRE CMBS Fund, L.P. together with the 2011 A4 Fund, L.P.) of \$1.0 million as a result of an increase in amortized cost of assets, and by ARI of \$0.3 million as a result of an increase in adjusted equity during the period. In addition, increased management fees were earned from AGRE Debt Fund I, L.P. of \$0.2 million and AGRE U.S. Real Estate Fund, L.P. of \$0.2 million as a result of an increase in net invested capital during the period. These increases were partially offset by decreased management fees earned by the CPI funds of \$0.6 million as a result of decreases in net invested capital during the period.

Additionally, there was realized carried interest income from affiliates of \$1.7 million earned from dispositions of portfolio investments held by CPI during the three months ended March 31, 2012.

Expenses

Compensation and benefits decreased by \$1.1 million during the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to a \$3.1 million decrease in salary, bonus and benefits expense due to headcount reduction and the Incentive Pool. These changes were partially offset by an increase in profit sharing expense of \$1.5 million due to the Incentive Pool along with an increase in equity-based compensation of \$0.5 million during the period.

Other expenses increased by \$1.5 million during the three months ended March 31, 2012 as compared to the three months ended March 31, 2011. This change was primarily attributable to increased professional fees of \$1.0 million due to higher external accounting, tax, audit, legal and consulting fees incurred during the period.

Summary Combined Segment Results for Management Business and Incentive Business

The following tables combine our reportable segments' statements of operations information and supplemental performance measure, ENI, for our Management Business and Incentive Business for the three months ended March 31, 2012 and 2011, respectively. ENI represents segment income (loss), excluding the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and equity-based compensation expense comprising amortization of AOG Units, (ii) income taxes, (iii) amortization of intangibles associated with the 2007 Reorganization and acquisitions and (iv) Non-Controlling with the exception of allocations of income to certain individuals. In addition, segment data excludes the assets, liabilities and operating results of the Apollo funds and consolidated VIEs that are included in the condensed consolidated financial statements. ENI is not a U.S. GAAP measure.

In addition to providing the financial results of our three reportable business segments, we evaluate our reportable segments based on what we refer to as our Management Business and Incentive Business. Our Management Business is generally characterized by the predictability of its financial metrics, including revenues and expenses. This business includes management fee revenues, advisory and transaction fee revenues, carried interest income from certain of our mezzanine funds and expenses, each of which we believe are more stable in nature.

(1) Excludes professional fees related to the consolidated funds.

(2) Excludes general and administrative expenses related to the consolidated funds.

Our Incentive Business is dependent upon quarterly mark-to-market unrealized valuations made in accordance with U.S. GAAP guidance applicable to fair value measurements. The Incentive Business includes carried interest income, income from equity method investments, profit sharing expenses and incentive fee compensation that are associated with our general partner interests in the Apollo funds, which are generally less predictable and more volatile in nature.

- (1) Included in unrealized carried interest income from affiliates is reversal of \$34.1 and \$18.1 million of the general partner obligation to return previously distributed carried interest income or fees with respect to Fund VI and SOMA for the three months ended March 31, 2012, respectively. The general partner obligation is recognized based upon a hypothetical liquidation of the funds' net assets as of March 31, 2012. The actual determination and any required payment of any such general partner obligation would not take place until the final disposition of a fund's investments based on the contractual termination of the fund.
- (2) Excludes investment income and net gains (losses) from investment activities related to consolidated funds and the consolidated VIEs.

Summary

Below is the summary of our total reportable segments including Management Business and Incentive Business and a reconciliation of Economic Net Income to Net Income attributable to Apollo Global Management, LLC reported in our condensed consolidated statements of operations:

	For the Three Months Ended March 31,	
	2012	2011
	(in thousands)	
Revenues	\$ 790,850	\$ 696,342
Expenses	386,516	367,290
Other income	59,062	51,225
Non-Controlling Interests	(1,409)	(3,638)
Economic Net Income	461,987	376,639
Non-cash charges related to equity-based compensation	(129,933)	(270,413)
Income tax provision	(14,560)	(8,820)
Net income attributable to Non-Controlling Interests in Apollo Operating Group	(213,396)	(55,998)
Amortization of intangible assets	(6,055)	(3,252)
Net Income Attributable to Apollo Global Management, LLC	\$ 98,043	\$ 38,156

Liquidity and Capital Resources**Historical**

Although we have managed our historical liquidity needs by looking at deconsolidated cash flows, our historical condensed consolidated statements of cash flows reflects the cash flows of Apollo, as well as those of our consolidated Apollo funds.

The primary cash flow activities of Apollo are:

Generating cash flow from operations;

Making investments in Apollo funds;

Meeting financing needs through credit agreements; and

Distributing cash flow to equity holders and Non-Controlling Interests.

Primary cash flow activities of the consolidated Apollo funds are:

Raising capital from their investors, which have been reflected historically as Non-Controlling Interests of the consolidated subsidiaries in our financial statements;

Using capital to make investments;

Generating cash flow from operations through distributions, interest and the realization of investments; and

Distributing cash flow to investors.

-99-

While primarily met by cash flows generated through fee income and carried interest income received, working capital needs have also been met (to a limited extent) through borrowings as follows:

	March 31, 2012		December 31, 2011	
	Outstanding Balance	Annualized Weighted Average Interest Rate	Outstanding Balance	Annualized Weighted Average Interest Rate
AMH Credit Agreement	\$ 728,273	6.06% ⁽¹⁾	\$ 728,273	5.39% ⁽¹⁾
CIT secured loan agreement	10,018	3.61%	10,243	3.39%
Total Debt	\$ 738,291	6.02%	\$ 738,516	5.35%

(1) Includes the effect of interest rate swaps.

We determine whether to make capital commitments to our private equity funds in excess of our minimum required amounts based on a variety of factors, including estimates regarding our liquidity resources over the estimated time period during which commitments will have to be funded, estimates regarding the amounts of capital that may be appropriate for other funds that we are in the process of raising or are considering raising, and our general working capital requirements.

We have made one or more distributions to our Managing Partners and Contributing Partners, representing all of the undistributed earnings generated by the businesses contributed to the Apollo Operating Group prior to the private offering transactions that occurred in 2007 pursuant to which the Company sold shares to certain initial purchasers and accredited investors in transactions exempt from the registration requirements of the Securities Act of 1933, as amended (the Private Offering Transactions). For this purpose, income attributable to carried interest on private equity funds related to either carry-generating transactions that closed prior to the Private Offering Transactions which closed in July 2007 or carry-generating transactions to which a definitive agreement was executed, but that did not close, prior to the Private Offering Transactions are treated as having been earned prior to the Private Offering Transactions.

Cash Flows

Significant amounts from our condensed consolidated statements of cash flows for the three months ended March 31, 2012 and 2011 are summarized and discussed within the table and corresponding commentary below:

	Three Months Ended	
	March 31, 2012	March 31, 2011
	(in thousands)	
Operating Activities	\$ (290,184)	\$ 906,383
Investing Activities	1,660	(45,229)
Financing Activities	189,029	(783,579)
Net (Decrease) Increase in Cash and Cash Equivalents	\$ (99,495)	\$ 77,575

Operating Activities

Net cash used in operating activities was \$290.2 million during the three months ended March 31, 2012. During this period, there was \$431.1 million in net income, to which \$148.9 million of equity-based compensation, a non-cash expense, was added to reconcile net income to net cash used in operating activities. Additional adjustments to reconcile cash used in operating activities during the three months ended March 31, 2012 included \$499.5 million in proceeds from sales of investments primarily held by the consolidated VIEs, a \$215.9 million increase in profit sharing payable, \$88.6 million of unrealized losses on debt of the consolidated VIEs, a \$62.1 million increase in other liabilities of the consolidated VIEs and \$50.0 million in distributions from investment activities. These favorable cash adjustments were offset by \$884.9 million of net purchases of investments held by the consolidated VIEs, \$224.2 million in net unrealized gains from investments primarily held by the consolidated funds and VIEs, a \$99.9 million increase in cash held at consolidated VIEs, a \$68.9 million decrease in due to affiliates and a

Edgar Filing: Apollo Global Management LLC - Form 10-Q

\$501.2 million increase in carried interest receivable. The increase in our carried interest receivable balance during the

-100-

three months ended March 31, 2012 was driven primarily by a \$570.1 million increase of carried interest income from the change in fair value of funds for which we act as general partner, offset by fund cash distributions of \$70.5 million.

Net cash provided by operating activities was \$906.4 million during the three months ended March 31, 2011. During this period, there was \$251.1 million in net income, to which \$283.6 million of equity-based compensation, a non-cash expense, was added to reconcile net income to net cash provided by operating activities. Additional adjustments to reconcile cash provided by operating activities during the three months ended March 31, 2011 included a \$167.7 million increase in profit sharing payable, \$985.1 million of sales of investments held by the consolidated VIEs, \$49.9 million of unrealized losses on debt of the consolidated VIEs, a \$23.2 million decrease in cash held by consolidated VIEs and a \$22.6 million decrease in other assets of the consolidated VIEs. These favorable cash adjustments were offset by \$172.2 million of net unrealized gains from investment activities of consolidated funds and the consolidated VIEs, \$41.8 million of realized gains on debt of the consolidated VIEs, \$342.1 million purchases of investments relating to the consolidated VIEs, and a \$366.6 million increase in our carried interest receivable. The increase in our carried interest receivable balance during the three months ended March 31, 2011 was driven by \$558.8 million of carried interest income from the change in fair value of funds for which we act as general partner, offset by fund cash distributions of \$193.3 million.

The operating cash flow amounts from the Apollo funds and consolidated VIEs represent the significant variances between net income (loss) and cash flow from operations and were classified as operating activities pursuant to the American Institute of Certified Public Accountants, or AICPA, Audit and Accounting Guide, Investment Companies. The increasing capital needs reflect the growth of our business while the fund-related requirements vary based upon the specific investment activities being conducted at a point in time. These movements do not adversely affect our liquidity or earnings trends because we currently have sufficient cash reserves compared to planned expenditures.

Investing Activities

Net cash provided by investing activities was \$1.7 million for the three months ended March 31, 2012, which was primarily comprised of \$13.6 million of cash distributions from equity method investments offset by \$12.0 million of cash contributions to equity method investments. Cash contributions to equity method investments were primarily related to Fund VII and ACSP, L.P. Cash distributions from equity method investments were primarily related to Fund VII and ACLF.

Net cash used in investing activities was \$45.2 million for the three months ended March 31, 2011, which was primarily comprised of \$12.4 million of cash contributions to equity method investments and the purchase of a \$52.1 million investment in HFA, offset by \$21.9 million of cash distributions from equity method investments. Cash contributions to equity method investments were primarily related to Fund VII and AGRE U.S. Real Estate Fund, L.P. Cash distributions from equity method investments were primarily related to Fund VII, ACLF, COF II, EPF and Vantium C.

Financing Activities

Net cash provided by financing activities was \$189.0 million for the three months ended March 31, 2012, which was primarily comprised of \$425.7 million of debt issued by consolidated VIEs offset by \$110.4 million of distributions paid to Non-Controlling Interests in the Apollo Operating Group, \$61.2 million in distributions, \$50.3 million related to the purchase of AAA shares, and \$17.0 million related to employee tax withholding payments in connection with deliveries of Class A shares in settlement of RSUs.

Net cash used in financing activities was \$783.6 million for the three months ended March 31, 2011, which was primarily comprised of \$412.1 million in repayment of term loans by consolidated VIEs, \$300.9 million in distributions by consolidated VIEs, \$40.8 million of dividends paid to Non-Controlling Interests in the Apollo Operating Group, \$17.4 million in dividends and \$9.0 million related to employee tax withholding payments in connection with deliveries of Class A shares in settlement of RSUs.

Distributions

The table below presents the declaration, payment and determination of the amount of quarterly distributions which are at the sole discretion of the Company (in millions, except per share amounts):

Distribution Declaration Date	Distribution per Class A Share Amount	Distribution Payment Date	Distribution to AGM Class A Shareholders	Distribution to Non-Controlling Interest	Total Distribution from Apollo Operating Group	Distribution Equivalents on Participating Securities
				Holders in the Apollo Operating Group		
January 4, 2011	0.17	January 14, 2011	\$ 16.6	\$ 40.8	\$ 57.4	\$ 3.3
May 12, 2011	0.22	June 1, 2011	26.8	52.8	79.6	4.7
August 9, 2011	0.24	August 29, 2011	29.5	57.6	87.1	5.1
November 3, 2011	0.20	December 2, 2011	24.8	48.0	72.8	4.3
February 12, 2012	0.46	February 29, 2012	58.1	110.4	168.5	10.3

Future Cash Flows

Our ability to execute our business strategy, particularly our ability to increase our AUM, depends on our ability to establish new funds and to raise additional investor capital within such funds. Our liquidity will depend on a number of factors, such as our ability to project our financial performance, which is highly dependent on our funds and our ability to manage our projected costs, fund performance, having access to credit facilities, being in compliance with existing credit agreements, as well as industry and market trends. Also, during economic downturns, the funds we manage might experience cash flow issues or liquidate entirely. In these situations we might be asked to reduce or eliminate the management fee and incentive fees we charge. As was the situation with AIE I, this could adversely impact our cash flow in the future.

For example, the investment performance of AIE I was adversely impacted due to market conditions in 2008 and early 2009, and on July 10, 2009, its shareholders subsequently approved a monetization plan. The primary objective of the monetization plan is to maximize shareholder recovery value by (i) opportunistically selling AIE I's assets over a three-year period from July 2009 to July 2012 and (ii) reducing the overall costs of the fund. The Company waived management fees of \$12.6 million for the year ended December 31, 2008 and an additional \$2.0 million for the year ended December 31, 2009 to limit the adverse impact that deteriorating market conditions were having on AIE I's performance. As a result of the monetization plan, we expect AIE I to have adequate cash flow to satisfy its obligations as they come due, therefore, we do not anticipate any additional fee waivers for AIE I in the future. The Company continues to charge AIE I management fees at a reduced rate of 1.5% of the net assets of AIE I. Prior to the monetization plan, the management fees were based on 2.0% of the gross assets of AIE I. The Company has no future plans to waive additional management fees charged to AIE I or to lower the current management fee arrangement. Management currently intends to proceed with the plan for the orderly wind down of AIE I as approved by the shareholders. However, these plans are subject to revision in the event future facts and circumstances present a more favorable solution for AIE I and its shareholders, as determined in good faith by management.

In addition, in April 2010 we announced a strategic relationship agreement with CalPERS, whereby we agreed to reduce management fees and other fees charged to CalPERS on funds we manage, or in the future will manage, solely for CalPERS by \$125.0 million over a five-year period or as close a period as required to provide CalPERS with that benefit. In March 2012, the Company received a notice of withdrawal from CalPERS, to withdraw a total of \$400 million from SOMA. We currently expect the capital to be distributed over the next several years.

An increase in the fair value of our funds' investments, by contrast, could favorably impact our liquidity through higher management fees where the management fees are calculated based on the net asset value, gross assets and adjusted assets. Additionally, higher carried interest income would generally result when investments appreciate over their cost basis which would not have an impact on the Company's cash flow.

The Company did not grant any RSUs to its employees during the three months ended March 31, 2012, however, grants made in previous years will impact the Company's compensation expense as these grants are amortized over their vesting term of three to six years. The Company expects to incur annual compensation expenses on all grants, net of forfeitures, of approximately \$74.5 million during the remainder of 2012 and \$70.1 million, \$24.6 million, \$8.8 million and \$6.6 million during the years ended December 31, 2013, 2014, 2015 and 2016 respectively.

Although Apollo Global Management, LLC expects to pay distributions according to our distribution policy, we may not pay distributions according to our policy, or at all, if, among other things, we do not have the cash necessary to pay the intended distributions. To the extent we do not have cash on hand sufficient to pay distributions, we may have to borrow funds to pay distributions, or we may determine not to pay distributions. The declaration, payment and determination of the amount of our quarterly distributions is at the sole discretion of our manager.

Carried interest income from our funds can be distributed to us on a current basis, but is subject to repayment by the subsidiary of the Apollo Operating Group that acts as general partner of the fund in the event that certain specified return thresholds are not ultimately achieved. The Managing Partners, Contributing Partners and certain other investment professionals have personally guaranteed, to the extent of their ownership interest, subject to certain limitations, the obligations of these subsidiaries in respect of this general partner obligation. Such guarantees are several and not joint and are limited to a particular Managing Partner's or Contributing Partner's distributions. Pursuant to the shareholders agreement dated July 13, 2007, we agreed to indemnify each of our Managing Partners and certain Contributing Partners against all amounts that they pay pursuant to any of these personal guarantees in favor of Fund IV, Fund V and Fund VI (including costs and expenses related to investigating the basis for or objecting to any claims made in respect of the guarantees) for all interests that our Managing Partners and Contributing Partners have contributed or sold to the Apollo Operating Group.

Accordingly, in the event that our Managing Partners, Contributing Partners and certain investment professionals are required to pay amounts in connection with a general partner obligation for the return of previously distributed carried interest income with respect to Fund IV, Fund V and Fund VI, we will be obligated to reimburse our Managing Partners and certain Contributing Partners for the indemnifiable percentage of amounts that they are required to pay even though we did not receive the distribution to which that general partner obligation related.

On May 8, 2012, the Company declared a cash distribution of \$0.25 per Class A share, which will be paid on May 30, 2012 to holders of record on May 21, 2012.

Distributions to Managing Partners and Contributing Partners

The three Managing Partners who became employees of Apollo on July 13, 2007, are each entitled to a \$100,000 base salary. Additionally, our Managing Partners can receive other forms of compensation. Any additional consideration will be paid to them in their proportional ownership interest in Holdings. Additionally, 85% of any tax savings APO Corp. recognizes as a result of the tax receivable agreement will be paid to any exchanging or selling Managing Partners.

It should be noted that subsequent to the 2007 Reorganization, the Contributing Partners retained ownership interests in subsidiaries of the Apollo Operating Group. Therefore, any distributions that flow up to management or general partner entities in which the Contributing Partners retained ownership interests are shared pro rata with the Contributing Partners who have a direct interest in such entities prior to flowing up to the Apollo Operating Group. These distributions are considered compensation expense post-Reorganization.

The Contributing Partners are entitled to receive the following:

Profit Sharing private equity carried interest income, from direct ownership of advisory entities. Any changes in fair value of the underlying fund investments would result in changes to Apollo Global Management, LLC's profit sharing payable.

Net Management Fee Income distributable cash determined by the general partner of each management company, from direct ownership of the management company entity. The Contributing Partners will continue to receive net management fee income payments based on the interests they retained in management companies directly. Such payments are treated as compensation expense post-2007 Reorganization as described above.

Any additional consideration will be paid to them based on their proportional ownership interest in Holdings.

No base compensation is paid to the Contributing Partners from the Company, but they are entitled to a monthly draw.

Additionally, 85% of any tax savings APO Corp. recognizes as a result of the tax receivable agreement will be paid to any exchanging or selling Contributing Partner.

Potential Future Costs

We may make grants of RSUs or other equity-based awards to employees and independent directors that we appoint in the future.

Critical Accounting Policies

This Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon the condensed consolidated financial statements, which have been prepared in accordance with U.S. GAAP. We also report segment information from our condensed consolidated statements of operations and include a supplemental performance measure, ENI, for our private equity, capital markets and real estate segments. ENI represents segment income (loss) excluding the impact of (i) non-cash charges related to RSUs granted in connection with the 2007 private placement and equity-based compensation expense comprising amortization of AOG Units, (ii) income taxes, (iii) amortization of intangibles associated with the 2007 Reorganization as well as acquisitions and (iv) Non-Controlling Interests excluding the remaining interest held by certain individuals who receive an allocation of income from a private equity co-investment vehicle and certain of our capital markets management companies. In addition, segment data excludes the assets, liabilities and operating results of the Apollo funds and consolidated VIEs that are included in the condensed consolidated financial statements. ENI is not a U.S. GAAP measure.

The preparation of financial statements in accordance with U.S. GAAP requires the use of estimates and assumptions that could affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses. Actual results could differ from these estimates. A summary of our significant accounting policies is presented in our condensed consolidated financial statements. The following is a summary of our accounting policies that are affected most by judgments, estimates and assumptions.

Consolidation

Apollo consolidates those entities it controls through a majority voting interest or through other means, including those funds for which the general partner is presumed to have control (i.e. AAA and Apollo Credit Senior Loan Fund, L.P.). Apollo also consolidates entities that are VIEs for which Apollo is the primary beneficiary. Under the amended consolidation rules, an enterprise is determined to be the primary beneficiary if it holds a controlling financial interest. A controlling financial interest is defined as (a) the power to direct the activities of a VIE that most significantly impact the entity's business and (b) the obligation to absorb losses of the entity or the right to receive benefits from the entity that could potentially be significant to the VIE.

Certain of our subsidiaries hold equity interests in and/or receive fees qualifying as variable interests from the funds that the Company manages. The amended consolidation rules require an analysis to determine whether (a) an entity in which Apollo holds a variable interest is a VIE and (b) Apollo's involvement, through holding interests directly or indirectly in the entity or contractually through other variable interests (e.g., carried interest and management fees), would give it a controlling financial interest. When the VIE has qualified for the deferral of the amended consolidation rules in accordance with U.S. GAAP, the analysis is based on previous consolidation rules, which require an analysis to determine whether (a) an entity in which Apollo holds a variable interest is a VIE and (b) Apollo's involvement, through holding interests directly or indirectly in the entity or contractually through other variable interests (e.g., carried interest and management fees), would be expected to absorb a majority of the variability of the entity.

Under both the previous and amended consolidation rules, the determination of whether an entity in which Apollo holds a variable interest is a VIE requires judgments which include determining whether the equity investment at risk is sufficient to permit the entity to finance its activities without additional subordinated financial support, evaluating whether the equity holders, as a group, can make decisions that have a significant effect on the success of the entity, determining whether two or more parties' equity interests should be aggregated, and determining whether the equity investors have proportionate voting rights to their obligations to absorb losses or rights to receive returns from an entity. Under both the previous and amended consolidation rules, Apollo determines whether it is the primary beneficiary of a VIE at the time it becomes involved with a VIE and reconsiders that conclusion continuously. The consolidation analysis can generally be performed qualitatively. However, if it is not readily apparent whether Apollo is the primary beneficiary, a quantitative expected losses and expected residual returns calculation will be performed. Investments and redemptions (either by Apollo, affiliates of Apollo or third parties) or amendments to the governing documents of the respective Apollo fund may affect an entity's status as a VIE or the determination of the primary beneficiary.

Apollo assesses whether it is the primary beneficiary and will consolidate or deconsolidate the entity accordingly. Performance of that assessment requires the exercise of judgment. Where the variable interests have qualified for the deferral, judgments are made in estimating cash flows in evaluating which member within the equity group absorbs a majority of the expected profits or losses of the VIE. Where the variable interests have not qualified for the deferral, judgments are made in determining whether a member in the equity group has a controlling financial interest including power to direct activities that most significantly impact the VIE's economic performance and rights to receive benefits or obligations to absorb losses that are potentially significant to the VIE. Under both guidelines, judgment is made in evaluating the nature of the relationships and activities of the parties involved in determining which party within a related-party group is most closely associated with a VIE. The use of these judgments has a material impact to certain components of Apollo's condensed consolidated financial statements.

Assets and liability amounts of the consolidated VIEs are shown in separate sections within the condensed consolidated statements of financial condition.

Additional disclosures regarding VIEs are set forth in note 4 to our condensed consolidated financial statements. Inter-company transactions and balances, if any, have been eliminated in the consolidation.

Revenue Recognition

Carried Interest Income from Affiliates. We earn carried interest income from our funds as a result of such funds achieving specified performance criteria. Such carried interest income generally is earned based upon a fixed percentage of realized and unrealized gains of various funds after meeting any applicable hurdle rate or threshold minimum. Carried interest income from certain of the funds that we manage is subject to contingent repayment and is generally paid to us as particular investments made by the funds are realized. If, however, upon liquidation of a fund, the aggregate amount paid to us as carried interest exceeds the amount actually due to us based upon the aggregate performance of the fund, the excess (in certain cases net of taxes) is required to be returned by us to that fund. For a majority of our capital markets funds, once the annual carried interest income has been determined, there generally is no look-back to prior periods for a potential contingent repayment, however, carried interest income on certain other capital markets funds can be subject to contingent repayment at the end of the life of the fund. We have elected to adopt Method 2 from U.S. GAAP guidance applicable to accounting for management fees based on a formula, and under this method, we accrue carried interest income quarterly based on fair value of the underlying investments and separately assess if contingent repayment is necessary. The determination of carried interest income and contingent repayment considers both the terms of the respective partnership agreements and the current fair value of the underlying investments within the funds. Estimates and assumptions are made when determining the fair value of the underlying investments within the funds and could vary depending on the valuation methodology that is used. Refer to note 5 to our condensed consolidated financial statements for disclosure of the amounts of carried interest income (loss) from affiliates that was generated from realized versus unrealized losses. See *Investments, at Fair Value* below for further discussion related to significant estimates and assumptions used for determining fair value of the underlying investments in our capital markets, private equity and real estate funds.

Management Fees from Affiliates. The management fees related to our private equity funds are generally based on a fixed percentage of the committed capital or invested capital. The corresponding fee calculations that consider committed capital or invested capital are both objective in nature and therefore do not require the use of significant estimates or assumptions. Management fees related to our capital markets funds, by contrast, can be based on net asset value, gross assets, adjusted cost of all unrealized portfolio investments, capital commitments, adjusted assets, or capital contributions, all as defined in the respective partnership agreements. The capital markets management fee calculations that consider net asset value, gross assets, adjusted cost of all unrealized portfolio investments and adjusted assets, are normally based on the terms of the respective partnership agreements and the current fair value of the underlying investments within the funds. Estimates and assumptions are made when determining the fair value of the underlying investments within the funds and could vary depending on the valuation methodology that is used. The management fees related to our real estate funds are generally based on a specific percentage of the funds' stockholders' equity or committed or net invested capital or the capital accounts of the limited partners. See *Investments, at Fair Value* below for further discussion related to significant estimates and assumptions used for determining fair value of the underlying investments in our capital markets and private equity funds.

Investments, at Fair Value

The Company follows U.S. GAAP attributable to fair value measurements, which among other things, requires enhanced disclosures about investments that are measured and reported at fair value. Investments, at fair value, represent investments of the consolidated funds, investments of the consolidated VIEs and certain financial instruments for which the fair value option was elected and the unrealized gains and losses resulting from changes in the fair value are reflected as net gains (losses) from investment activities and net gains (losses) from investment activities of the consolidated variable interest entities, respectively, in the condensed consolidated statements of operations. In accordance with U.S. GAAP, investments measured and reported at fair value are classified and disclosed in one of the following categories:

Level I Quoted prices are available in active markets for identical investments as of the reporting date. The type of investments included in Level I include listed equities and listed derivatives. As required by U.S. GAAP, the Company does not adjust the quoted price for these investments, even in situations where the Company holds a large position and the sale of such position would likely deviate from the quoted price.

Level II Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Investments that are generally included in this category include corporate bonds and loans, less liquid and restricted equity securities and certain over-the-counter derivatives where the fair value is based on observable inputs. These investments exhibit higher levels of liquid market observability as compared to Level III investments. The Company subjects broker quotes to various criteria in making the determination as to whether a particular investment would qualify for treatment as a Level II investment. These criteria include, but are not limited to, the number and quality of broker quotes, the standard deviation of obtained broker quotes, and the percentage deviation from independent pricing services.

Level III Pricing inputs are unobservable for the investment and includes situations where there is little observable market activity for the investment. The inputs into the determination of fair value may require significant management judgment or estimation. Investments that are included in this category generally include general and limited partnership interests in corporate private equity and real estate funds, mezzanine funds, funds of hedge funds, distressed debt and non-investment grade residual interests in securitizations and collateralized debt obligations where the fair value is based on observable inputs as well as unobservable inputs. When a security is valued based on broker quotes, the Company subjects those quotes to various criteria in making the determination as to whether a particular investment would qualify for treatment as a Level II or Level III investment. Some of the factors we consider include the number of broker quotes we obtain, the quality of the broker quotes, the standard deviations of the observed broker quotes and the corroboration of the broker quotes to independent pricing services.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment where the fair value is based on unobservable inputs.

In cases where an investment or financial instrument measured and reported at fair value is transferred into or out of Level III of the fair value hierarchy, the Company accounts for the transfer as of the end of the reporting period.

Equity Method Investments. For investments in entities over which the Company exercises significant influence but which do not meet the requirements for consolidation, the Company uses the equity method of accounting, whereby the Company records its share of the underlying income or loss of such entities. Income (loss) from equity method investments is recognized as part of other income (loss) in the condensed consolidated statements of operations and income (loss) on available-for-sale securities (from equity method investments) is recognized as part of other comprehensive income (loss), net of tax in the condensed consolidated statements of comprehensive income (loss). The carrying amounts of equity method investments are reflected in investments in the condensed consolidated statements of financial condition. As the underlying entities that the Company manages and invests in are, for U.S. GAAP purposes, primarily investment companies which reflect their investments at estimated fair value, the carrying value of the Company's equity method investments in such entities are at fair value.

Private Equity Investments. The majority of the investments within our private equity funds are valued using the market approach, which provides an indication of fair value based on a comparison of the subject Company to comparable publicly traded companies and transactions in the industry.

Market Approach. The market approach is driven by current market conditions, including actual trading levels of similar companies and, to the extent available, actual transaction data of similar companies. Judgment is required by management when assessing which companies are similar to the subject company being valued. Consideration may also be given to any of the following factors: (1) the subject company's historical and projected financial data; (2) valuations given to comparable companies; (3) the size and scope of the subject company's operations; (4) the subject company's individual strengths and weaknesses; (5) expectations relating to the market's receptivity to an offering of the subject company's securities; (6) applicable restrictions on transfer; (7) industry and market information; (8) general economic conditions; and (9) other factors deemed relevant. Market approach valuation models typically employ a multiple that is based on one or more of the factors described above. Sources for gaining additional knowledge related to comparable companies include public filings, annual reports, analyst research reports, and press releases. Once a comparable company set is determined, we review certain aspects of the subject company's performance and determine how its performance compares to the group and to certain individuals in the group. We compare certain measurements such as EBITDA margins, revenue growth over certain time periods, leverage ratios, and growth opportunities. In addition, we compare our entry multiple and its relation to the comparable set at the time of acquisition to understand its relation to the comparable set on each measurement date.

Income Approach. For investments where the market approach does not provide adequate fair value information, we rely on the income approach. The income approach is also used to value investments or validate the market approach within our private equity funds. The income approach provides an indication of fair value based on the present value of cash flows that a business or security is expected to generate in the future. The most widely used methodology used in the income approach is a discounted cash flow method. Inherent in the discounted cash flow method are significant assumptions related to the subject company's expected results and a calculated discount rate, which is normally based on the subject company's weighted average cost of capital, or WACC. The WACC represents the required rate of return on total capitalization, which is comprised of a required rate of return on equity, plus the current tax-effected rate of return on debt, weighted by the relative percentages of equity and debt that are typical in the industry. The most critical step in determining the appropriate WACC for each subject company is to select companies that are comparable in nature to the subject company. Sources for gaining additional

knowledge about the comparable companies include public filings, annual reports, analyst research reports, and press releases. The general formula then used for calculating the WACC considers the after-tax rate of return on debt capital and the rate of return on common equity capital, which further considers the risk-free rate of return, market beta, market risk premium and small stock premium, if applicable. The variables used in the WACC formula are inferred from the comparable market data obtained. The Company evaluates the comparable companies selected and concludes on WACC inputs based on the most comparable company or analyzes the range of data for the investment.

The value of liquid investments, where the primary market is an exchange (whether foreign or domestic) is determined using period end market prices. Such prices are generally based on the close price on the date of determination.

Apollo utilizes a valuation committee consisting of members from senior management that reviews and approves the valuation results related to our private equity investments. Management also retains independent valuation firms to provide third-party valuation consulting services to Apollo, which consist of certain limited procedures that management identifies and requests them to perform. The limited procedures provided by the independent valuation firms assist management with validating their valuation results or determining fair value. However, because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the investments existed, and the differences could be material.

Capital Markets Investments. The majority of investments in Apollo's capital markets funds are valued based on valuation models and quoted market prices. Debt and equity securities that are not publicly traded or whose market prices are not readily available are valued at fair value utilizing recognized pricing services, market participants or other sources. The capital markets funds also enter into foreign currency exchange contracts, credit default swap contracts, and other derivative contracts, which may include options, caps, collars and floors. Foreign currency exchange contracts are marked-to-market by recognizing the difference between the contract exchange rate and the current market rate as unrealized appreciation or depreciation. If securities are held at the end of this period, the changes in value are recorded in income as unrealized. Realized gains or losses are recognized when contracts are settled. Credit default swap contracts are recorded at fair value as an asset or liability with changes in fair value recorded as unrealized appreciation or depreciation. Realized gains or losses are recognized at the termination of the contract based on the difference between the close-out price of the credit default contract and the original contract price.

Forward contracts are valued based on market rates obtained from counterparties or prices obtained from recognized financial data service providers. When determining fair value pricing when no observable market value exists, the value attributed to an investment is based on the enterprise value at the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Valuation approaches used to estimate the fair value of illiquid investments included in Apollo's capital markets investments also may include the market approach and the income approach, as previously described above.

Apollo also utilizes a valuation committee that reviews and approves the valuation results related to our capital markets investments. Management performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analysis.

Real Estate Investments. For the CMBS portfolio of Apollo's funds, the estimated fair value of the AAA-rated CMBS portfolio is determined by reference to market prices provided by certain dealers who make a market in these financial instruments. Broker quotes are only indicative of fair value and may not necessarily represent what the funds would receive in an actual trade for the applicable instrument. Additionally, the loans held-for-investment are stated at the principal amount outstanding, net of deferred loan fees and costs. For AGRE's opportunistic and value added real estate funds, valuations of non-marketable underlying investments are determined using methods that include, but are not limited to (i) discounted cash flow estimates or comparable analysis prepared internally, (ii) third party appraisals or valuations by qualified real estate appraisers, and (iii) contractual sales value of investments/properties subject to bona fide purchase contracts. Methods (i) and (ii) also incorporate consideration of the use of the income, cost, or sales comparison approaches of estimating property values.

Apollo also utilizes a valuation committee that reviews and approves the valuation results related to our real estate investments. Management performs various back-testing procedures to validate their valuation approaches, including comparisons between expected and observed outcomes, forecast evaluations and variance analysis.

The fair values of the investments in our private equity, capital markets and real estate funds can be impacted by changes to the assumptions used in the underlying valuation models. For further discussion on the impact of changes to valuation assumptions refer to Item 7A. Quantitative and Qualitative Disclosures About Market Risk Sensitivity in our Form 10-K for the year ended December 31, 2011 filed with the SEC on March 9, 2012. There have been no material changes to the underlying valuation models during the periods that our financial results are presented.

Fair Value of Financial Instruments

U.S. GAAP guidance requires the disclosure of the estimated fair value of financial instruments. The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Except for the Company's debt obligation related to the AMH Credit Agreement (as defined in note 8 to the condensed consolidated financial statements), Apollo's financial instruments are recorded at fair value or at amounts whose carrying value approximates fair value. See

Investments, at Fair Value above. While Apollo's valuations of portfolio investments are based on assumptions that Apollo believes are reasonable under the circumstances, the actual realized gains or losses will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may ultimately differ significantly from the assumptions on which the valuations were based. Other financial instruments' carrying values generally approximate fair value because of the short-term nature of those instruments or variable interest rates related to the borrowings. As disclosed in note 8, the Company's long term debt obligation related to the AMH Credit Agreement is believed to have an estimated fair value of approximately \$784.6 million based on a yield analysis using available market data of comparable securities with similar terms and remaining maturities as of March 31, 2012. However, the carrying value that is recorded on the condensed consolidated statements of financial condition is the amount for which we expect to settle the long term debt obligation.

Valuation of Financial Instruments held by Consolidated VIEs

The consolidated VIEs hold investments that are traded over-the-counter. Investments in securities that are traded on a securities exchange or comparable over-the-counter quotation systems are valued based on the last reported sale price at that date. If no sales of such investments are reported on such date, and in the case of over-the-counter securities or other investments for which the last sale date is not available, valuations are based on independent market quotations obtained from market participants, recognized pricing services or other sources deemed relevant, and the prices are based on the average of the bid and ask prices, or at ascertainable prices at the close of business on such day. Market quotations are generally based on valuation pricing models or market transactions of similar securities adjusted for security-specific factors such as relative capital structure priority and interest and yield risks, among other factors.

The consolidated VIEs also have debt obligations that are recorded at fair value. The valuation approach used to estimate the fair values of debt obligations is the discounted cash flow method, which includes consideration of the cash flows of the debt obligation based on projected quarterly interest payments and quarterly amortization. Debt obligations are discounted based on the appropriate yield curve given the loan's respective maturity and credit rating. Management uses its discretion and judgment in considering and appraising relevant factors for determining the valuations of its debt obligations.

Fair Value Option. Apollo has elected the fair value option for the assets and liabilities of the consolidated VIEs. Such election is irrevocable and is applied to financial instruments on an individual basis at initial recognition. Apollo has elected to separately present interest income in the condensed consolidated statements of operations from other changes in the fair value of the convertible notes issued by HFA. Apollo has applied the fair value option for certain corporate loans, other investments and debt obligations held by these entities that otherwise would not have been carried at fair value. Refer to note 4 to our condensed consolidated financial statements for further disclosure on financial instruments of the consolidated VIEs for which the fair value option has been elected.

Compensation and Benefits

Compensation and benefits include salaries, bonuses, profit sharing plans and the amortization of equity-based compensation. Bonuses are accrued over the service period. From time to time, the Company may distribute profits interests as a result of waived management fees to its investment professionals, which are considered compensation. Additionally, certain employees have arrangements whereby they are entitled to receive a percentage of carried interest income based on the fund's performance. To the extent that individuals are entitled to a percentage of the carried interest income and such entitlement is subject to potential forfeiture at inception, such arrangements are accounted for as profit sharing plans, and compensation expense is recognized as the related carried interest income is recognized.

Profit Sharing Expense. Compensation expense related to our profit sharing payable is a result of agreements with our Contributing Partners and employees to compensate them based on the ownership interest they have in the general partners of the Apollo funds. Therefore, any movements in the fair value of the underlying investments in the funds we manage and advise affect the profit sharing expense. The Contributing Partners and employees are allocated approximately 30% to 50% of the total carried interest income which is driven primarily by changes in fair value of the underlying fund's investments and is treated as compensation expense. Additionally, profit sharing expenses paid may be subject to clawback from employees, former employees and Contributing Partners.

In June 2011, the Company adopted a performance based incentive arrangement for certain Apollo partners and employees designed to more closely align compensation on an annual basis with the overall realized performance of the Company. This arrangement enables certain partners and employees to earn discretionary compensation based on carried interest realizations earned by the Company in a given year, which amounts are reflected in profit sharing expense in the accompanying condensed consolidated financial statements.

Incentive Fee Compensation. Certain employees are entitled to receive a discretionary portion of incentive fee income from certain of our capital markets funds, based on performance for the year. Incentive fee compensation expense is recognized on an accrual basis as the related carried interest income is earned.

Equity-Based Compensation. Equity-based compensation is accounted for in accordance with U.S. GAAP, which requires that the cost of employee services received in exchange for an award of equity instruments is generally measured based on the grant date fair value of the award. Equity-based awards that do not require future service (i.e., vested awards) are expensed immediately. Equity-based employee awards that require future service are recognized over the relevant service period. Further, as required under U.S. GAAP, the Company estimates forfeitures using industry comparables or historical trends for equity-based awards that are not expected to vest. Apollo's equity-based compensation awards consist of, or provide rights with respect to AOG Units, RSUs, Share Options, AAA RDUs, ARI restricted stock awards, ARI RSUs and AMTG RSUs. The Company's assumptions made to determine the fair value on grant date and the estimated forfeiture rate are embodied in the calculations of compensation expense.

Another significant part of our compensation expense is derived from amortization of the AOG Units subject to forfeiture by our Managing Partners and Contributing Partners. The estimated fair value was determined and recognized over the forfeiture period on a straight-line basis. We have estimated a 0% and 3% forfeiture rate for our Managing Partners and Contributing Partners, respectively, based on the Company's historical attrition rate for this level of staff as well as industry comparable rates. If either the Managing Partners or Contributing Partners are no longer associated with Apollo or if there is no turnover, we will revise our estimated compensation expense to the actual amount of expense based on the units vested at the balance sheet date in accordance with U.S. GAAP.

Additionally, the value of the AOG Units have been reduced to reflect the transfer restrictions imposed on units issued to the Managing Partners and Contributing Partners as well as the lack of rights to participate in future Apollo Global Management, LLC equity offerings. These awards have the following characteristics:

Awards granted to the Managing Partners (i) are not permitted to be sold to any parties outside of the Apollo Global Management, LLC control group and transfer restrictions lapse pro rata during the forfeiture period over 60 or 72 months, and (ii) allow the Managing Partners to initiate a change in control.

Awards granted to the Contributing Partners (i) are not permitted to be sold or transferred to any parties except to the Apollo Global Management, LLC control group and (ii) the transfer restriction period lapses over six years (which is longer than the forfeiture period which lapses ratably over 60 months).

As noted above, the AOG Units issued to the Managing Partners and Contributing Partners have different restrictions which affect the liquidity of and the discounts applied to each grant.

We utilized the Finnerty Model to calculate a discount on the AOG Units granted to the Contributing Partners. The Finnerty Model provides for a valuation discount reflecting the holding period restriction embedded in a restricted stock preventing its sale over a certain period of time. Along with the Finnerty Model we applied adjustments to account for the existence of liquidity clauses specific to contributing partner units and a minority interest consideration as compared to units sold through the strategic investor transaction in 2007. The combination of these adjustments yielded a fair value estimate of the AOG Units granted to the Contributing Partners.

The Finnerty Model proposes to estimate a discount for lack of marketability such as transfer restrictions by using an option pricing theory. This model has gained recognition through its ability to address the magnitude of the discount by considering the volatility of a company's stock price and the length of restriction. The concept underpinning the Finnerty Model is that restricted stock cannot be sold over a certain period of time. Further simplified, a restricted share of equity in a company can be viewed as having forfeited a put on the average price of the marketable equity over the restriction period (also known as an Asian Put Option). If we price an Asian Put Option and compare this value to that of the assumed fully marketable underlying stock, we can effectively estimate the marketability discount.

The assumptions utilized in the model were (i) length of holding period, (ii) volatility, (iii) dividend yield and (iv) risk free rate. Our assumptions were as follows:

- (i) We assumed a maximum two year holding period.
- (ii) We concluded based on industry peers, that our volatility annualized would be approximately 40%.
- (iii) We assumed no distributions.
- (iv) We assumed a 4.88% risk free rate based on U.S. Treasuries with a two year maturity.

For the Contributing Partners' grants, the Finnerty Model calculation, as detailed above, yielded a marketability discount of 25%. This marketability discount, along with adjustments to account for the existence of liquidity clauses and consideration of non-controlling interests as compared to units sold through the strategic investors transaction in 2007, resulted in an overall discount for these grants of 29%.

We determined a 14% discount for the grants to the Managing Partners based on the equity value per share of \$24. We determined that the value of the grants to the Managing Partners was supported by the 2007 sale of an identical security to Credit Suisse Management, LLC at \$24 per share. Based on an equity value per share of \$24, the implied discount for the grants to the Managing Partners was 14%. The Contributing Partners yielded a larger overall discount of 29%, as they are unable to cause a change in control of Apollo. This results in a lower fair value estimate, as their units have fewer beneficial features than those of the Managing Partners.

Income Taxes

Apollo has historically generally operated in the U.S. as partnerships for U.S. Federal income tax purposes and generally as corporate entities in non-U.S. jurisdictions. As a result, income generally has not been subject to U.S. Federal and state income taxes. Taxes related to income earned by these entities represent obligations of the individual partners and members and have not been reflected in the condensed consolidated financial statements. Income taxes presented on the condensed consolidated statements of operations are attributable to the NYC UBT and income taxes on certain entities located in non-U.S. jurisdictions.

Following the 2007 Reorganization, the Apollo Operating Group and its subsidiaries continue to generally operate in the U.S. as partnerships for U.S. Federal income tax purposes and generally as corporate entities in non-U.S. jurisdictions. Accordingly, these entities in some cases are subject to NYC UBT, or in the case of non-U.S. entities, to non-U.S. corporate income taxes. In addition, APO Corp., a wholly-owned subsidiary of the Company, is subject to U.S. Federal, state and local corporate income tax, and the Company's provision for income taxes is accounted for in accordance with U.S. GAAP.

As significant judgment is required in determining tax expense and in evaluating tax positions, including evaluating uncertainties, we recognize the tax benefits of uncertain tax positions only where the position is more likely than not to be sustained assuming examination by tax authorities. The tax benefit is measured as the largest amount of benefit that has a greater than 50% likelihood of being realized upon ultimate settlement. If a tax position is not considered more likely than not to be sustained, then no benefits of the position are recognized. The Company's tax positions are reviewed and evaluated quarterly to determine whether or not we have uncertain tax positions that require financial statement recognition.

Deferred income taxes are provided for the effects of temporary differences between the tax basis of an asset or liability and its reported amount in the condensed consolidated statements of financial condition. These temporary differences result in taxable or deductible amounts in future years.

Deferred tax assets and liabilities are recognized for the expected future tax consequences of differences between the carrying amount of assets and liabilities and their respective tax basis using currently enacted tax rates. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period when the change is enacted. Deferred tax assets are reduced by a valuation allowance when it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Recent Accounting Pronouncements

A list of recent accounting pronouncements that are relevant to Apollo and its industry is included in note 2 to our condensed consolidated financial statements.

Off-Balance Sheet Arrangements

In the normal course of business, we engage in off-balance sheet arrangements, including transactions in derivatives, guarantees, commitments, indemnifications and potential contingent repayment obligations. See note 12 to our condensed consolidated financial statements for a discussion of guarantees and contingent obligations.

Contractual Obligations, Commitments and Contingencies

As of March 31, 2012, the Company's material contractual obligations consist of lease obligations, contractual commitments as part of the ongoing operations of the funds and debt obligations. Fixed and determinable payments due in connection with these obligations are as follows:

	Remaining 2012	2013	2014	2015	2016	Thereafter	Total
	(in thousands)						
Operating lease obligations ⁽¹⁾	\$ 24,787	\$ 32,602	\$ 32,307	\$ 30,959	\$ 30,937	\$ 99,315	\$ 250,907
Other long-term obligations ⁽²⁾	9,361	1,713	500	104			11,678
AMH Credit Agreement ⁽³⁾	25,941	34,455	89,386	81,980	29,605	623,512	884,879
CIT secured loan agreement	721	9,623					10,344
Obligations as of March 31, 2012	60,810	78,393	122,193	113,043	60,542	722,827	1,157,808

- (1) The Company has entered into a sublease agreement and will contractually receive approximately \$6.0 million over the remaining periods of 2012 and thereafter.
- (2) Includes (i) payments on management service agreements related to certain assets and (ii) payments with respect to certain consulting agreements entered into by the Company. Note that a significant portion of these costs are reimbursable by funds.
- (3) \$723.3 million, net (\$995.0 million portion less amount repurchased) of the AMH debt matures in January 2017 and \$5.0 million matures in April 2014. Amounts represent estimated interest payments until the loan matures using an estimated weighted average annual interest rate of 4.75%, which includes the effects of the interest rate swap through its expiration in May 2012 and certain required repurchases of at least \$50.0 million by December 31, 2014 and at least \$100.0 million (inclusive of the previously purchased \$50.0 million) by December 31, 2015 as described in note 8 to our condensed consolidated financial statements.

Note: Due to the fact that the timing of certain amounts to be paid cannot be determined or for other reasons discussed below, the following contractual commitments have not been presented in the table above.

- (i) Amounts do not include the senior secured term loan entered into by AAA Investments of which \$402.5 million was utilized as of March 31, 2012. The term loan matures on June 30, 2015. AAA is consolidated by the Company in accordance with U.S. GAAP. The Company does not guarantee and has no legal obligation to repay amounts outstanding under the term loan. Accordingly, the \$402.5 million outstanding balance was excluded from the table above.
- (ii) As noted previously, we have entered into a tax receivable agreement with our Managing Partners and Contributing Partners which requires us to pay to our Managing Partners and Contributing Partners 85% of any tax savings received by APO Corp. from our step-up in tax basis. The tax savings achieved may not ensure that we have sufficient cash available to pay this liability and we might be required to incur additional debt to satisfy this liability.
- (iii) Debt amounts related to the consolidated VIEs are not presented in the table above as the Company is not a guarantor of these non-recourse liabilities.

Commitments

Our management companies and general partners have committed that we, or our affiliates, will invest a certain percentage of capital into the funds we manage. While a small percentage of these amounts are funded by us, the majority of these amounts have historically been funded by our affiliates, including certain of our employees and certain Apollo funds. The table below presents the commitment and remaining commitment amounts of Apollo and its affiliates, the percentage of total fund commitments of Apollo and its affiliates, the commitment and remaining commitment amounts of Apollo only (excluding affiliates), and the percentage of total fund commitments of Apollo only (excluding affiliates) for each private equity fund, capital markets fund and real estate fund as of March 31, 2012 as follows (\$ in millions):

Fund	Apollo and Affiliates Commitments	% of Total Fund Commitments	Apollo Only (Excluding Affiliates) Commitments	Apollo Only (Excluding Affiliates) % of Total Fund Commitments	Apollo and Affiliates Remaining Commitments	Apollo Only (Excluding Affiliates) Remaining Commitments
Private Equity:						
Fund VII	\$ 467.2 ⁽¹⁾	3.18%	\$ 178.4	1.22%	\$ 177.0 ⁽¹⁾	\$ 65.1
Fund VI	246.2	2.43	6.1	0.06	24.3	0.6
Fund V	100.0	2.67	0.5	0.01	6.5	⁽²⁾

Total	\$ 3,309.4		\$ 422.1		\$ 1,447.3	\$ 202.1

- (1) As of March 31, 2012, Palmetto had commitments and remaining commitment amounts in Fund VII of \$110.0 million and \$40.4 million, respectively, ANRP of \$150.0 million and \$125.9 million, respectively, Apollo/Palmetto Loan Portfolio, L.P. of \$300.0 million and \$120.0 million, respectively, Apollo/Palmetto Short-Maturity Loan Portfolio, L.P. of \$200.0 million and \$0.0 million, respectively, and AGRE U.S. Real Estate Fund, L.P. of \$300 million and \$266.1 million, respectively.

Edgar Filing: Apollo Global Management LLC - Form 10-Q

- (2) As of March 31, 2012, Apollo had an immaterial amount of remaining commitments in Fund IV and Fund V. Accordingly, presentation of such remaining commitments was not deemed meaningful for inclusion in the table above.
- (3) Of the total commitment amount in EPF, AAA, SOMA and Palmetto have approximately 54.5 million, 75.0 million and 106.0 million, respectively.
- (4) Of the total remaining commitment amount in EPF, AAA, SOMA and Palmetto have approximately 23.8 million, 32.8 million and 46.3 million, respectively.
- (5) As of March 31, 2012, the general partner of ACLF Co-Invest, a co-investment vehicle that invests alongside ACLF, had committed an immaterial amount to ACLF Co-Invest. Accordingly, presentation of such commitment was not deemed meaningful for inclusion in the table above.
- (6) As of March 31, 2012, SOMA had commitments and remaining commitment amounts in COF I of \$250.0 million and \$202.0 million, respectively.
- (7) Apollo's commitment in these funds is denominated in Euros and translated into U.S. dollars at an exchange rate of 1.00 to \$1.33 as of March 31, 2012.
- (8) Apollo and affiliated investors must maintain an aggregate capital balance in an amount not less than 1% of total capital account balances of the partnership. As of March 31, 2012, Apollo and its affiliates' capital balances exceeded the 1% requirement and are not required to fund a capital commitment.
- (9) Apollo's commitment in these funds is denominated in pound sterling and translated into U.S. dollars at an exchange rate of £1.00 to \$1.60 as of March 31, 2012.

As a limited partner, the general partner and manager of the Apollo private equity, capital markets and real estate funds, Apollo has unfunded capital commitments at March 31, 2012 and December 31, 2011 of \$202.1 million and \$137.9 million, respectively.

Apollo has an ongoing obligation to acquire additional common units of AAA in an amount equal to 25% of the aggregate after-tax cash distributions, if any, that are made to its affiliates pursuant to the carried interest distribution rights that are applicable to investments made through AAA Investments.

The AMH Credit Agreement, which provides for a variable-rate term loan, will have future impacts on our cash uses. Borrowings under the AMH Credit Agreement originally accrued interest at a rate of (i) LIBOR loans (LIBOR plus 1.25%), or (ii) base rate loans (base rate plus 0.50%). The Company has hedged \$167 million of the variable-rate loan with fixed rate swaps to minimize our interest rate risk as of March 31, 2012. The loan was originally scheduled to mature in April 2014. On December 20, 2010, Apollo amended the AMH Credit Agreement to extend the maturity date of \$995 million of the term loans from April 20, 2014 to January 3, 2017 and modified certain other terms of the Credit Agreement. Pursuant to this amendment, AMH or an affiliate was required to purchase from each lender that elected to extend the maturity date of its term loan a portion of such extended term loan equal to 20% thereof. In addition, AMH or an affiliate is required to repurchase at least \$50 million aggregate principal amount of term loans by December 31, 2014 and at least \$100 million aggregate principal amount of term loans (inclusive of the previously purchased \$50.0 million) by December 31, 2015 at a price equal to par plus accrued interest. The sweep leverage ratio (which is a figure that varies over time that is used to determine the applicable level of certain carve-outs to the negative covenants as well as to determine the level of AMH's cash collateralization requirements) was extended to end at the new extended maturity date. The interest rate for the highest applicable margin for the loan portion extended changed to LIBOR plus 4.25% and base rate plus 3.25%. On December 20, 2010, an affiliate of AMH that is a guarantor under the AMH Credit Agreement repurchased approximately \$180.8 million of term loans in connection with the extension of the maturity date of such loans and thus the AMH loans (excluding the portions held by AMH affiliates) had a remaining outstanding balance of \$728.3 million. The Company determined that the amendments to the AMH Credit Agreement resulted in debt extinguishment which did not result in any gain or loss.

The interest rate on the \$723.3 million, net (\$995.0 million portion less amount repurchased by the Company) of the loan at March 31, 2012 was 4.75% and the interest rate on the remaining \$5.0 million portion of the loan at March 31, 2012 was 2.00%. The estimated fair value of the Company's long-term debt obligation related to the AMH Credit Agreement is believed to be approximately \$784.6 million based on a yield analysis using available market data of comparable securities with similar terms and remaining maturities. The \$728.3 million carrying value of debt that is recorded on the condensed consolidated statements of financial condition at March 31, 2012 is the amount for which the Company expects to settle the AMH Credit Agreement.

On June 30, 2008, the Company entered into a credit agreement with Fund VI, pursuant to which Fund VI advanced \$18.9 million of carried interest income to the limited partners of Apollo Advisors VI, L.P., who are also employees of the Company. The loan obligation accrues interest at an annual fixed rate of 3.45% and terminates on the earlier of June 30, 2017 or the termination of Fund VI. In March 2011, a right of offset for the indemnified portion of the loan obligation was established between the Company and Fund VI, therefore the loan was reduced in the amount of \$10.9 million, which is offset in carried interest receivable on the condensed consolidated statements of financial condition. At December 31, 2011, the total outstanding loan aggregated \$9.0 million, including accrued interest of \$1.0 million, which approximated fair value, of which approximately \$6.5 million was not subject to the indemnity discussed in note 11 and is a receivable from the Contributing Partners and certain employees. During the three months ended March 31, 2012, there was \$0.0 million interest paid and \$0.1 million accrued interest on the outstanding loan obligation. As of March 31, 2012, the total outstanding loan aggregated \$9.1 million, including accrued interest of \$1.0 million which approximated fair value, of which approximately \$6.5 million was not subject to the indemnity discussed in note 11 and is a receivable from the Contributing Partners and certain employees.

In accordance with the Managing Partners Shareholders Agreement dated July 13, 2007, as amended, and the above credit agreement, we have indemnified the Managing Partners and certain Contributing Partners (at varying percentages) for any carried interest income distributed from Fund IV, Fund V and Fund VI that is subject to contingent repayment by the general partner. As discussed in note 11 to the condensed consolidated financial statements, the Company has recorded a general partner obligation to return previously distributed carried interest income or fees of \$41.2 million to Fund VI.

Contingent Obligations Carried interest income in both private equity funds and certain capital markets funds is subject to reversal in the event of future losses to the extent of the cumulative carried interest recognized in income to date. If all of the existing investments became worthless, the amount of cumulative revenues that had been recognized by Apollo through March 31, 2012 and that would be reversed approximates \$1.9 billion. Management views the possibility of all of the investments becoming worthless as remote. Carried interest income is affected by changes in the fair values of the underlying investments in the funds that Apollo manages. Valuations, on an unrealized basis, can be significantly affected by a variety of external factors including, but not limited to, bond yields and industry trading multiples. Movements in these items can affect valuations quarter to quarter even if the underlying business fundamentals remain stable. The table below indicates the potential future reversal of carried interest income:

	March 31, 2012
Private Equity Funds:	
Fund VII	\$ 970,244
Fund VI	88,228
Fund V	258,507
Fund IV	67,412
AAA	14,131
Total Private Equity Funds	1,398,522
Capital Markets Funds:	
Distressed and Event-Driven Hedge Funds (Value Funds, SOMA)	44,158
Mezzanine Funds (AIE II)	26,941
Non-Performing Loan Fund (EPF)	49,084
Senior Credit Funds (COF I/COF II, CLOs, ACLF, AEC)	367,271
Other	4,053
Total Capital Market Funds	491,507
Total	\$ 1,890,029

Additionally, at the end of the life of certain funds that the Company manages, there could be a payment due to a fund by the Company if the Company as general partner has received more carried interest income than was ultimately earned. This general partner obligation amount, if any, will depend on final realized values of investments at the end of the life of each fund. As discussed in note 11 to the condensed consolidated financial statements, the Company has recorded a general partner obligation to return previously distributed carried interest income or fees of \$41.2 million to Fund VI.

Certain funds may not generate carried interest income as a result of unrealized and realized losses that are recognized in the current and prior reporting period. In certain cases, carried interest income will not be generated until additional unrealized and realized gains occur. Any appreciation would first cover the deductions for invested capital, unreturned organizational expenses, operating expenses, management fees and priority returns based on the terms of the respective fund agreements.

One of the Company's subsidiaries, Apollo Global Securities, LLC, provides underwriting commitments in connection with security offerings to the portfolio companies of the funds we manage. As of March 31, 2012, there were no underwriting commitments outstanding related to such offerings.

In connection with the Gulf Stream acquisition during October 2011, the Company will also make payments to the former owners of Gulf Stream under a contingent consideration obligation which requires the Company to transfer cash to the former owners of Gulf Stream based on a specified percentage of incentive fee revenue. The contingent consideration liability has a fair value of approximately \$4.7 million as of October 24, 2011 (the date of acquisition) and March 31, 2012, which was determined based on the present value of the estimated range of undiscounted incentive fee payable cash flows between \$0 and approximately \$8.7 million using a discount rate of 13.7%.

In connection with the CPI acquisition during November 2010, Apollo received cash of \$15.5 million and acquired general partner interests in, and advisory agreements with, various real estate investment funds and co-investment vehicles and added to its team of real estate professionals. The consideration transferred in the acquisition is a contingent consideration in the form of a liability incurred by Apollo to CPI. The liability is an obligation of Apollo to transfer cash to CPI based on a specified percentage of future earnings. The estimated fair value of the contingent liability is \$1.2 million as of March 31, 2012.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our predominant exposure to market risk is related to our role as investment manager and general partner for our funds and the sensitivity to movements in the fair value of their investments and resulting impact on carried interest income and management fee revenues. Our direct investments in the funds also expose us to market risk whereby movements in the fair values of the underlying investments will increase or decrease both net gains (losses) from investment activities and income (loss) from equity method investments. For a discussion of the impact of market risk factors on our financial instruments refer to Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies Investments, at Fair Value.

The fair value of our financial assets and liabilities of our funds may fluctuate in response to changes in the value of investments, foreign exchange, commodities and interest rates. The net effect of these fair value changes impacts the gains and losses from investments in our condensed consolidated statements of operations. However, the majority of these fair value changes are absorbed by the Non-Controlling Interests.

The Company is subject to a concentration risk related to the investors in its funds. As of March 31, 2012, no individual investor accounted for more than 10% of the total committed capital to Apollo's active funds.

Risks are analyzed across funds from the bottom up and from the top down with a particular focus on asymmetric risk. We gather and analyze data, monitor investments and markets in detail, and constantly strive to better quantify, qualify and circumscribe relevant risks.

Each segment runs its own investment and risk management process subject to our overall risk tolerance and philosophy:

The investment process of our private equity funds involves a detailed analysis of potential acquisitions, and investment management teams assigned to monitor the strategic development, financing and capital deployment decisions of each portfolio investment.

Our capital markets funds continuously monitor a variety of markets for attractive trading opportunities, applying a number of traditional and customized risk management metrics to analyze risk related to specific assets or portfolios, as well as, fund-wide risks.

Impact on Management Fees Our management fees are based on one of the following:

capital commitments to an Apollo fund;

capital invested in an Apollo fund;

the gross, net or adjusted asset value of an Apollo fund, as defined; or

as otherwise defined in the respective agreements.

Management fees could be impacted by changes in market risk factors and management could consider an investment permanently impaired as a result of (i) such market risk factors cause changes in invested capital or in market values to below cost, in the case of our private equity funds and certain capital markets funds, or (ii) such market risk factors causing changes in gross or net asset value, for the capital markets funds. The proportion of our management fees that are based on NAV is dependent on the number and types of our funds in existence and the current stage of each fund's life cycle.

Impact on Advisory and Transaction Fees We earn transaction fees relating to the negotiation of private equity, capital markets and real estate transactions and may obtain reimbursement for certain out-of-pocket expenses incurred. Subsequently, on a quarterly or annual basis, ongoing advisory fees, and additional transaction fees in connection with additional purchases or follow-on transactions, may be earned. Management Fee Offsets and any broken deal costs are reflected as a reduction to advisory and transaction fees from affiliates. Advisory and transaction fees will be impacted by changes in market risk factors to the extent that they limit our opportunities to engage in private equity, capital markets and real estate transactions or impair our ability to consummate such transactions. The impact of changes in market risk factors on advisory and transaction fees is not readily predicted or estimated.

Impact on Carried Interest Income We earn carried interest income from our funds as a result of such funds achieving specified performance criteria. Our carried interest income will be impacted by changes in market risk factors. However, several major factors will influence the degree of impact:

the performance criteria for each individual fund in relation to how that fund's results of operations are impacted by changes in market risk factors;

whether such performance criteria are annual or over the life of the fund;

to the extent applicable, the previous performance of each fund in relation to its performance criteria; and

whether each fund's carried interest income is subject to contingent repayment.

As a result, the impact of changes in market risk factors on carried interest income will vary widely from fund to fund. The impact is heavily dependent on the prior and future performance of each fund, and therefore is not readily predicted or estimated.

Market Risk We are directly and indirectly affected by changes in market conditions. Market risk generally represents the risk that values of assets and liabilities or revenues and expenses will be adversely affected by changes in market conditions. Market risk is inherent in each of our investments and activities, including equity investments, loans, short-term borrowings, long-term debt, hedging instruments, credit default swaps, and derivatives. Just a few of the market conditions that may shift from time to time, thereby exposing us to market risk, include fluctuations in interest and currency exchange rates, equity prices, changes in the implied volatility of interest rates and price deterioration. For example, subsequent to the second quarter of 2007, debt capital markets around the world began to experience significant dislocation, severely limiting the availability of new credit to facilitate new traditional buyouts, and the markets remain volatile. Volatility in debt and equity markets can impact our pace of capital deployment, the timing of receipt of transaction fee revenues, and the timing of realizations. These market conditions could have an impact on the value of investments and our rates of return. Accordingly, depending on the instruments or activities impacted, market risks can have wide ranging, complex adverse effects on our results from operations and our overall financial condition. We monitor our market risk using certain strategies and methodologies which management evaluates periodically for appropriateness. We intend to continue to monitor this risk going forward and continue to monitor our exposure to all market factors.

Interest Rate Risk Interest rate risk represents exposure we have to instruments whose values vary with the change in interest rates. These instruments include, but are not limited to, loans, borrowings and derivative instruments. We may seek to mitigate risks associated with the exposures by taking offsetting positions in derivative contracts. Hedging instruments allow us to seek to mitigate risks by reducing the effect of movements in the level of interest rates, changes in the shape of the yield curve, as well as, changes in interest rate volatility. Hedging instruments used to mitigate these risks may include related derivatives such as options, futures and swaps.

Credit Risk Certain of our funds are subject to certain inherent risks through their investments.

Certain of our entities invest substantially all of their excess cash in open-end money market funds and money market demand accounts, which are included in cash and cash equivalents. The money market funds invest primarily in government securities and other short-term, highly liquid instruments with a low risk of loss. We continually monitor the funds' performance in order to manage any risk associated with these investments.

Certain of our entities hold derivatives instruments that contain an element of risk in the event that the counterparties may be unable to meet the terms of such agreements. We seek to minimize our risk exposure by limiting the counterparties with which we enter into contracts to banks and investment banks who meet established credit and capital guidelines. We do not expect any counterparty to default on its obligations and therefore do not expect to incur any loss due to counterparty default.

Foreign Exchange Risk Foreign exchange risk represents exposures we have to changes in the values of current holdings and future cash flows denominated in other currencies and investments in non-U.S. companies. The types of investments exposed to this risk include investments in foreign subsidiaries, foreign currency-denominated loans, foreign currency-denominated transactions, and various foreign exchange derivative instruments whose values fluctuate with changes in currency exchange rates or foreign interest rates. Instruments used to mitigate this risk are foreign exchange options, currency swaps, futures and forwards. These instruments may be used to help insulate us against losses that may arise due to volatile movements in foreign exchange rates and/or interest rates.

Non-U.S. Operations We conduct business throughout the world and are continuing to expand into foreign markets. We currently have offices outside the U.S. in London, Frankfurt, Luxembourg, Mumbai, Hong Kong and Singapore, and have been strategically growing our international presence. Our investments and revenues are primarily derived from our U.S. operations. With respect to our non-U.S. operations, we are subject to risk of loss from currency fluctuations, social instability, changes in governmental policies or policies of central banks, expropriation, nationalization, unfavorable political and diplomatic developments and changes in legislation relating to non-U.S. ownership. We also invest in the securities of corporations which are located in non-U.S. jurisdictions. As we continue to expand globally, we will continue to focus on monitoring and managing these risk factors as they relate to specific non-U.S. investments.

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), that are designed to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing disclosure controls and procedures, our management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. The design of any disclosure controls and procedures also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired objectives.

Our management, including our Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Exchange Act as of the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) are effective at the reasonable assurance level to accomplish their objectives of ensuring that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

No changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15(d)-15(f) under the Securities Exchange Act) occurred during our most recent quarter, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION**ITEM 1. LEGAL PROCEEDINGS**

On July 16, 2008, Apollo was joined as a defendant in a pre-existing purported class action pending in Massachusetts federal court against, among other defendants, numerous private equity firms. The suit alleges that beginning in mid-2003, Apollo and the other private equity firm defendants violated the U.S. antitrust laws by forming bidding clubs or consortia that, among other things, rigged the bidding for control of various public corporations, restricted the supply of private equity financing, fixed the prices for target companies at artificially low levels, and allocated amongst themselves an alleged market for private equity services in leveraged buyouts. The suit seeks class action certification, declaratory and injunctive relief, unspecified damages, and attorneys' fees. On August 27, 2008, Apollo and its co-defendants moved to dismiss plaintiffs' complaint and on November 20, 2008, the Court granted the company's motion. The Court also dismissed two other defendants, Permira and Merrill Lynch. In an order dated August 18, 2010, the Court granted in part and denied in part Plaintiffs' motion to expand the complaint and to obtain additional discovery. The Court ruled that Plaintiffs could amend the complaint and obtain discovery in a second discovery phase limited to eight additional transactions. The Court gave the plaintiffs until September 17, 2010 to amend the complaint to include the additional eight transactions. On September 17, 2010, the plaintiffs filed a motion to amend the complaint by adding the additional eight transactions and adding Apollo as a defendant. On October 6, 2010, the Court granted plaintiffs' motion to file the fourth amended complaint. Plaintiffs' fourth amended complaint, filed on October 7, 2010, adds Apollo, as a defendant. Apollo joined in the other defendants' October 21, 2010 motion to dismiss the third claim for relief and all claims by the PanAmSat Damages Sub-class in the Fourth Amended Complaint, which motion was granted on January 13, 2011. On November 4, 2010, Apollo moved to dismiss, arguing that the claims against Apollo are time-barred and that the allegations against Apollo are insufficient to state an antitrust conspiracy claim. On February 17, 2011, the Court denied Apollo's motion to dismiss, ruling that Apollo should raise the statute of limitations issues on summary judgment after discovery is completed. Apollo filed its answer to the fourth amended complaint on March 21, 2011. On July 11, 2011, the plaintiffs filed a motion for leave to file a fifth amended complaint that adds ten additional transactions and expands the scope of the class seeking relief. On September 7, 2011, the Court denied the motion for leave to amend without prejudice and gave plaintiffs permission to take limited discovery on the ten additional transactions. The Court set April 17, 2012, as the deadline for completing all fact discovery. In March 2012, the Court extended that deadline so that the parties could continue to take depositions until May 31, 2012, though the parties have agreed to schedule some depositions in June 2012 as well. Currently, Apollo does not believe that a loss from liability in this case is either probable or reasonably estimable. The Court granted Apollo's motion to dismiss plaintiffs' initial complaint in 2008, ruling that Apollo was released from the only transaction in which it allegedly was involved. While plaintiffs have survived Apollo's motion to dismiss the fourth amended complaint, the Court stated in denying the motion that it will consider the statute of limitations (one of the bases for Apollo's motion to dismiss) at the summary judgment stage. Based on the applicable statute of limitations, among other reasons, Apollo believes that plaintiffs' claims lack factual and legal merit and intends to defend it vigorously. For these reasons, no estimate of possible loss, if any, can be made at this time.

On March 6, 2012, several plaintiffs filed a complaint on behalf of several putative classes of consumers against, among others, Trilegiant Corporation, Inc. (Trilegiant), its parent company, Affinion Group, LLC (Affinion), and Apollo, which owns approximately 69% of Affinion's common stock. The putative class action, captioned Hope Kelm, et al. v. Chase Bank, USA, N.A., et al. was filed in the United States District Court for the District of Connecticut, and also names as defendants several credit card companies and online merchants with which Trilegiant conducts business. On March 15, 2012, plaintiffs filed a nearly identical putative class action, also in the District of Connecticut and naming similar defendants, including Apollo, captioned Debra Miller, et al. v. 1-800-Flowers.com, Inc., et al. (No. 12-cv-396). In both cases, the plaintiffs allege that Trilegiant, aided by its business partners, has developed a set of business practices intended to create consumer confusion and ultimately defraud consumers into unknowingly paying fees to clubs for unwanted services. Plaintiffs allege that Apollo is a proper defendant because of its stock ownership and ability to appoint the majority of Affinion's board. The complaint asserts claims under the Racketeer Influenced Corrupt Organizations Act; the Electronic Communications Privacy Act; the Connecticut Unfair Trade Practices Act; and the California Business and Professional Code, and seeks, among other things, restitution or disgorgement, injunctive relief, compensatory, treble and punitive damages, and attorneys' fees. Apollo believes that plaintiffs' claims against it are without merit. For this reason, and because the claims against Apollo are in their early stages, no reasonable estimate of possible loss, if any, can be made at this time.

Various state attorneys general and federal and state agencies have initiated industry-wide investigations into the use of placement agents in connection with the solicitation of investments, particularly with respect to investments by public pension funds. Certain affiliates of Apollo have received subpoenas and other requests for information from various government regulatory agencies and investors in Apollo's funds, seeking information regarding the use of placement agents. CalPERS, one of our Strategic Investors, announced on October 14, 2009, that it had initiated a special review of placement agents and related issues. The Report of the CalPERS Special Review was issued on March 14, 2011. That report does not allege any wrongdoing on the part of Apollo or its affiliates. Apollo is continuing to cooperate with all such investigations and other reviews. In addition, on May 6, 2010, the California Attorney General filed a civil complaint against Alfred Villalobos and his company, Arvco Capital Research, LLC (Arvco) (a placement agent that Apollo has used) and Federico Buenrostro Jr., the former CEO of CalPERS, alleging conduct in violation of certain California laws in connection with CalPERS's purchase of securities in various funds managed by Apollo and another asset manager. Apollo is not a party to the civil lawsuit and the lawsuit does not allege any misconduct on the part of Apollo. Likewise, on April 23, 2012, the United States Securities and Exchange Commission filed a lawsuit alleging securities fraud on the part of Arvco, as well as Messrs. Buenrostro and Villalobos, in connection with their activities concerning certain CalPERS investments in funds managed by Apollo. This lawsuit also does not allege wrongdoing on the part of Apollo, and in fact alleges that Apollo was defrauded by Arvco, Villalobos, and Buenrostro. Apollo believes that it has handled its use of placement agents in an appropriate manner. Finally, on December 29, 2011, the United States Bankruptcy Court for the District of Nevada approved an application made by Mr. Villalobos, Arvco and related entities (the Arvco Debtors) in their consolidated bankruptcy proceedings to hire special litigation counsel to pursue certain claims on behalf of the bankruptcy estates of the Arvco Debtors, including potential claims against Apollo (a) for fees that Apollo purportedly owes the Arvco Debtors for placement agent services, and (b) for indemnification of legal fees and expenses arising out of the Arvco Debtors' defense of the California Attorney General action described above. To date, no such claims have been brought. Apollo denies the merit of any such claims and will vigorously contest them, if they are brought.

Although the ultimate outcome of these matters cannot be ascertained at this time, we are of the opinion, after consultation with counsel, that the resolution of any such matters to which we are a party at this time will not have a material effect on our financial statements. Legal actions material to us could, however, arise in the future.

ITEM 1A. RISK FACTORS

For a discussion of our potential risks and uncertainties, see the information under the heading Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2011 filed with the SEC on March 9, 2012, which is accessible on the Securities and Exchange Commission's website at www.sec.gov. There have been no material changes to the risk factors for the three months ended March 31, 2012.

The risks described in our Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Unregistered Sale of Equity Securities

On January 18, 2012, February 13, 2012 and March 5, 2012, we issued 343,939, 1,993,914 and 49,845 Class A shares, net of taxes, to Apollo Management Holdings, L.P., respectively, for an aggregate purchase price of \$4,880,494, \$28,911,753 and \$697,547, respectively. The issuances were exempt from registration under the Securities Act in accordance with Section 4(2) and Rule 506 thereof, as transactions by the issuer not involving a public offering. We determined that the purchaser of Class A shares in the transactions, Apollo Management Holdings, L.P., was an accredited investor.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit Number	Exhibit Description
3.1	Certificate of Formation of Apollo Global Management, LLC (incorporated by reference to Exhibit 3.1 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
3.2	Amended and Restated Limited Liability Company Agreement of Apollo Global Management, LLC (incorporated by reference to Exhibit 3.2 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
4.1	Specimen Certificate evidencing the Registrant's Class A shares (incorporated by reference to Exhibit 4.1 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.1	Amended and Restated Limited Liability Company Operating Agreement of AGM Management, LLC dated as of July 10, 2007 (incorporated by reference to Exhibit 10.1 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.2	Third Amended and Restated Limited Partnership Agreement of Apollo Principal Holdings I, L.P. dated as of April 14, 2010 (incorporated by reference to Exhibit 10.2 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.3	Third Amended and Restated Limited Partnership Agreement of Apollo Principal Holdings II, L.P. dated as of April 14, 2010 (incorporated by reference to Exhibit 10.3 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.4	Third Amended and Restated Exempted Limited Partnership Agreement of Apollo Principal Holdings III, L.P. dated as of April 14, 2010 (incorporated by reference to Exhibit 10.4 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.5	Third Amended and Restated Exempted Limited Partnership Agreement of Apollo Principal Holdings IV, L.P. dated as of April 14, 2010 (incorporated by reference to Exhibit 10.5 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.6	Registration Rights Agreement, dated as of August 8, 2007, by and among Apollo Global Management, LLC, Goldman Sachs & Co., J.P. Morgan Securities Inc. and Credit Suisse Securities (USA) LLC (incorporated by reference to Exhibit 10.6 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.7	Investor Rights Agreement, dated as of August 8, 2007, by and among Apollo Global Management, LLC, AGM Management, LLC and Credit Suisse Securities (USA) LLC (incorporated by reference to Exhibit 10.7 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.8	Apollo Global Management, LLC 2007 Omnibus Equity Incentive Plan, as amended and restated (incorporated by reference to Exhibit 10.8 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.9	Agreement Among Principals, dated as of July 13, 2007, by and among Leon D. Black, Marc J. Rowan, Joshua J. Harris, Black Family Partners, L.P., MJR Foundation LLC, AP Professional Holdings, L.P. and BRH Holdings, L.P. (incorporated by reference to Exhibit 10.9 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.10	Shareholders Agreement, dated as of July 13, 2007, by and among Apollo Global Management, LLC, AP Professional Holdings, L.P., BRH Holdings, L.P., Black Family Partners, L.P., MJR Foundation LLC, Leon D. Black, Marc J. Rowan and Joshua J. Harris (incorporated by reference to Exhibit 10.10 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).

Edgar Filing: Apollo Global Management LLC - Form 10-Q

Exhibit Number	Exhibit Description
10.11	Exchange Agreement, dated as of July 13, 2007, by and among Apollo Global Management, LLC, Apollo Principal Holdings I, L.P., Apollo Principal Holdings II, L.P., Apollo Principal Holdings III, L.P., Apollo Principal Holdings IV, L.P., Apollo Management Holdings, L.P. and the Apollo Principal Holders (as defined therein), from time to time party thereto (incorporated by reference to Exhibit 10.11 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
10.12	Tax Receivable Agreement, dated as of July 13, 2007, by and among APO Corp., Apollo Principal Holdings II, L.P., Apollo Principal Holdings IV, L.P., Apollo Management Holdings, L.P. and each Holder defined therein (incorporated by reference to Exhibit 10.12 to the Registrant's Registration Statement on Form S-1 (File No. 333-150141)).
